#### NEW QUESTION # 63

Based on your company policy, the hazardous product POISON should NOT be transported on means of transport TRUCK unless authorized by user A. How can you maintain the system reaction in the corresponding incompatibility definition used by user A? Note: There are 2 correct answers to this question.

- A. Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Incompatibility Must Not Be Violated

- B. Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Incompatibility is Ignored
- C. Automatic Violation: Incompatibility Is Ignored; Manual Violation: Warning If Incompatibility Is Violated
- D. Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Warning If Incompatibility Is Violated

**Answer: B,D**

Explanation:

In SAP S/4HANA Transportation Management, incompatibilities can be defined with different system reactions for automatic and manual planning to enforce restrictions, such as preventing the hazardous product POISON from being transported on a TRUCK unless authorized by user A. According to the SAP documentation:

\* Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Incompatibility is Ignored (B): This setting ensures that automatic planning strictly enforces the incompatibility (no POISON on TRUCK), but user A can manually override it during planning, allowing flexibility for authorized users.

\* Automatic Violation: Incompatibility Must Not Be Violated; Manual Violation: Warning If Incompatibility Is Violated (C): This setting also enforces the incompatibility in automatic planning but issues a warning during manual planning, allowing user A to proceed with authorization while being alerted to the violation.

The other options are incorrect:

\* A is too restrictive, as it prevents both automatic and manual violations, not allowing user A to authorize the transport.

\* D is too permissive, as it ignores the incompatibility in automatic planning, which violates the company policy.
