Acquia Certified Site Builder - Drupal 8 Sample Questions (Q14-Q19):

NEW QUESTION # 14

You are building a Drupal site that makes great use of imagery. Photos are used throughout the site in different sizes and attached to various entities. How should you handle the images for the site so that they can be easily managed and used in multiple locations?

- A. Use the core Media module with media type "Image" to store the images. Create reference fields in the entities to include the images.
- B. Since the images need to be displayed in many different sizes, they should be uploaded into the body field, and resized in the WYSIWYG to whatever size is needed.
- C. On the entities that need images, create a "File" field. Upload images to each entity that needs them.
- D. Use the contributed Media module and create media type "Image" to store the images. Create reference fields in the entities to include the images.

Answer: B

NEW QUESTION # 15

One of your site users has reached out to you with concerns about inaccurate information they saw while reading one of your blog posts. On further investigation, it turns out the same information appears in the sidebar of every page on the site. How should you make your corrections? Choose 2 answers.

- A. Click the blog post's "Manage layout" link, find the field containing the inaccurate information, and make changes there.
- B. Hover over the content until a pencil icon appears, click the icon and choose "Quick edit" so that you can modify the content in place.
- C. Navigate to the Block Layout admin page's custom block library, find the custom block that contains the information in question, and make changes to the content in the block editor.
- D. Click the blog post's "Edit" link, and make changes to the content in the editor form, repeat this process for all pages on the site.

Answer: A,C

NEW QUESTION # 16

You are building a site and have placed custom blocks in regions. After some time, you decide to install a new contributed theme, and set it as the default for the site. After switching to the new theme, you notice that many of your blocks have disappeared. What is the likely reason for this?

- A. The new theme only allows system blocks, not custom blocks.
- B. The new theme's regions have different names from the regions in the old theme. Those blocks have been disabled.
- C. The blocks have not yet been registered with the new theme.
- D. The blocks were built in such a way that they are not compatible with the new theme. They need to be re-created.

Answer: B

NEW QUESTION # 17

A "Case Study" content type includes an entity reference field "field_related_product," to associate each Case Study with a "Product" node. You are asked to add a sidebar block to the Product node display that shows a list of related case studies. How can you build this functionality?

- A. Add "field_related_product" to the Product content type and use CSS to display the field in the sidebar region.
- B. Add the "show related content" block to the Product nodes display. Set it to include only nodes of type "Case Study."
- C. Create a view of Product nodes, with a relationship to field_related_product, and add the title field using the relationship. Add the block to the Product nodes display.

- D. Create a View of Case Study nodes, with a relationship to content referenced from field_related_product, and a contextual filter by ID using the relationship, set to use "Content ID from URL." Add the block to the Product nodes display

Answer: A

NEW QUESTION # 18

What is meant by headless Drupal? Choose 2 answers

- A. Publishing content automatically in Drupal.
- **B. Just another phrase for "decoupled Drupal"**
- **C. Exposing Drupal content to other systems such as native applications.**
- D. Applying security updates automatically to Drupal installation

Answer: B,C
