New GAQM CASPO-001 Practice Materials | CASPO-001 Exam Topic

The web-based GAQM CASPO-001 Practice Exam is compatible with all operating systems, including Mac, Linux, iOS, Android, and Windows. It is a browser-based Certified Agile Scrum Product Owner (CASPO) (CASPO-001) practice exam that works on all major browsers, including Chrome, Firefox, Safari, Internet Explorer, and Opera. This means that you won't have to worry about installing any complicated software or plug-ins.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q75-Q80):

NEW QUESTION # 75

What three factors are best considered when establishing the Sprint length? (Choose the best three answers)

- A. The risk of being disconnected from the stakeholders.
- B. Sprints must have the same length throughout an organization.
- C. The level of uncertainty over the technology to be used.
- D. The ability to go to market with a product release.
- E. The frequency at which team formation can be changed.

Answer: A,C,D

Explanation:

Sprint length in Scrum is a critical decision that impacts the team's ability to deliver value and adapt. The Scrum Guide states that Sprints are fixed in length (typically one month or less) to create consistency and enable regular inspection and adaptation. While it doesn't explicitly list factors, practical application and Scrum principles suggest:

* A (The ability to go to market with a product release): Shorter Sprints allow faster feedback and releases, aligning with Scrum's

focus on delivering value frequently.

* D (The level of uncertainty over the technology to be used): High uncertainty may warrant shorter Sprints to mitigate risk and validate assumptions, a key aspect of empirical process control.

NEW QUESTION # 76

Which statement is least accurate when providing a definition of "Done"? (Choose the best answer)

- A. It may vary depending on the project
- **B. It is defined by the Scrum Master**
- C. It becomes more complete over time
- D. It is the exit criteria to determine whether a Product Backlog item is complete

Answer: B

Explanation:

The Definition of "Done" is a team or organizational standard, not the Scrum Master's sole responsibility. The Scrum Guide states: "If it is not an organizational standard, the Scrum Team must create a Definition of Done appropriate for the product."

* A: Accurate—it defines completion.

* B: True—it can differ by context or product.

* C: Least accurate—the Scrum Team or organization defines it, not just the Scrum Master.

NEW QUESTION # 77

The process of regular inspection and adaptation employs knowledgeable and skilled inspectors. What are two ways in which the Product Owner takes the lead in the inspection process? (Choose the best two answers)

- A. At the Daily Scrum the Product Owner inspects the Sprint burn-down for progress towards a complete Increment and re-planning the team's work.
- B. At the end of Sprint Planning the Product Owner verifies the Sprint Backlog for completeness in order to allow the Sprint to start.
- **C. The Product Owner invites stakeholders to the Sprint Review to learn how the current state of the marketplace influences what is the most valuable thing to do next.**
- **D. At the Sprint Review the Product Owner shares the current state of Product Backlog, which, combined with the inspection of the Increment, leads to an updated Product Backlog.**

Answer: C,D

Explanation:

The Product Owner leads inspection related to value and backlog management:

* A: At the Sprint Review, they present the Product Backlog state, adapting it based on Increment feedback, per: "The Product Owner discusses the Product Backlog as it stands."

* D: Inviting stakeholders ensures market insights inform value, aligning with: "The Product Owner may invite other people to attend."

* B: Daily Scrum is for Developers; the Product Owner doesn't inspect burn-downs there.

NEW QUESTION # 78

When many Scrum Teams are working on the same product, should all of their Increments be integrated every Sprint? (Choose the best answer)

- A. No, that is far too hard and must be done in a hardening Sprint.
- B. Yes, but only for Scrum Teams whose work has dependencies.
- **C. Yes, otherwise the Product Owners and stakeholders may not be able to accurately inspect what is done.**
- D. No, each Scrum Team stands alone.

Answer: C

Explanation:

The Scrum Guide mandates that when multiple Scrum Teams work on one product, they produce a single integrated Increment:

"Multiple Scrum Teams often work together on the same product... The Increment must be integrated and usable so that it can provide value." This ensures transparency and stakeholder feedback at the Sprint Review. Option A (hardening Sprint) is a

misconception-Scrum rejects separate phases for integration. Option B contradicts the single-product focus. Option C limits integration to dependencies, but the Scrum Guide requires full integration regardless. Option D correctly emphasizes the need for a cohesive, inspectable Increment, making it the best answer.

NEW QUESTION # 79

The Product Owner manages the Product Backlog. Who is accountable for estimating the effort to complete the Product Backlog items? (Choose the best answer)

- **A. The Developers. As a collective, they have a complete view of the work needed to transform Product Backlog items into Increments of product.**
- B. The PMO. They have all the history on projects delivered, and this enables the IT department to make delivery commitments.
- C. The Product Owner. The Product Owner is required to commit on delivery to the users and the stakeholders.

Answer: A

Explanation:

Effort estimation is a technical task owned by the Developers, who execute the work. The Scrum Guide notes:

"The Developers are responsible for... planning how to deliver the Increment." During Sprint Planning and refinement, they estimate effort based on their expertise.

* A: Correct—the Developers collectively assess what's needed to meet the Definition of "Done."

* B: PMO isn't a Scrum role; estimation stays within the team.

NEW QUESTION # 80

.....

You can customize the time and GAQM CASPO-001 questions of our Certified Agile Scrum Product Owner (CASPO) (CASPO-001) practice exams according to your needs.
