Exam GH-200 Experience - GH-200 Exam Material

You will get your hands on the international GH-200 certificate you want. Perhaps you can ask the people around you that GH-200 study engine have really helped many people pass the exam. Of course, you can also experience it yourself. Next, allow me to introduce our GH-200 Training Materials. First, our GH-200 practice briandumps have varied versions as the PDF, software and APP online which can satisfy different needs of our customers. Secondly, the price is quite favourable.

Microsoft GH-200 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Author and Maintain Workflows: This section of the exam measures skills of DevOps Engineers and Automation Specialists and covers building and managing workflows triggered by events such as pushes, scheduled times, manual triggers, and webhooks. It includes understanding workflow components like jobs, steps, actions, and runners, syntax correctness, environment variables, secrets management, and dependencies between jobs. Candidates will also demonstrate practical abilities to create workflows for various purposes, including publishing packages, using service containers, routing jobs, and deploying releases to cloud providers.

Topic 2	<ul style="list-style-type: none"> • Author and Maintain Actions: This domain evaluates the abilities of Action Developers and Automation Engineers to select and create suitable types of GitHub Actions, such as JavaScript, Docker containers, or run steps. It emphasizes troubleshooting action code, understanding the components and file structures of actions, and using workflow commands within actions to communicate with runners, including exit code management.
Topic 3	<ul style="list-style-type: none"> • Manage GitHub Actions in the Enterprise: This section measures the expertise of Enterprise Administrators and Platform Engineers in distributing and managing GitHub Actions and workflows at the organizational level. It includes reuse and sharing of templates, strategies for managing reusable components via repositories and naming conventions, controlling access to actions, setting organization-wide usage policies, and planning maintenance to ensure efficient enterprise-wide deployment of GitHub Actions.
Topic 4	<ul style="list-style-type: none"> • Consume Workflows: This domain targets Software Developers and Quality Assurance Engineers and focuses on interpreting workflow runs and their outcomes. It covers identifying triggering events, reading workflow configurations, troubleshooting failures by analyzing logs, enabling debug logging, managing environment variables, caching dependencies, and passing data between jobs. Candidates also manage workflow runs, artifacts, approvals, and status badges, as well as locating workflows within repositories and leveraging organizational templated workflows.

Microsoft GitHub Actions Sample Questions (Q11-Q16):

NEW QUESTION # 11

You installed specific software on a Linux self-hosted runner. You have users with workflows that need to be able to select the runner based on the identified custom software. Which steps should you perform to prepare the runner and your users to run these workflows? (Each correct answer presents part of the solution. Choose two.)

- A. Create the group custom-software-on-linux and move the runner into the group.
- B. Inform users to identify the runner with the labels custom-software and linux.
- C. Inform users to identify the runner based on the group.
- D. Add the label linux to the runner.
- E. Add the label custom-software to the runner.
- F. Configure the webhook and network to enable GitHub to trigger workflow.

Answer: B,E

Explanation:

[F] Add a label for the custom software as required.

Note: Using labels with self-hosted runners

You can use labels to organize your self-hosted runners based on their characteristics.

Creating a custom label

You can create custom labels for runners at the repository and organization levels.

[C, not D] Linux is a default label and does not have to be created to be used.

Reference:

<https://docs.github.com/en/actions/how-to/manage-runners/self-hosted-runners/apply-labels>

NEW QUESTION # 12

As a developer, you are configuring GitHub Actions to deploy VMs to production. A member of the VMOps team must provide approval before the deployment occurs. Which of the following steps should you take? (Each correct answer presents part of the solution. Choose two.)

- A. Add the VMs to the environment.
- B. Navigate to the organization settings and create a Production environment with the VMOps team as a required reviewer.
- C. Specify the environment named Production in the workflow jobs that deploy to the VMs.
- D. Specify the VMOps team as the owner of the environment.
- E. Navigate to the repository settings and create a Production environment with the VMOps team as a required reviewer.

Answer: E

Explanation:

Creating an environment

To configure an environment in a personal account repository, you must be the repository owner.

To configure an environment in an organization repository, you must have admin access.

On GitHub, navigate to the main page of the repository.

Under your repository name, click Settings. ...

In the left sidebar, click Environments.

Click New environment.

Enter a name for the environment, then click Configure environment.

Etc.

Reference:

<https://docs.github.com/en/actions/how-tos/deploy/configure-and-manage-deployments/manage-environments>

NEW QUESTION # 13

What is the simplest action type to run a shell script?

- **A. JavaScript action**
- B. Composite action
- C. Bash script action
- D. Docker container action

Answer: A

Explanation:

Types of actions

Docker container actions. Docker containers package the environment with the GitHub Actions code. ...

JavaScript actions. JavaScript actions can run directly on a runner machine, and separate the action code from the environment used to run the code. ...

Composite Actions.

Note:

JavaScript actions

JavaScript actions can run directly on a runner machine, and separate the action code from the environment used to run the code.

Using a JavaScript action simplifies the action code and executes faster than a Docker container action.

Reference:

<https://docs.github.com/en/actions/concepts/workflows-and-actions/custom-actions>

NEW QUESTION # 14

By default, which workflows can use an action stored in internal repository? (Each answer presents a complete solution. Choose two.)

- A. public repositories owned by the same organization as the enterprise
- B. selected public repositories outside of the enterprise
- **C. private repositories owned by an organization of the enterprise**
- **D. internal repositories owned by the same organization as the enterprise**

Answer: C,D

Explanation:

Any actions or reusable workflows stored in the internal or private repository can be used in workflows defined in other internal or private repositories owned by the same organization, or by any organization owned by the enterprise.

Reference:

<https://docs.github.com/actions/creating-actions/sharing-actions-and-workflows-with-your-enterprise>

NEW QUESTION # 15

Which action type should be used to bundle a series of run steps into a reusable custom action?

- A. Bash script action

- B. JavaScript action
- C. Docker container action
- **D. Composite action**

Answer: D

Explanation:

A composite action allows you to bundle multiple steps into a single reusable action within a workflow. It is composed of multiple run steps or other actions and can be reused across workflows, making it the perfect choice for bundling a series of steps.

NEW QUESTION # 16

.....

If you are preparing for the exam in order to get the related GH-200 certification, here comes a piece of good news for you. The GH-200 guide torrent is compiled by our company now has been praised as the secret weapon for candidates who want to pass the GH-200 Exam as well as getting the related certification, so you are so lucky to click into this website where you can get your secret weapon. Our reputation for compiling the best GH-200 training materials has created a sound base for our future business.
