

Valid CDCS Exam Forum, CDCS Reliable Dumps Questions

BTW, DOWNLOAD part of Pass4training CDCS dumps from Cloud Storage: https://drive.google.com/open?id=1tEcSldZ14_xYt2aku8gq7sHl4wy_LM9r

A variety of Pass4training' EXIN dumps are very helpful for the preparation to get assistance in this regard. It is designed exactly according to the exams curriculum. The use of test preparation exam questions helps them to practice thoroughly. Rely on material of the Free CDCS Brindumps online (easily available) sample tests, and resource material available on our website. These free web sources are significant for CDCS certification syllabus. Our website provides the sufficient material regarding CDCS exam preparation.

Using free EXIN CDCS dumps is a great way to prepare for the exam. EXIN EPI Certified Data Centre Specialist CDCS dumps are updated regularly and contain an excellent course of action material. EXIN experts carefully design the dumps to help you pass the exam. If you want to be successful in your exam, you need to have a good understanding of the EXIN EPI Certified Data Centre Specialist CDCS Certification.

2025 Valid CDCS Exam Forum 100% Pass | Pass-Sure CDCS: EXIN EPI Certified Data Centre Specialist 100% Pass

In addition to the CDCS study materials, our company also focuses on the preparation and production of other learning materials. If you choose our CDCS study materials this time, I believe you will find our products unique and powerful. Then you don't have to spend extra time searching for information when you're facing other exams later, just choose us again. As long as you face problems with the exam, our company is confident to help you solve. Give our CDCS Study Materials a choice is to give you a chance to succeed.

EXIN CDCS Exam Syllabus Topics:

Topic	Details
Topic 1	Designing and Implementing a Data Centre: In this module, the exam assesses the knowledge of Exin data center professionals tasked with the design and implementation of data centers. Candidates will learn the key principles of creating an efficient data center layout, including considerations for scalability, redundancy, and security.
Topic 2	Data Centre Life Cycle and Standards: This section of the exam measures the skills of data center professionals and covers the various stages involved in the life cycle of a data center, from planning and design to implementation and decommissioning.
Topic 3	Data Centre Environmental Considerations and Efficiency: This section evaluates the proficiency of data center professionals in addressing environmental factors and promoting efficiency within data center operations. The target audience, including data center managers and engineers, will be tested on their ability to identify and implement measures that enhance energy efficiency, cooling management, and sustainable practices.

EXIN EPI Certified Data Centre Specialist Sample Questions (Q121-Q126):

NEW QUESTION # 121

A data center scores Rated-3 in mechanical, Rated-4 in electrical, and Rated-2 in architectural. What is the overall Rating of this data center when the Rating is based on the ANSI/TIA-942?

- A. Rated-4 since that is the highest rating received
- B. Depends on the Rating scored in telecommunications
- C. Rated-4 since electrical is more important than mechanical and architectural
- D. Rated-2 since that is the lowest rating received

Answer: D

Explanation:

According to ANSI/TIA-942 standards, the overall data center rating is determined by the lowest rating among all evaluated categories. Therefore, if a data center is rated 2 in architectural, despite being rated higher in mechanical and electrical, the overall rating is Rated-2. This approach ensures that all aspects meet a minimum standard and prevents a higher rating if any critical area does not comply.

Detailed Explanation:

ANSI/TIA-942 evaluates data centers across several areas, including mechanical, electrical, architectural, and telecommunications. The overall rating reflects the lowest rated category, ensuring that no aspect of the data center's design or operation falls below the specified level. Thus, in this case, the architectural rating of 2 dictates the final rating, ensuring a comprehensive and balanced assessment of reliability and resilience across all aspects.

EPI Data Center Specialist References:

EPI Data Center Specialist training aligns with ANSI/TIA-942, stating that the final rating must reflect the lowest score to ensure comprehensive reliability across all critical infrastructure categories. This avoids overstating the data center's resilience and ensures uniform standards across areas.

NEW QUESTION # 122

A data center requires an audit for ANSI/TIA-942 Rated-3 compliance. Will the network architecture be part of this audit?

- A. Yes, amongst other aspects the network architecture should be Rated-3 compliant with ANSI/TIA-942
- B. Yes, but only if network administration does not comply with ANSI/TIA-606
- C. No, as concurrent maintainability only applies to electrical and mechanical
- D. No, only the type of cabling used will be audited

Answer: A

Explanation:

ANSI/TIA-942 defines ratings across four areas:

- * Architectural
- * Electrical
- * Mechanical
- * Telecommunications (network cabling + architecture)

A data center cannot be considered Rated-3 unless all four areas meet the concurrent maintainability criteria.

For telecom/networking, this means dual redundant backbone cabling, proper pathways, and separate routes to ensure no single point of failure.

* A and B are incorrect because they limit scope to electrical/mechanical or cabling only.

* C is incomplete: administration (ANSI/TIA-606) is part of compliance but architecture redundancy is mandatory.

References: ANSI/TIA-942-B §5.2 (Rated Levels), Annex E (Telecommunications infrastructure examples).

NEW QUESTION # 123

What is the main reason to install Earth Leakage protection?

- A. Protection against lightning strikes
- B. Improvement of the data center grounding/earthing system
- C. Protection of human lives
- D. Protection of ICT equipment against high-frequency noise currents

Answer: C

Explanation:

Earth Leakage Protection is primarily installed to protect human lives by detecting and disconnecting power when a fault current flows to the ground. This type of protection is essential to avoid electrical shock hazards that could occur when insulation fails, or equipment is improperly grounded.

Detailed Explanation:

Earth leakage currents can occur due to insulation faults or accidental contact with live parts. Earth Leakage Protection systems, such as Residual Current Devices (RCDs), quickly detect these faults and disconnect the circuit to prevent harm to personnel. This is especially crucial in environments like data centers where high-powered equipment is continuously running and any electrical fault can pose significant safety risks.

EPI Data Center Specialist References:

EPI emphasizes that human safety is paramount in data center operations. Proper grounding and leakage protection are fundamental safety measures, and EPI guidelines align with this focus, underscoring the importance of protecting personnel from electrical hazards through appropriate safety systems.

NEW QUESTION # 124

What is forced entry resistance based on?

- A. Building materials used and the location of the data center
- B. The number of security guards on duty
- C. Rate and installed number of CCTV cameras
- D. Time, tools, and people

Answer: D

Explanation:

Forced-entry ratings use defined attack tools and durations (time-to-breach) executed by attacker profiles.

References: EN 1627-1630 (Resistance Classes-tools and time), UL 972/UL 752 (attack tools/time).

NEW QUESTION # 125

Racks with 1.0 m depth and cold aisle containment with 3 perforated tiles are used. What aisle pitch is recommended?

- A. 7 tiles pitch rule
- B. 5 tiles pitch rule
- C. 8 tiles pitch rule
- D. 10 tiles pitch rule

Answer: A

Explanation:

The aisle pitch is the total width of a rack row plus cold aisle plus rack row. For 1.0 m racks on each side with cold aisle containment, ASHRAE and TIA-942 recommend the 7-tile rule (each tile ~0.6 m). This ensures enough width for equipment clearance, airflow distribution, and human access.

* 5-tile pitch is too narrow, restricting containment effectiveness.

* 8-10 tiles may be used in some hyperscale layouts but are not standard for 1 m racks.

Thus, the correct design recommendation is the 7 tiles pitch rule.

References: ANSI/TIA-942-B §6.3.6 (Aisle Spacing), ASHRAE TC 9.9 "Airflow Management Best Practices."

NEW QUESTION # 126

.....

Doubtlessly, clearing the CDCS certification exam is a challenging task. You can make this task considerably easier by studying with actual EXIN EPI Certified Data Centre Specialist (CDCS) Questions of Pass4training. We provide you with a triple-formatted CDCS Practice Test material, made under the supervision of experts. This product has everything you need to clear the challenging CDCS exam in one go.
