Getting a SAP C_S4CFI_2408 trusted certification is a way to prove your expertise and show you that you are ready all the time to take the additional responsibilities. The ActualVCE C_S4CFI_2408 certification exam assists you to climb the corporate ladder easily and helps you to achieve your professional career objectives. With the ActualVCE C_S4CFI_2408 Certification Exam you can get industry prestige and a significant competitive advantage.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition, Financial Accounting Sample Questions (Q53-Q58):

NEW QUESTION # 53

How can you identify an asset number as a main asset number?

- A. By the prefix -1 after the asset number
- B. By the prefix -0 after the asset number
- C. By the description of the asset
- **D. By the lack of prefix for the asset**

Answer: D

Explanation:

Comprehensive and Detailed in Depth Explanation: In SAP S/4HANA Cloud, main asset numbers are distinguished from sub-assets.

* B: Correct. Main assets have no suffix/prefix; sub-assets append a suffix (e.g., -001).

* A, C, D: Incorrect. Prefixes or descriptions are not standard indicators. References: SAP Help Portal - "Asset Accounting Numbering."

NEW QUESTION # 54

You are recording actions for custom process steps in a test automate. When do you press the "Read" button on the recording panel?

Note: There are 2 correct answers to this question.

- **A. To capture a value in a text field that should be stored as a variable**
- B. To capture text in a message screen that can be used for data binding later
- **C. To capture a static label on the screen that should be checked during test execution**
- D. To capture an error message on the screen that can be used later

Answer: A,C

Explanation:

Comprehensive and Detailed in Depth Explanation: In SAP S/4HANA Cloud's Test Automation Tool (available via SAP Cloud ALM), the "Read" button is used during test script recording to capture screen elements for validation or variable assignment during automated test execution.

* Option A (To capture a static label on the screen that should be checked during test execution):

Correct. Static labels (e.g., field names or titles) are often captured to verify UI consistency or screen navigation during test runs. This ensures the test validates expected screen content.

* Option B (To capture a value in a text field that should be stored as a variable): Correct. The

"Read" function can extract dynamic values (e.g., an invoice number) from text fields, storing them as variables for use in subsequent steps, such as validations or inputs.

* Option C (To capture an error message on the screen that can be used later):Incorrect. While error messages can be validated, the "Read" button is not typically used for this; instead, assertions or specific error-handling steps are recorded separately.

* Option D (To capture text in a message screen that can be used for data binding later):Incorrect.

Message screens (e.g., pop-ups) are handled differently, often via specific actions like "Confirm" or

"Check Message," not the generic "Read" function.

NEW QUESTION # 55

In the Manage Fixed Assets app, assets that are created in the database but not activated or deactivated are displayed under which tab?

- A. Created
- B. Saved
- C. Draft
- D. Acquired

Answer: A

NEW QUESTION # 56

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. Business Driven Configuration Questionnaire
- B. SAP Cloud ALM Requirements app
- C. SAP Cloud ALM Processes app
- D. Availability and Dependencies of Solution Process Excel

Answer: A

Explanation:

Comprehensive and Detailed in Depth Explanation:Configuration values are gathered early in SAP CBC.

* A:Correct. BDCQ collects configuration inputs.

* B, C, D:Incorrect. These are tracking or reference tools.References:SAP Help Portal - "SAP Central Business Configuration."

NEW QUESTION # 57

Which dimension do you use to produce external financial statements based on cost-of-sales accounting?

- A. Segment
- B. Profit center
- C. Market segment
- D. Functional area

Answer: D

Explanation:

For producing external financial statements based on cost-of-sales accounting, the 'Functional area' dimension is used. Cost-of-sales accounting is an approach that matches the costs of products sold with the revenues generated from their sale, providing a more accurate representation of the profit for a specific period. The functional area dimension allows for the classification of expenses according to the functions within an organization, such as production, sales, or administration, making it a key dimension for cost-of-sales accounting. This classification helps in the preparation of income statements where expenses are categorized based on their function, which is essential for cost-of-sales accounting.
