All incomprehensible issues will be small problems and all contents of the C-BCBDC-2505 Exam Questions will be printed on your minds. And you will pass the exam easily.

## SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q36-Q41):

### NEW QUESTION # 36

A data analyst needs to find existing data assets within the organization, understand their structure, and determine their relevance for a new project. Which tools in SAP Business Data Cloud will assist in this task?

There are 3 correct answers to this question.

Response:

- A. Data Monitor
- **B. Data Builder**
- C. Data Marketplace
- **D. Data Catalog**
- **E. Data Quality Dashboard**

**Answer: B,D,E**

### NEW QUESTION # 37

What is the purpose of SAP Datasphere in the context of SAP Business Data Cloud?

Please choose the correct answer.

Response:

- A. To store data to create a data warehouse
- B. To transfer data to SAP Databricks for machine learning processing
- C. To extract data from the SAP source systems
- **D. To add semantically rich models to prepare data for analysis**

**Answer: D**

### NEW QUESTION # 38

Which integration scenarios of SAP BW with SAP Business Data Cloud are supported?

There are 2 correct answers to this question.

Response:

- A. Using SAP BW/4HANA Cloud, private edition queries as source for SAP Business Data Cloud Intelligent Applications.
- B. Extract data from legacy ECC systems through SAP Datasphere, SAP BW bridge.
- C. Onboarding SAP BW 7.5 Cloud, private edition queries as SAP Business Data Cloud Analytical Models.
- D. Provisioning Data Products from SAP BW/4HANA On-Premise Infoproviders.

**Answer: B,C**

#### NEW QUESTION # 39

Which of the following can you do with an SAP Datasphere Data Flow? Note: There are 3 correct answers to this question.

- A. Use a Python script for data transformation.
- B. Delete records from a target table.
- C. Write data to a table in a different SAP Datasphere tenant.
- D. Integrate data from different sources into one table.
- E. Fill different target tables in parallel.

**Answer: A,D,E**

Explanation:

An SAP Datasphere Data Flow is a highly versatile and powerful tool for data integration, transformation, and loading. With a Data Flow, you can effectively integrate data from different sources into one table (B). This is a fundamental capability, allowing you to combine data from various tables, views, or even external connections, apply transformations, and consolidate it into a single target table. Another advanced capability is to fill different target tables in parallel (D). Data Flows are designed to handle complex scenarios efficiently, and this parallelism optimizes performance when you need to populate multiple destination tables simultaneously from a single flow. Furthermore, Data Flows support extensibility, allowing you to use a Python script for data transformation (E). This enables advanced, custom data manipulation logic that might not be available through standard graphical operations, providing immense flexibility for complex business rules. Writing data to a different Datasphere tenant (A) is not a direct capability of a Data Flow, and deleting records from a target table (C) is typically handled via specific operations within the target table's management or through SQL scripts rather than a standard data flow write operation.

#### NEW QUESTION # 40

You want to create a story with charts and need a data source to populate your charts with data. Which option can be used as a data source?

There are 2 correct answers to this question.

Response:

- A. Cube
- B. InfoProvider
- C. Dataset
- D. Model

**Answer: C,D**

#### NEW QUESTION # 41

.....
