## C\_THR92\_2505 Reasonable Exam Price - Reliable C\_THR92\_2505 Test Topics

Our C\_THR92\_2505 exam prep is elaborately compiled and highly efficiently, it will cost you less time and energy, because we shouldn't waste our money on some useless things. The passing rate and the hit rate are also very high, there are thousands of candidates choose to trust our C\_THR92\_2505 Guide Torrent and they have passed the exam. We provide with candidate so many guarantees that they can purchase our study materials no worries. The C\_THR92\_2505 exam prep we provide can help you realize your dream to pass exam and then own a C\_THR92\_2505 exam torrent.

## SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q39-Q44):

### NEW QUESTION # 39

User A schedules a report in Report Center Scheduler. What can user A achieve by enabling the Job Completion notification option for a scheduled job in the Report Center Scheduler?

- A. An e-mail is sent to the recipient of the report that the report distribution process is complete.
- B. An e-mail is sent to user A after the report distribution process is complete.
- C. A notification appears for user A on the home page after the report distribution process is complete.
- D. A notification appears for the recipient of the report on the home page after the report distribution process is complete.

**Answer: B**

Explanation:

\* Job Completion Notification:

\* When the Job Completion Notification is enabled for a scheduled job, the scheduling user (User A) receives an email notification once the report distribution process is complete.

### NEW QUESTION # 40

Within a Story, you create a query using the Basic User Information table. After you add the Proxy Information table, you notice that some of the basic information records are NO longer displayed in the preview. How do you adjust the query to return the missing records in the preview?

- A. Change the join type to Left Outer Join.
- B. Remove the related table and select and drag it from the Available Data section.
- C. Remove the related table and add it using the Show Related Tables command from the Action Menu.
- D. Change the join type to Inner Join.

**Answer: A**

Explanation:

\* Join Types in Queries:

\* Inner Join: Only returns rows where there is a match in both tables.

\* Left Outer Join: Returns all rows from the left table and matching rows from the right table, filling in NULLs where there is no match.

\* Scenario:

\* Adding the Proxy Information table creates a situation where some records from the Basic User Information table no longer match with Proxy Information.

\* Changing the join type to Left Outer Join ensures that all records from the Basic User Information table are included, regardless of matching Proxy Information.

\* Steps to Adjust Join Type:

\* Edit the query.

\* Locate the join between Basic User Information and Proxy Information tables.

\* Change the join type from Inner Join to Left Outer Join.

### NEW QUESTION # 41

An administrator creates a new MDF object for storing attachments related to an employee's dependents.

After uploading some test data, the administrator states they are unable to report on the new data with Advanced Reporting tool in a canvas report. The administrator is working for a client that has already had their system transitioned to Workforce Analytics on SAP HANA. How can the administrator quickly make the data available for reporting?

- A. Request a Metadata Refresh from SAP SuccessFactors Support.
- B. Use Refresh Analytics Permissions Tool.
- C. Use Purge Advanced Reporting Metadata Cache Tool.
- D. Use WFA on HANA Data Factory to rebuild the cube.

**Answer: C**

Explanation:

\* Refreshing Metadata Cache:

\* When new MDF objects or fields are added, the Advanced Reporting tool may not immediately reflect the changes.

\* Using the Purge Advanced Reporting Metadata Cache Tool ensures that the latest metadata is loaded into the reporting framework.

\* Quick and Effective Solution:

\* This method is faster than requesting support or rebuilding cubes and resolves most synchronization issues instantly.

### NEW QUESTION # 42

In Query Designer, you are trying to create a conditional expression to relabel a field. You create the following expression:

IF([User#Basic User Information#Gender] = "M" , "Male" : "Female") You received an error message saying the formula could NOT be computed. Which symbol in your expression is causing the error?

- A. ,
- B. "
- C. :
- D. #

**Answer: C**

Explanation:

\* Understanding the Query Designer Expression Syntax In SAP SuccessFactors People Analytics Query Designer, conditional expressions are used to transform or relabel fields based on logical conditions.

These expressions rely on specific syntax that must be adhered to strictly. The issue in this scenario arises from the use of an incorrect separator in the conditional statement.

\* Analyzing the Given Expression The expression provided:

IF([User#Basic User Information#Gender] = "M" , "Male" : "Female")

contains a colon (:) as the separator between "Male" and "Female". However, the correct syntax requires the use of a comma (,) instead of the colon.

\* Correct Syntax Format for Conditional Expressions The correct format for conditional expressions in SAP SuccessFactors People Analytics IF(Condition, Value\_if\_True, Value\_if\_False) Applying this to the provided example, the correct expression should be:

IF([User#Basic User Information#Gender] = "M", "Male", "Female")

\* Root Cause of the ErrorThe colon (:) is not recognized as a valid syntax separator in the Query Designer's conditional expression format. As a result, the formula cannot be computed, and an error is generated.

\* Resolving the IssueReplace the colon (:) with a comma (,), ensuring the conditional expression adheres to the correct syntax. The updated expression would look like this:

IF([User#Basic User Information#Gender] = "M", "Male", "Female")

\* ValidationOnce corrected, the expression can be tested in Query Designer to confirm it computes without errors and provides the expected output.

References and Documentation

\* SAP SuccessFactors People Analytics Reporting Guide: SAP Help Portal

\* Conditional Expressions in People Analytics: Official documentation and training materials available on openSAP

\* Query Designer Syntax Guidelines: Found in the SAP SuccessFactors People Analytics Query Designer User Guide.

Make sure to consult the above documentation for additional examples and syntax rules.

### NEW QUESTION # 43

What provisioning setting must you enable to allow customers to upload a custom BIRT template to a Table Report?

- A. Additional Adhoc Subdomain Schemas Configuration.
- B. Enable BIPublisher to BIRT Template Converter.
- C. Allow BIPublisher template upload.
- D. Enable Visual Publisher.

**Answer: C**

Explanation:

\* Enabling Custom BIRT Templates

\* To upload a custom BIRT template to a Table Report, the BIPublisher template upload setting must be enabled in Provisioning.

\* Why Other Options are Incorrect

\* B (Enable BIPublisher to BIRT Template Converter): Not necessary for template uploads.

\* C (Additional Adhoc Subdomain Schemas Configuration): Irrelevant for uploading templates.

\* D (Enable Visual Publisher): This setting is unrelated to BIRT templates.

References

\* SAP SuccessFactors Provisioning Guide

### NEW QUESTION # 44

.....

Our C\_THR92\_2505 practice materials are classified as three versions up to now. All these versions are popular and priced cheap with high quality and accuracy rate. They achieved academic maturity so that their quality far beyond other practice materials in the market with high effectiveness and more than 98 percent of former candidates who chose our C\_THR92\_2505 practice materials win the exam with their dream certificate. Our C\_THR92\_2505 practice materials made them enlightened and motivated to pass the exam within one week, which is true that someone did it always. The number is real proving of our C\_THR92\_2505 practice materials rather than spurious made-up lies.
