SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q65-Q70):

NEW QUESTION # 65

Which activities can you complete in the Maintain Business Roles SAP Fiori app? Note: There are 2 correct answers to this question.

- A. Assign business catalogs to a business role
- B. Maintain restrictions
- C. Assign PFCG profiles to a business role
- D. Maintain technical catalogs

Answer: A,B

Explanation:

The Maintain Business Roles SAP Fiori app is used to manage business roles in SAP S/4HANA Cloud Public Edition, ensuring users have appropriate access to applications and data.

* Option A: Assign business catalogs to a business role Correct. Business catalogs group applications and are assigned to business roles to grant access. The SAP S/4HANA Cloud Security Guide states, "In the Maintain Business Roles app, administrators can assign business catalogs to roles to define the scope of applications available to users."

* Option B: Maintain restrictions Correct. Restrictions in business roles control data access (e.g., company code or plant). The SAP Fiori Launchpad Administration Guide notes, "The Maintain Business Roles app allows administrators to define and maintain restrictions to limit data access within a role."

* Option C: Maintain technical catalogs Incorrect. Technical catalogs are used internally by SAP and are not managed through the Maintain Business Roles app. The SAP Security Guide clarifies, "Technical catalogs are system-managed and not editable via the Maintain Business Roles app."

* Option D: Assign PFCG profiles to a business role Incorrect. PFCG profiles are used in on-premise SAP systems, not in SAP S/4HANA Cloud Public Edition, which uses cloud-based business roles. The SAP S/4HANA Cloud Study Guide explains, "Business roles in the cloud replace traditional PFCG profiles, and the Maintain Business Roles app does not support PFCG assignments." Extract from Official Documentation:

* SAP S/4HANA Cloud Security Guide (<https://help.sap.com>): "The Maintain Business Roles app enables administrators to assign business catalogs and define restrictions to control application and data access for users."

* SAP Fiori Launchpad Administration Guide: "Restrictions in business roles are maintained through the Maintain Business Roles app to ensure fine-grained access control." Additional Context:

The Maintain Business Roles app is a critical tool for security administration, aligning with SAP's cloud security model that emphasizes business roles and catalogs over traditional PFCG profiles.

:

SAP Help Portal: SAP S/4HANA Cloud Security Guide (<https://help.sap.com>).

SAP Fiori Launchpad Administration Guide: Details role management.

SAP S/4HANA Cloud Public Edition Study Guide: Explains cloud security concepts.

NEW QUESTION # 66

What have SAP S/4HANA Cloud Business Workflows been designed for? Note: There are 3 correct answers to this question.

- A. To create cross-product workflow procedures
- B. To create business processes with a high number of people involved in a pre-defined sequence
- C. To create standard procedures from SAP Signavio Process Navigator
- D. To create complex, repeated work processes with iterative cycles
- E. To create very simple release or approval procedures

Answer: B,D,E

Explanation:

SAP S/4HANA Cloud Business Workflows are designed to automate and streamline business processes, supporting various workflow scenarios in the cloud environment.

* Option A: To create standard procedures from SAP Signavio Process Navigator Incorrect. SAP Signavio Process Navigator provides process models, but workflows are not directly created from it.

The SAP Workflow Guide states, "Business Workflows are configured in SAP S/4HANA Cloud, not derived from Signavio Process Navigator."

* Option B: To create business processes with a high number of people involved in a pre-defined sequence. Correct. Workflows are ideal for processes involving multiple stakeholders in a structured sequence. The SAP S/4HANA Cloud Workflow Guide notes, "Business Workflows support processes with multiple participants, ensuring tasks are executed in a predefined order."

* Option C: To create very simple release or approval procedures. Correct. Workflows are used for simple approval processes, such as purchase order approvals. The SAP Workflow Guide confirms, "SAP S

/4HANA Cloud Business Workflows enable simple release and approval procedures with minimal configuration."

* Option D: To create complex, repeated work processes with iterative cycles. Correct. Workflows support complex, repetitive processes with iterative steps. The SAP S/4HANA Cloud Implementation Guide states, "Business Workflows are designed for complex, iterative processes that require repeated execution and automation."

* Option E: To create cross-product workflow procedures. Incorrect. While workflows can integrate with other SAP products via SAP BTP, they are primarily designed for SAP S/4HANA Cloud processes. The SAP Workflow Guide clarifies, "Cross-product workflows require additional integration, not a core feature of S/4HANA Cloud workflows." Extract from Official Documentation:

* SAP S/4HANA Cloud Workflow Guide (SAP Help Portal, <https://help.sap.com>): "SAP S/4HANA Cloud Business Workflows are designed to automate simple approval processes, complex iterative workflows, and processes involving multiple participants in a predefined sequence."

* SAP S/4HANA Cloud Implementation Guide: "Business Workflows support a range of scenarios, from simple approvals to complex, repeated processes with iterative cycles, enhancing process efficiency." Additional Context:

Business Workflows enhance automation and collaboration in SAP S/4HANA Cloud, aligning with the cloud's focus on standardized, scalable processes. They are configured using tools like the Workflow Builder in the Fiori Launchpad.

:

SAP Help Portal: SAP S/4HANA Cloud Workflow Guide (<https://help.sap.com>).

SAP S/4HANA Cloud Implementation Guide: Details workflow capabilities.

SAP Activate Methodology: Includes workflow configuration.

SAP S/4HANA Cloud Study Guide: Explains workflow use cases.

NEW QUESTION # 67

How do you define the term Organizational Change Management?

- A. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a current to a future state with focus on the added value for the impacted users.
- **B. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a current to a future state with intended business benefits.**
- C. It is a comprehensive, cyclic, and structured approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with focus on the added value for the impacted users.
- D. It is a selective, singular, and intuitive approach for transitioning individuals, groups, and organizations from a traditional to an agile organizational set-up with intended business benefits.

Answer: B

NEW QUESTION # 68

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

- **A. Related app-specific solution design guidelines**
- **B. Installation and configuration requirements for selected apps**
- C. Shortcut to the Quicksizer tool to estimate hardware requirements
- **D. Related app recommendations based on your usage profile**
- E. Shortcut to the Maintenance Planner tool to establish the technical update path

Answer: A,B,D

Explanation:

The SAP Fiori Apps Reference Library is a comprehensive resource for exploring and implementing Fiori apps in SAP S/4HANA Cloud Public Edition, providing detailed information to support app selection and configuration.

* Option A: Related app-specific solution design guidelines. Correct. The SAP Fiori Apps Reference Library includes solution design guidelines for specific apps, detailing their use cases and implementation considerations. The SAP Fiori Apps Reference Library Guide states, "The SAP Fiori Apps Reference Library provides app-specific solution design guidelines, outlining functionality, use cases, and implementation best practices."

* Option B: Shortcut to the Maintenance Planner tool to establish the technical update path Incorrect. The Maintenance Planner is a separate tool for planning system updates, not linked through the Fiori Apps Reference Library. The SAP S/4HANA Cloud Implementation Guidenotes, "The Maintenance Planner is accessed independently, not via the SAP Fiori Apps Reference Library."

* Option C: Installation and configuration requirements for selected apps Correct. The library details installation and configuration requirements for each Fiori app, ensuring proper setup. The SAP Fiori Apps Reference Library Guide explains, "For each Fiori app, the SAP Fiori Apps Reference Library provides detailed installation and configuration requirements, including prerequisites and settings."

* Option D: Shortcut to the Quicksizer tool to estimate hardware requirements Incorrect. The Quicksizer tool is used for sizing hardware and is not accessible through the Fiori Apps Reference Library. The SAP S/4HANA Cloud Study Guide clarifies, "The Quicksizer tool is a standalone resource for hardware sizing, not linked to the Fiori Apps Reference Library."

* Option E: Related app recommendations based on your usage profile Correct. The library offers recommendations for related apps based on usage patterns or roles. The SAP Fiori Apps Reference Library Guide confirms, "The SAP Fiori Apps Reference Library provides related app recommendations based on your usage profile, helping users discover relevant apps for their needs." Extract from Official Documentation:

* SAP Fiori Apps Reference Library Guide (SAP Help Portal, <https://help.sap.com>): "The SAP Fiori Apps Reference Library includes app-specific solution design guidelines, installation and configuration requirements, and related app recommendations based on usage profiles, supporting effective app selection and implementation."

* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>): "The Fiori Apps Reference Library provides comprehensive details on Fiori apps, including design guidelines, configuration requirements, and recommendations for related apps, enhancing user experience in SAP S/4HANA Cloud."

Additional Context:

The SAP Fiori Apps Reference Library is a critical resource for SAP S/4HANA Cloud Public Edition, enabling customers to explore, configure, and optimize Fiori apps. Its detailed guidelines and recommendations support the cloud's user-centric design, ensuring apps are tailored to business needs while maintaining standardization.

:

SAP Help Portal: SAP Fiori Apps Reference Library Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Fiori app resources.

SAP Fiori Documentation: Outlines library features.

NEW QUESTION # 69

What defines the organizational entities that are required in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. System consistency checks
- B. The selected deployment target
- C. The selected scope
- D. Added partner content

Answer: B,C

Explanation:

SAP Central Business Configuration (CBC) is a tool used to configure the organizational structure and scope for SAP S/4HANA Cloud Public Edition. The definition of organizational entities depends on specific inputs during the configuration process.

* Option A: The selected scope Correct. The selected scope determines which business processes and organizational entities (e.g., company codes, plants) are required. The scope defines the functional areas to be implemented, which directly influences the organizational structure configured in CBC. SAP's documentation on CBC emphasizes that scoping decisions drive the creation of organizational entities.

* Option B: The selected deployment target Correct. The deployment target (e.g., specific system or tenant) influences the configuration of organizational entities, as it defines where the configuration will be applied. CBC uses the deployment target to ensure that entities are aligned with the target system's requirements, as per SAP's implementation guidelines.

* Option C: Added partner content Incorrect. Partner content may enhance functionality but does not directly define the organizational entities required in CBC. Entities are primarily determined by scope and deployment decisions.

* Option D: System consistency checks Incorrect. System consistency checks validate configurations but do not define the organizational entities. They ensure that the configured entities are consistent with SAP standards.

:

SAP Central Business Configuration Documentation: Details the role of scope and deployment target in defining organizational entities (<https://help.sap.com>).

SAP S/4HANA Cloud Public Edition Implementation Guide: Explains CBC configuration processes.

SAP Activate Methodology: Highlights scoping and deployment as key configuration drivers.

NEW QUESTION # 70

.....

If you buy the C-S4PM-2504 study materials of us, we ensure you to pass the exam. Since the C-S4PM-2504 study materials have the quality and the accuracy, and it will help you pass exam just one time. Buying C-S4PM-2504 exam dumps are pass guaranteed and money back guaranteed for the failure. Furthermore, we choose international confirmation third party for payment for the C-S4PM-2504 Exam Dumps, therefore we can ensure you the safety of your account and your money. The refund money will return to your payment account.
