## ISTQB (ISTQB CTAL-TA) ISTQB Certified Tester Advanced Level - Test Analyst (Syllabus 2012) Sample Questions (Q49-Q54):

### NEW QUESTION # 49

During test execution defects have been found including non-compliance to requirements, calculations that produce incorrect results,

and improper handling of data or situations.

Which of the following test types is most likely being performed?

- A. Functional appropriateness testing
- B. Usability testing
- **C. Functional correctness testing**
- D. Interoperability testing

**Answer: C**

Explanation:

The test type that is most likely being performed is functional correctness testing. Functional correctness testing is a test type that verifies that the system or component produces the correct results for a given set of inputs or conditions. This test type can detect defects such as non-compliance to requirements, calculations that produce incorrect results, and improper handling of data or situations. #### **NEW QUESTION # 50**

A new web site must operate correctly with different browsers (Internet Explorer, Google Chrome, Firefox, Opera, Safari), using different plug-ins (Realplayer, Mediaplayer), will be receiving pages from different servers (IIS, Apache and WebLogic) and will be running on various operating systems (Windows, Android, iOS and Linux).

Which of the following test techniques should you use to define the required test cases for testing this new web site in its various environments?

- **A. Pairwise testing**
- B. Use case testing
- C. Decision table testing
- D. Exploratory testing

**Answer: A**

Explanation:

The test technique that should be used to define the required test cases for testing this new web site in its various environments is pairwise testing. Pairwise testing is a technique that tests all possible pairs of inputs for a given scenario using a mathematical algorithm to reduce the number of combinations. This technique is suitable for testing a system that has many input variables with different values or options, such as browsers, plug-ins, servers, and operating systems. #### **NEW QUESTION # 51**

Which of the following appropriate tasks for the Test Analyst is performed during the test analysis phase?

- A. Create a test execution schedule
- B. Review test estimates
- **C. Examine the test basis**
- D. Evaluate status against exit criteria

**Answer: C**

Explanation:

Examining the test basis is an appropriate task for the Test Analyst during the test analysis phase, as it involves identifying and evaluating the sources of information for test analysis, such as requirements, design documents, user stories, etc. Reviewing test estimates, creating a test execution schedule, and evaluating status against exit criteria are tasks that belong to other phases of testing, such as test planning, test implementation, and test closure. #### **NEW QUESTION # 52**

Based on the tax system specification as described below, using boundary value analysis, which would be the best test set to explicitly test on single boundary value fully?

Tax system

A tax system needs to be updated due to new legislation. For a person with a salary of less than € 20 000 and who is married, the tax needs to be recalculated.

If a person has at least three and less than six children, an additional 10% reduction is applicable.

Test set (i)		
Civil Status	Salary	Number of Children
Married	€ 20.000	4
Not Married	€ 22.000	3
Married	€ 18.000	2
Test set (ii)		
Civil Status	Salary	Number of Children
Not Married	€ 19.000	8
Not Married	€ 20.000	6
Married	€ 50.000	4
Test set (iii)		
Civil Status	Salary	Number of Children
Married	€ 20.000	10
Not Married	€ 22.000	5
Not Married	€ 20.001	0
Test set (iv)		
Civil Status	Salary	Number of Children
Not Married	€ 22.000	1
Not Married	€ 18.000	2
Married	€ 18.000	10

- A. Test set (i)
- B. Test set (iii)
- C. Test set (iv)
- D. Test set (ii)

**Answer: D**

Explanation:

The test set B is the best test set to explicitly test on single boundary value fully, using boundary value analysis. Boundary value analysis is a technique that tests the values at or near the boundaries of an input domain. The boundaries for this scenario are:

\* Salary less than €20 000

\* Number of children at least three and less than six

The test set B tests the boundary values of each boundary (€19 999, €20 000, three children, six children) and one value inside each boundary (€19 998, €20 001, four children). Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 3.2.2, page 35.

### NEW QUESTION # 53

In the recent past, you have learned that test automation just using capture & playback tooling, possibly enhanced with some test programming, has limitations. For the next banking project, that will be run using Agile methods, you want to implement a keyword-driven test automation approach. You have already started to define some high-level test cases for the account transfer user story:

TC 1 transfer € 150 from Lars to Ann, verify Ann's balance to be € 150

TC 2 transfer € 300 from Tim to Ann, verify Ann's balance to be € 450

In the context of implementing the keyword-driven test automation approach, which of the following activities should now be conducted by the Test Analyst?

- A. Work together with a developer to define a test automaton architecture
- B. Define keywords to be implemented, eg. check balance.  
B Design test navigation scripts.
- C. Select a tool to support keyword-driven testing

**Answer: B**

Explanation:

The activity that should now be conducted by the Test Analyst in the context of implementing the keyword- driven test automation approach is to define keywords to be implemented, e.g., check balance. A keyword- driven test automation approach is an approach that uses keywords to represent actions or data in a test case.

The keywords are then interpreted by a test execution tool or framework that performs the corresponding actions or data manipulation. The Test Analyst is responsible for defining the keywords that are relevant and meaningful for the test cases, such as check balance, transfer money, verify message, etc. Verified References: [ISTQB Certified Tester Advanced Level Test Analyst CTAL-TA], Section 6.1.1, page 73.
