## Other SAP C-BCBAI-2502 Exam Key Questions

TestkingPDF is aware of your busy routine; therefore, it has made the SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C-BCBAI-2502 dumps format to facilitate you to prepare for the SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite C-BCBAI-2502 exam. We adhere strictly to the syllabus set by SAP C-BCBAI-2502 Certification Exam. What will make your C-BCBAI-2502 test preparation easy is its compatibility with all devices such as PCs, tablets, laptops, and androids.

## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q27-Q32):

### NEW QUESTION # 27

Which SAP AI-powered tool enhances financial forecasting accuracy?

Please choose the correct answer.

Response:

- A. SAP SuccessFactors
- **B. SAP Predictive Analytics**
- C. SAP AI Business Services
- D. SAP Intelligent Robotic Process Automation

**Answer: B**

### NEW QUESTION # 28

What are the benefits of SAP AI-driven predictive analytics?

There are 3 correct answers to this question.

Response:

- **A. Future trend forecasting**
- **B. Automated anomaly detection**
- C. Increased manual data entry
- D. Manual invoice processing
- **E. Real-time decision-making insights**

**Answer: A,B,E**

### NEW QUESTION # 29

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note:

There are 2 correct answers to this question.

- **A. SOAP**
- B. RFC
- C. Doc
- **D. OData**

**Answer: A,D**

Explanation:

SAP recommends specific API types to achieve clean core integrations, ensuring extensibility and maintainability in cloud-based SAP systems. The correct answers are SOAP and OData, as these are explicitly documented as preferred API types for clean core

integrations.

SAP documentation explains: "To achieve clean core integrations in SAP S/4HANA Cloud and other cloud solutions, SAP recommends using modern API types such as OData and SOAP for seamless connectivity and extensibility." OData (Open Data Protocol) is widely used for "REST-based integrations," enabling

"standardized, scalable access to SAP data and processes" in solutions like SAP S/4HANA Cloud. SOAP (Simple Object Access Protocol) is recommended for "secure, reliable integrations," particularly in scenarios requiring structured data exchange, such as financial transactions. These API types support SAP's clean core strategy by "minimizing custom code and ensuring upgradability." The incorrect options-RFC and Doc-are not recommended for clean core integrations. RFC (Remote Function Call) is a legacy protocol, less suitable for modern cloud architectures due to its complexity and lack of standardization. Doc is not a recognized API type in SAP's integration framework. SAP's emphasis on clean core principles, as seen in SAP Business Technology Platform integrations, confirms the preference for SOAP and OData.

### NEW QUESTION # 30

(What are some potential benefits of using SAP Business AI in finance? Note: There are 3 correct answers to this question.)

- A. Simplify error resolution
- B. Enforce compliance
- C. Reduce sales outstanding
- D. Generate creative accounting solutions
- E. Guard against fraud

**Answer: A,B,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: SAP Business AI in finance provides benefits such as enforcing compliance through risk management and governance, guarding against fraud via anomaly detection, and simplifying error resolution with intelligent guidance in processes like invoice matching and payment clarification. These capabilities enhance accuracy, reduce risks, and improve operational efficiency in financial operations.

Exact extracts supporting this:

Enforce compliance: "With SAP AI-powered governance, compliance, and risk management solutions, finance departments can identify and respond to risks as they arise."learning.sap.com "Optimize working capital, manage risk, ensure compliance, and grow revenue."sap.com Guard against fraud: "AI-assisted anomaly detection to protect the business against fraud."learning.sap.com "Reduce revenue losses due to fraud using AI with SAP Business Integrity Screening for SAP S/4HANA Cloud Private Edition."sap.com Simplify error resolution: "Intelligent guidance to simplify error resolution."learning.sap.com "Eliminate manual payment clarifications, reducing accounts receivable matching effort by 71% with AI-powered matching and payment advice extraction."sap.com Other options are incorrect because:

Option A: SAP Business AI focuses on reliable, data-grounded solutions rather than "creative" accounting, which could imply non-compliant or unethical practices.

Option D: While AI optimizes working capital, reducing days sales outstanding (DSO) is more directly associated with cash application automation, but the primary benefits highlighted are compliance, fraud protection, and error simplification; DSO reduction is a secondary outcome.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Sourced from the SAP Learning Journey "Discovering New AI Capabilities for SAP Finance" and the SAP product page for "SAP Business AI - Artificial Intelligence for ERP & Finance." These emphasize AI's role in compliance, fraud detection, and error resolution within financial processes, as aligned with C\_BCBAI\_2502 certification materials.

### NEW QUESTION # 31

Which SAP AI solutions help businesses create personalized marketing campaigns?

There are 3 correct answers to this question.

Response:

- A. SAP Blockchain for Business
- B. SAP Conversational AI
- C. SAP Predictive Analytics
- D. SAP AI for Marketing (SAP Customer Experience)
- E. SAP Business Warehouse

**Answer: B,C,D**
