SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q44-Q49):

NEW QUESTION # 44

(What are the main categories of using AI in Cloud ERP? Note: There are 2 correct answers to this question.)

- A. Process knowledge
- B. Profitability optimization
- C. Productivity and efficiency
- D. Process-related decision optimization

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: The main categories of using AI in Cloud ERP are productivity and efficiency, which focus on automating tasks and streamlining workflows, and process-related decision optimization, which involves leveraging AI for better decision-making and outcome predictions in business processes.

Exact extracts supporting this:

"Challenges and benefits of Artificial Intelligence in Cloud ERP can be divided into two main categories: Process-related decision optimization; Productivity and efficiency."learning.sap.com

"These can be divided into two main categories: Process-related decision optimization."learning.sap.com (Implying the second as productivity and efficiency from context.) Other options are incorrect because:

Option C: Process knowledge is not identified as a main category; AI embeds knowledge but categories focus on optimization and efficiency.

Option D: Profitability optimization is a potential outcome but not a primary category; emphasis is on decision and productivity aspects.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From the SAP Learning course "Positioning SAP Business AI," unit "Summarizing Key Solutions of Business AI," and "Understanding SAP Business AI for SAP S/4HANA Cloud," which categorize AI usage in Cloud ERP as decision optimization and productivity/efficiency, supporting positioning within the SAP Business Suite per C_BCBAI_2502 materials.

NEW QUESTION # 45

Which SAP module focuses on workplace safety and environmental compliance? Please choose the correct answer.

- A. SAP Environment, Health, and Safety (EHS)
- B. SAP Business Network
- C. SAP Financial Closing Cockpit
- D. SAP Predictive Analytics

Answer: A

Explanation:

SAP Environment, Health, and Safety (EHS) is the dedicated module for managing workplace safety and environmental compliance, ensuring organizations meet regulatory and sustainability standards. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.

SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing workplace safety, environmental compliance, and sustainability initiatives. It helps organizations comply with global regulations, ensure safe working conditions, and track environmental performance." SAP EHS enables companies to "monitor workplace incidents, manage safety protocols, and report on environmental compliance," such as emissions and waste management, to meet regulatory requirements. For example, it supports "tracking and reporting environmental data" to ensure adherence to standards, aligning with SAP's sustainability-focused solutions.

The incorrect options are unrelated to workplace safety and environmental compliance. SAP Business Network focuses on supplier collaboration and procurement, not safety or compliance. SAP Financial Closing Cockpit is used for financial reporting, not environmental or safety management. SAP Predictive Analytics supports forecasting and trend analysis, not compliance. SAP EHS is the clear choice for this purpose, as confirmed by its role in SAP's sustainability portfolio.

NEW QUESTION # 46

What is the role of SAP AI Core in Business AI solutions?

Please choose the correct answer.

Response:

- A. It is used for HR management exclusively.

- B. It is a hardware-based AI computing solution.
