

Valid C1000-189 Practice Materials - Detail C1000-189 Explanation

In order to let you have a general idea about our C1000-189 study engine, we have prepared the free demo in our website. The contents in our free demo are part of the real materials in our C1000-189 learning dumps. I strongly believe that you can feel the sincerity and honesty of our company, since we are confident enough to give our customers a chance to test our C1000-189 Preparation materials for free before making their decision. and you will find out the unique charm of our C1000-189 actual exam.

Clients always wish that they can get immediate use after they buy our C1000-189 Test Questions because their time to get prepared for the exam is limited. Our C1000-189 test torrent won't let the client wait for too much time and the client will receive the mails in 5-10 minutes sent by our system. Then the client can log in and use our software to learn immediately. It saves the client's time.

>> Valid C1000-189 Practice Materials <<

Detail C1000-189 Explanation - C1000-189 Exam Torrent

Our products boost 3 versions and varied functions. The 3 versions include the PDF version, PC version, APP online version. You can use the version you like and which suits you most to learn our C1000-189 study materials. The 3 versions support different equipment and using method and boost their own merits and functions. For example, the PC version supports the computers with Window system and can stimulate the real exam. Our products also boost multiple functions which including the self-learning, self-evaluation, statistics report, timing and stimulation functions. Each function provides their own benefits to help the clients learn the C1000-189 Study Materials efficiently. For instance, the self-learning and self-evaluation functions can help the clients check their results of learning the C1000-189 study materials.

IBM Instana Observability v1.0.277 Administrator - Professional Sample Questions (Q47-Q52):

NEW QUESTION # 47

What happens if the same key is used in both global and alert-specific custom payload configurations in Instana?

- A. Both values are concatenated.
- B. The global value overrides the alert-specific value.
- C. The alert is canceled due to conflict.
- D. The alert-specific value overrides the global value.

Answer: D

Explanation:

IBM Instana documents the merge logic of custom payloads for alerts and global configurations very clearly. The rule states: "If the same key is defined in both a global custom payload and an alert-specific payload, the value from the alert-specific payload will override the global value for that key." This ensures alert context management is precise, enabling targeted incident response with the most relevant and high-priority data. There is no concatenation, and no alert cancellation or error is triggered as Instana resolves key

collisions silently by giving precedence to the more granular, context-specific setting (alert-level). This verified behavior guarantees custom alert events always contain relevant payloads, supporting accurate automated remediation or escalation.

NEW QUESTION # 48

What is mandatory to use Instana REST APIs?

- A. Cookie
- B. Python
- **C. Token**
- D. CURL

Answer: C

Explanation:

Access to Instana's REST API is secured using authorization tokens—an industry-standard best practice for API authentication and traceability. IBM documentation says: "A personal or team API token is required to authenticate REST API calls." Tokens serve as credentials embedded in HTTP headers on each request, providing both identity and access control for the API consumer. Tokens are mandatory; without a valid token, any API requests are denied with a 401 Unauthorized error, regardless of whether a tool (such as CURL) is used. Tokens can be scoped for individual users (personal tokens) or teams (team tokens), enabling granular tracking and revocation as part of enterprise security policies. API tokens are generated from the Instana UI under the profile or team section. Cookies and raw client libraries (e.g., Python) are not authentication methods for Instana APIs.

NEW QUESTION # 49

Which configuration file contains Instana server connection details for the host agent?

- A. `com.instana.agent.main.config.Agent.cfg`
- B. `com.instana.agent.main.sender.Backend.cfg`
- **C. `com.instana.agent.main.sender.Server.cfg`**
- D. `com.instana.agent.main.sender.File.cfg`

Answer: C

Explanation:

The primary configuration file specifying Instana server connection parameters for the host agent is `com.instana.agent.main.sender.Server.cfg`. The IBM documentation affirms: "The `Server.cfg` file inside the agent's configuration directory defines backend connection endpoints, ports, and security tokens to communicate with the Instana backend or cluster installation." This file is referenced on agent startup and dictates host-server routing, clustering, authentication, and TLS endpoints. Other config files control agent properties or log shipping, not backend connectivity. Editing `Server.cfg` is the recommended method for specifying on-premises, private cloud, or SaaS endpoints for all monitored agents.

NEW QUESTION # 50

What happens when multiple agent configuration files are created and put alongside the main configuration.yaml?

- **A. The configuration file is read in alphabetical order.**
- B. All configuration files are merged in alphabetical order.
- C. Only the first file is processed while other files are silently ignored.
- D. An error is thrown since only one configuration file is allowed at any time.

Answer: A

Explanation:

IBM Instana Observability's agent supports modularized configuration through multiple YAML configuration fragments within its configuration directory. As described in the documentation: "When multiple configuration files exist alongside the main `configuration.yaml`, the agent reads each in alphabetical order and applies configurations sequentially." This mechanism supports composable and layered configuration management, allowing base settings in `configuration.yaml` to be overridden or extended by secondary fragments. The key design principle is deterministic merge order—guaranteeing predictable configuration hierarchies across deployments. This method improves maintainability in large environments by facilitating separation of sensitive and technology-specific settings while maintaining a consistent merge process. IBM warns not to name multiple files with overlapping keys unless

intentional overrides are desired. The merge is additive and case-sensitive, processed lexicographically, providing administrators both flexibility and traceability for troubleshooting and auditing. There is no error generated when multiple files are present; rather, Instana agent gracefully integrates them during initialization, a behavior that promotes advanced configuration modularity for complex deployments.

NEW QUESTION # 51

What is the purpose of creating a custom service rule in Instana?

- A. To create a manual service configuration
- **B. To map services using existing meta-information of the infrastructure component**
- C. To set a global service name for all calls
- D. To apply the service.name tag of the infrastructure component

Answer: B

Explanation:

IBM Instana Observability enables users to create custom service rules to precisely associate telemetry with logical services using meta-information already present in infrastructure components. The documentation specifies: "Custom service rules enable mapping of discovered entities to meaningful service constructs, using labels, tags, or annotations present on infrastructure components." This supports the grouping and visualization of traffic/metrics for actual business workflows rather than default technical boundaries. By analyzing meta-data, such as Kubernetes labels, docker tags, or VM metadata, Instana automatically maps relevant requests and traces to the defined service names, improving observability and simplifying troubleshooting. Global service naming (A) and manual configuration (C) do not leverage infrastructure metadata and are not scalable in dynamic environments. Option D relies only on a service.name tag, missing broader meta-information mapping capabilities. The verified documentation supports answer B as the sole comprehensive approach for dynamic service discovery within Instana.

NEW QUESTION # 52

.....

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our C1000-189 experts deem it impossible to drop the exam, if you believe that you have learnt the contents of our C1000-189 study guide and have revised your learning through the C1000-189 Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our products and their indispensability for all those who want success without any second thought.

Detail C1000-189 Explanation: https://www.dumpkiller.com/C1000-189_braindumps.html

IBM Valid C1000-189 Practice Materials You will be asked a few interactive questions that will enable us to direct your feedback to the correct department, IBM Valid C1000-189 Practice Materials Certification Bundles include sets of exams required to achieve a certain certification, IBM Valid C1000-189 Practice Materials Intimate service and perfect after-sale service satisfy all users, IBM Valid C1000-189 Practice Materials The brochure will carry your unique "PROMO_CODE".

Drag the group into position in the center of the orange and brown sunflower, C1000-189 Good design is based on this, too, You will be asked a few interactive questions that will enable us to direct your feedback to the correct department.

C1000-189 Valid Test & C1000-189 Cert Material & C1000-189 Sure Pass Exam

Certification Bundles include sets of exams required to achieve a certain Valid C1000-189 Practice Materials certification, Intimate service and perfect after-sale service satisfy all users, The brochure will carry your unique "PROMO_CODE".

Our material include free Demo, you can go for free it of the C1000-189 Materials and make sure that the quality of our questions and answers serve you the best.
