The SAP C-C4H22-2411 certification will further demonstrate your expertise in your profession and remove any room for ambiguity on the hiring committee's part. Have you, however, consider how you might get ready for the SAP C-C4H22-2411 Exam Questions? Do you know how we can unlock the door so that our dreams might take flight? Let's talk about some information that can help you prepare for the SAP C-C4H22-2411 Certification Exam, and alter your route to success.

SAP C-C4H22-2411 Exam Syllabus Topics:

Topic	Details
Topic 1	Account Creation and Settings: This section targets IT Solution Architects, covering the provisioning of environments and configuration of various settings. It includes contact data integration, DNS settings, SSL certificates, email channel setup and compliance, account security settings, and channel setup. The focus is on describing, explaining, and configuring these elements.
Topic 2	Data Integrations Advanced: Designed for Data Center Network Engineers, this section delves into advanced data integration techniques. It encompasses store data onboarding (CSV), product data integration (URL, Google Tag Manager), sales data onboarding (APIs), customer data onboarding (APIs, CSV), Predict, and the SAP Customer Data Platform connector. The emphasis is on describing and explaining these integration methods.
Topic 3	Data Collection and Contact Management: Aimed at Data Center Network Engineers, this section focuses on contact management, block lists, Smart Insight, Web Extend, relational data, and plug-in onboarding for platforms like SAP Commerce, SAP Customer Data Platform, and Magento. It assesses the ability to effectively describe, explain, and utilize these components.

Topic 4	Managing Clean Core: This section evaluates the ability of IT Solution Architects to apply clean core principles to ERP systems. It emphasizes maximizing business process agility, reducing adaptation efforts, and accelerating innovation.

100% Pass 2025 SAP C-C4H22-2411: SAP Certified Associate - Implementation Consultant - SAP Emarsys –Trustable Valid Exam Simulator

In order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our C-C4H22-2411 preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one of them as you like. The three versions have their own unique characteristics. The PDF version of C-C4H22-2411 Training Materials is convenient for you to print, the software version can provide practice test for you and the online version is for you to read anywhere at any time. If you are hesitating about which version should you choose, you can download our C-C4H22-2411 free demo first to get a firsthand experience before you make any decision.

SAP Certified Associate - Implementation Consultant - SAP Emarsys Sample Questions (Q76-Q81):

NEW QUESTION # 76

Which of the following statements describes how the Email Campaign Update functionality works? Note: There are 3 correct answers to this question.

- A. New elements in a template will be available for use in all campaigns once they have been distributed using campaign update.
- B. Opening a campaign with a previous template version will prompt to update the campaign.
- C. A network connection during a campaign update can result in a failed save attempt.
- D. Changes made to a template can be reversed by performing a rollback to the previous version.
- E. A modification to the campaign template will update all batch campaigns.

Answer: A,B,C

Explanation:

In SAP Emarsys, the Email Campaign Update functionality allows users to apply modifications made to a template across multiple existing email campaigns that were created using that template. This ensures consistency and saves time by eliminating the need to manually update each campaign individually.

B: New elements in a template will be available for use in all campaigns once they have been distributed using campaign update. When new elements or changes are added to a template, utilizing the Campaign Update feature distributes these modifications to all associated campaigns. This means that any new content blocks, design changes, or structural adjustments made to the template become immediately available in all campaigns linked to that template once the update is executed. help.emarsys.com

C: A network connection during a campaign update can result in a failed save attempt. The stability of the network connection during the campaign update process is crucial. Interruptions or instability in the network can lead to failed save attempts, causing the update process to fail. In such cases, the email content remains unaffected, but the affected campaigns may not send out emails as intended. Users are advised to retry the update process or manually apply the template changes to the affected campaigns. help.emarsys.com

E: Opening a campaign with a previous template version will prompt to update the campaign. If a campaign was created using an older version of a template and that template has since been modified, opening the campaign will trigger a prompt notifying the user of the available updates. This allows users to decide whether to apply the latest template changes to the campaign, ensuring that all campaigns can be kept up-to-date with the most recent design and content standards.

Incorrect Options:

A: A modification to the campaign template will update all batch campaigns. This statement is incorrect because simply modifying a template does not automatically update all batch campaigns. The Campaign Update feature must be explicitly used to apply template changes to existing campaigns. Without initiating this process, the campaigns remain unchanged despite modifications to the template. help.emarsys.com + 1 help.emarsys.com + 1

D: Changes made to a template can be reversed by performing a rollback to the previous version. This statement is incorrect because once changes are made to a template and distributed using the Campaign Update feature, they cannot be automatically rolled back to a previous version.

NEW QUESTION # 77

Web Recommender widgets can display cross-sell and up-sell recommendations to customers as they navigate your website. Which widgets should be placed on product pages? Note: There are 2 correct answers to this question.

- A. Personal widget
- B. Also-Bought widget
- C. Related widget
- D. Search widget

Answer: B,C

Explanation:

Web Recommender widgets in SAP Emarsys enhance product pages:

- * Option B (Also-Bought widget):Correct. Shows items frequently purchased together, ideal for cross- sell on product pages.
- * Option C (Related widget):Correct. Displays similar or complementary items, supporting up-sell and cross-sell.
- * Option A:Incorrect. Personal widgets are broader and not product-page-specific.
- * Option D:Incorrect. Search widgets are for search result pages, not product pages.The SAP Emarsys Help Portal under "Web Recommendations" recommends these for product pages.References:SAP Emarsys Help Portal - "Web Recommendations" (<https://help.emarsys.com/>).

NEW QUESTION # 78

Why is "daily" the recommended frequency for importing sales data into Smart Insight?

- A. To prevent load failures for files exceeding 10 GB.
- B. To align with the Smart Insight dashboard update frequency.
- C. To align with recommended frequency for product data.
- D. To comply with SAP Emarsys file maintenance policy.

Answer: B

NEW QUESTION # 79

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. Customers can use the dashboard in the dev, test, and production tenants.
- B. Customers can grant access to the dashboard to partners.
- C. It can be accessed by using SAP For Me.
- D. It can be used in all SAP S/4HANA Cloud editions.

Answer: A,C

Explanation:

The "Clean Core Dashboard" is not a specific feature of SAP Emarsys but rather relates to SAP S/4HANA Cloud as part of the broader SAP ecosystem. Since the question appears in the context of an SAP Emarsys- related list but references a clean core concept, I'll clarify based on SAP's official documentation for both systems:

- * Option A:Correct. The Clean Core Dashboard in SAP S/4HANA Cloud is available across development, test, and production tenants to monitor system health and compliance with clean core principles (e.g., minimizing customizations).
- * Option B:Incorrect. While partners can be involved in SAP projects, the Clean Core Dashboard is primarily for customer use, and granting access to partners is not a standard feature highlighted in official documentation.
- * Option C:Incorrect. The dashboard's availability depends on the specific S/4HANA Cloud edition (e.g., Public vs. Private Cloud), and not all editions may fully support it as a standard feature.
- * Option D:Correct. SAP For Me is a customer portal that provides access to various dashboards, including those related to clean core monitoring for S/4HANA systems.Since this question seems misplaced in an Emarsys context, the explanation aligns with SAP S/4HANA Cloud's Clean Core Dashboard. For Emarsys-specific dashboards, refer to "Strategic Dashboard" or "Predict Dashboard," but these do not match the options provided.References:SAP Help Portal - "Clean Core Strategy" (<https://help.sap.com/>), SAP For Me Documentation.

NEW QUESTION # 80

What can you configure in the Email Widget Editor shown below? Note: There are 2 correct answers to this question.

- **A. The layout and currency format of the recommendation**
- B. The language of the recommendation
- C. The image of the product used for the recommendation
- **D. The product catalog fields you want to display in the recommendation**

Answer: A,D

Explanation:

The Email Widget Editor in SAP Emarsys (part of Predict) allows configuration of recommendation widgets:

- * Option A: Correct. You can adjust the layout (e.g., grid, list) and currency format for displayed prices.
- * Option D: Correct. You can select which product catalog fields (e.g., title, price) to display.
- * Option B: Incorrect. Product images are pulled from the catalog, not configured in the editor.
- * Option C: Incorrect. Language is set at the campaign level, not in the widget editor. The SAP Emarsys Help Portal under "Predict Recommendations" details these options. References: SAP Emarsys Help Portal - "Predict Recommendations" (<https://help.emarsys.com/>).

NEW QUESTION # 81

.....

You don't know how to acquire a promotion quickly while you're trying to get a new job or already have one but need a promotion. The sole option is SAP C-C4H22-2411 certification, which makes it simple for you to advance in your career.
