

Valid Braindumps JN0-253 Files - Reliable JN0-253 Test Online

2023 Excellent Marketing-Cloud-Developer Valid Braindumps Files | Marketing-Cloud-Developer 100% Free Reliable Exam Sims

DOWNLOAD the newest ExamPDF Marketing-Cloud-Developer PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1UEV74DgHtzZ3jrn6X-NY55qXaGcH1>

A variety of ExamPDF Salesforce dumps are very helpful for the preparation to get assistance in this regard. It is designed exactly according to the exams curriculum. The use of test preparation exam questions helps them to practice thoroughly. Rely on material of the Exam Marketing-Cloud-Developer Braindumps online (nearly available) sample tests, and resource material available on our website. These free web sources are significant for Marketing-Cloud-Developer certification syllabus. Our website provides the sufficient material regarding Marketing-Cloud-Developer exam preparation.

In order to gain more competitive advantages in the interview, more and more people have been eager to obtain the Marketing-Cloud-Developer certification. They believe that passing certification is a manifestation of their ability, and they have been convinced that obtaining a Marketing-Cloud-Developer certification can help them find a better job. However, many people in real life are dismayed, because it is not easy to obtain. Our Marketing-Cloud-Developer Study Tool can help you obtain the Marketing-Cloud-Developer certification and even a powerful weapon for your interview. Our Marketing-Cloud-Developer qualification tool will help you gain recognition with true talents and better adapted to society. Now, I would like to give you a brief introduction in order to make you deepen your impression of our Marketing-Cloud-Developer test guides.

2025 Latest TestsDumps JN0-253 PDF Dumps and JN0-253 Exam Engine Free Share: https://drive.google.com/open?id=1719d_8uuHr4rNX2nw274NZrLPn6GkidO

For candidates who buy JN0-253 test materials online, they may care more about the privacy protection. We can ensure you that your personal information such as your name and email address will be protected well if you choose us. Once the order finishes, your personal information will be concealed. Furthermore, JN0-253 exam braindumps are high-quality, and we can help you pass the exam just one time. We promise that if you fail to pass the exam, we will give you full refund. If you have any questions for JN0-253 Exam Test materials, you can contact with us online or by email, we will give you reply as quickly as we can.

If you choose to register Juniper JN0-253 certification exam, you must try to get the JN0-253 certification. If you are apprehensive of defeat, you can select TestsDumps Juniper JN0-253 dumps. No matter what your qualification and your ability are, you can grasp these knowledge easily. TestsDumps Juniper JN0-253 Test Questions and answers is the latest. We provide you with free update for one year. After using it, you will make a difference.

100% Pass 2025 Perfect Juniper JN0-253: Valid Braindumps Mist AI, Associate (JNCIA-MistAI) Files

In order to pass the exam and fight for a brighter future, these people who want to change themselves need to put their ingenuity and can do spirit to work. More importantly, it is necessary for these people to choose the convenient and helpful JN0-253 study materials as their study tool in the next time. Because their time is not enough to prepare for the exam, and a lot of people have difficulty in preparing for the exam, so many people who want to pass the JN0-253 Exam and get the related certification in a short time have to pay more attention to the study materials.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which two statements about webhooks and APIs are correct? (Choose two.)

- A. 100% of all Juniper Mist objects are configurable using webhooks.
- B. There is an hourly limit to the number of API calls that an organization can have.
- C. There is an hourly limit to the number of webhooks that an organization can have.
- D. Webhooks are a push from Juniper Mist, and APIs are a pull by the client.

Answer: B,D

Explanation:

In the Juniper Mist Cloud architecture, both webhooks and APIs are key interfaces for automation, integration, and data exchange with third-party systems. While they both facilitate communication between Mist and external applications, they operate in opposite directions and serve distinct purposes.

According to the Juniper Mist API and Webhook Developer Guide:

* Webhooks are push-based notifications initiated by the Juniper Mist Cloud. When specific events occur (such as device disconnection, client onboarding, or alert generation), Mist sends structured JSON payloads to a preconfigured external URL endpoint.

* APIs (Application Programming Interfaces) are pull-based queries where an external client polls the Mist Cloud to retrieve or update data (e.g., inventory, configuration, or metrics).

Additionally, the Mist Cloud enforces rate limits on API calls to ensure platform stability and fair usage:

"API rate limits are applied on a per-organization basis to prevent excessive polling and to maintain consistent performance." In contrast, webhooks do not have a strict hourly quota because they are event-triggered rather than continuous requests.

Therefore:

* A is correct - Webhooks push, APIs pull.

* B is correct - There is an hourly API rate limit per organization.

Options C and D are incorrect because webhooks are event-based (not rate-limited hourly) and do not configure Mist objects directly—they only send notifications.

NEW QUESTION # 78

When browsing the Marvis Actions page, you notice that something has triggered the "AP Offline" Marvis Action. You click on that action.

What information will you see displayed? (Choose two.)

- A. recommended action
- B. resolved action
- C. Mist support ticket status
- D. Marvis Action status

Answer: A,D

Explanation:

When browsing the Marvis Actions page and you click on the "AP Online" Marvis Action, you will see:

Marvis Action Status: This indicates the current state of the action, whether it is in progress, resolved, or another status.

Recommended Action: Marvis will provide a suggested course of action to resolve the issue. This could include steps like configuration changes or other remedial actions.

NEW QUESTION # 79

Which protocol does Mist cloud use to send and receive data to connected access points?

- A. MQTT
- **B. HTTPS**
- C. PPTP
- D. SSH

Answer: B

Explanation:

Mist Cloud Communication Protocol: The Mist cloud platform uses HTTPS (Hypertext Transfer Protocol Secure) to communicate with connected access points. This ensures that the data sent and received is encrypted and secure, adhering to modern security standards (Juniper Networks).

Security and Reliability: Using HTTPS provides a secure channel over which configuration changes, updates, and monitoring data can be safely transmitted between the Mist cloud and the access points. This protocol is widely accepted and trusted for secure communications over the internet.

NEW QUESTION # 80

How are Mist Alerts sent?

- **A. using e-mail**
- B. using a text message
- C. using Slack
- D. using Skype

Answer: A

NEW QUESTION # 81

Which statement about microservices is correct?

- A. Microservices are designed to be dependent on each other to ensure that if one process fails, the remaining processes will not continue to operate.
- B. Microservices are developed as a suite of applications and rely on developers to deliver updates to the entire suite at once.
- C. Microservices must share a common database to ensure data integrity.
- **D. Microservices communicate with each other using APIs.**

Answer: D

Explanation:

The Juniper Mist Cloud platform is built on a microservices-based architecture, where individual software components perform specific functions and communicate using well-defined Application Programming Interfaces (APIs).

According to the Juniper Mist Cloud Architecture and Operations Guide:

"Microservices communicate through secure APIs, allowing independent services to interact seamlessly while maintaining modularity and isolation." This architectural design provides major operational benefits, including:

- * Independent scalability- each service can scale based on workload demand.
- * Fault isolation- failures in one service do not affect others.
- * Continuous deployment- updates can be made to one service without impacting the rest of the platform.

Incorrect options:

- * B: Juniper Mist microservices are independently updated, not deployed as one suite.
- * C: They are independent, not dependent on one another.
- * D: Each microservice maintains its own data model; they do not rely on a single shared database.

Thus, the correct answer is A. Microservices communicate with each other using APIs.
