ASIS ASIS-PSP Certification is a highly respected and widely recognized credential in the field of physical security. It is designed for professionals who are responsible for managing the security of buildings, facilities, and other assets. Physical Security Professional Exam certification program focuses on developing the knowledge and skills needed to effectively plan, implement, and manage physical security systems.

ASIS Physical Security Professional Exam Sample Questions (Q90-Q95):

NEW QUESTION # 90
Libel is oral defamation; libel is defamation through the written word.

- A. True
- B. False

Answer: B

Explanation:
The statement is incorrect. The correct definitions are:
Libel is written defamation-false and damaging statements published in writing or other fixed mediums.
Slander is oral defamation-spoken false statements meant to damage someone's reputation.
So, libel is not oral; slander is.

NEW QUESTION # 91
A concept that has grown largely in response to the difficulties faced by merchants in protecting their property from shoplifters and the problems and dangers they face when they make an asset, is called:

- A. Confinement
- B. Detention
- C. None of the above
- D. Release

Answer: B

NEW QUESTION # 92
Which of the following types of alarm transmission systems is designed to reduce leased telephone line charges while providing a higher degree of security?

- A. Circuit loop
- B. Cellular
- C. Multiplex
- D. Dial-up

Answer: C

Explanation:
Multiplex systems allow multiple alarm signals to be transmitted over a single communication line. This significantly reduces the cost of leasing multiple phone lines while enhancing efficiency and providing a high level of security by encoding and validating data streams.
A (Circuit loop) is an older method using dedicated circuits.
C (Cellular) is wireless but may not always offer secure or low-cost options.
D (Dial-up) is cost-effective but offers limited security and speed.

NEW QUESTION # 93

The technology used in a retail security system that uses VHF/microwave is an electronic:

- A. Point-of-sale surveillance
- B. Article surveillance
- C. Dual detector
- D. Magnetometer

Answer: B

Explanation:

Electronic Article Surveillance (EAS) systems are commonly used in retail environments to prevent theft.

These systems often use VHF, microwave, or other radio frequencies to detect tagged merchandise. When someone attempts to exit the store without deactivating the tag, the system sets off an alarm.

A (Point-of-sale surveillance) involves video and transaction monitoring.

C (Dual detector) refers to motion detection in security systems.

D (Magnetometer) is used for metal detection, not retail theft prevention.

NEW QUESTION # 94

Which of the following verifications is included in a security system acceptance test?

- A. Cameras are aimed and focused properly
- B. Owner can operate the systems without assistance
- C. Cameras facing the rising or setting sun utilize wide dynamic range
- D. System operates as expected 24 hours per day for 15 consecutive calendar days

Answer: A

Explanation:

Comprehensive Detailed Explanation:

A security system acceptance test verifies that the system has been installed according to the design and is operating properly. This includes ensuring cameras are correctly aimed, focused, and provide the intended coverage and image quality. This practical verification is critical for performance validation.

B and C may be part of training or specific functionality checks but are not core acceptance test items.

D refers to reliability testing, which is separate from initial acceptance.
