C-S4CPB-2502 Pass Guarantee | Practice C-S4CPB-2502 Test

Generally speaking, every candidate wants to pass the exam just one time. C-S4CPB-2502 learning materials of us can do that for you. Since we have a professional team to collect and research the latest information for the exam, and therefore the quality can be guaranteed. We offer you free demo for C-S4CPB-2502 Exam Materials to have a try, so that you can know what the complete version is like. Besides, we also pass guarantee and money back guarantee, and if you fail to pass the exam after using C-S4CPB-2502 exam materials of us, we will give you refund.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q57-Q62):

NEW QUESTION # 57

Which of the following requirements need to be documented in SAP Cloud ALM during the Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. A configuration value
- **B. A business role restriction**
- C. A process flow diagram
- **D. An SAP Fiori app customization**

Answer: B,D

NEW QUESTION # 58

You are recording actions for a custom process step in a test automate

When do you press the "Read" button on the recording panel? Note: There are 2 correct answers to this question.

- A. To capture an error message on the screen that can be used later.
- **B. To capture text in a message screen that can be used for data binding later.**
- C. To capture a static label on the screen that should be checked during test execution.
- **D. To capture a value in a text field that should be stored as a variable.**

Answer: B,D

Explanation:

When you are recording actions for a custom process step in a test automate, you press the "Read" button on the recording panel in the following situations:

* To capture a value in a text field that should be stored as a variable. This allows you to reuse the value in other steps or test cases, or to compare it with an expected value¹.

* To capture text in a message screen that can be used for data binding later. This allows you to extract data from the message screen and use it as an input for another step or test case².

You do not press the "Read" button to capture an error message or a static label on the screen, as these are not values that need to be stored or used later. Instead, you can use the "Check" button to verify that the error message or the label is displayed as expected³. NEW QUESTION # 59

In which application can you see the available business context capacity remaining for extension items?

- **A. Extensibility Cockpit app**
- B. Extensibility Inventory app
- C. Custom Reusable Elements app
- D. Extensibility Explorer app

Answer: A

NEW QUESTION # 60

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Explore
- **B. Realize**
- C. Prepare
- D. Deploy

Answer: B

Explanation:

The SAP Activate methodology outlines the phases for implementing SAP S/4HANA Cloud Public Edition.

One crucial phase is the 'Explore' phase. During this phase, consultants work closely with the business to understand its processes and requirements through Fit-to-Standard workshops. These workshops are designed to identify the best fit of the standard SAP

S/4HANA processes with the business's needs. It's a collaborative effort to explore the capabilities of SAP S/4HANA Cloud and configure the business processes accordingly.

This phase is fundamental in ensuring that the solution is tailored to meet the specific needs of the business, setting the foundation for a successful implementation.

NEW QUESTION # 61

An SAP Fiori app isn't displaying on the SAP Fiori Launchpad even though the business role granting permission to the app is correctly assigned to the user.

How would you troubleshoot? Note: There are 3 correct answers to this question

- **A. Check the business catalogues assigned to the role.**
- B. Check the business role template.
- C. Check the Role Maintenance app.
- **D. Check the space and page(s) assigned to the role.**
- **E. Check the restrictions for the role.**

Answer: A,D,E

Explanation:

When an SAP Fiori app isn't displaying on the SAP Fiori Launchpad despite the user having the correct business role, several aspects need to be checked to troubleshoot the issue effectively:

* Check the restrictions for the role: It's essential to verify if there are any restrictions applied to the role that might prevent the app from being displayed. Restrictions can be based on various factors such as geographic location, department, or specific user attributes.

* Check the business catalogues assigned to the role: Business catalogues in SAP Fiori contain groups of apps related to specific business functions. If the necessary business catalogue is not assigned to the role, the app will not appear on the SAP Fiori Launchpad. Ensuring the correct assignment of catalogues is crucial for app visibility.

* Check the space and page(s) assigned to the role: With the introduction of spaces and pages in the SAP Fiori Launchpad, it's vital to ensure that the relevant space and page that should display the app are correctly assigned to the user's role. Spaces are higher-level groupings, while pages within those spaces contain the actual apps.

NEW QUESTION # 62

.....

SAP C-S4CPB-2502 exam torrent is famous for instant download. You will receive downloading link and password within ten minutes, and if you don't receive, just contact us, we will check for you.
