And we offer you free updates for CIS-SPM learning guide for one year. Stop to hesitate, just go and choose our CIS-SPM exam questions!

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q65-Q70):

NEW QUESTION # 65

What minimum role is required to assign a time sheet policy to a user?

- A. ppm_admin.
- B. timecard_admin.
- C. It is not possible to assign a time sheet policy to a user.
- D. it_project_manager.

Answer: B

Explanation:

Explanation

According to the web search results¹, the timecard_admin role is the minimum role that is required to assign a time sheet policy to a user. A time sheet policy is a rule that controls the creation and operation of time sheets for resources who log time against work items. The timecard_admin role can create and modify time sheet policies, time sheet groups, and time sheet periods, as well as approve time sheets or submit time cards on behalf of team members. The other options are incorrect because:

A: ppm_admin: The ppm_admin role is a higher-level role that can access all Project and Portfolio Management modules and features, but it is not the minimum role required for assigning a time sheet policy to a user².

C: it_project_manager: The it_project_manager role can create and manage projects, but not assign time sheet policies to users³.

D: It is not possible to assign a time sheet policy to a user: This is false, as it is possible to assign a time sheet policy to a user by using the Time Sheet Policy field on the User form⁴.

NEW QUESTION # 66

What is the demand workbench used for?

Choose 2 answers

- A. Approving ideas
- B. Comparing demands with portfolios
- C. Approving demands
- D. Comparing and prioritizing demands against other demands

Answer: B,D

Explanation:

Explanation

The demand workbench is a feature of ServiceNow Demand Management that allows you to view and assess business demands in a single place. You can use the demand workbench to compare demands with portfolios and see how they align with your strategic goals and objectives. You can also use the demand workbench to compare and prioritize demands against other demands based on their scores, risks, and benefits. You can find more information about the demand workbench in the Product Documentation for ServiceNow.

NEW QUESTION # 67

Users with what role can be considered for resource planning?

- A. it_project_user.
- B. it_pps_user.
- C. it_user.
- D. pps_resource.

Answer: D

Explanation:

Explanation

According to the ServiceNow Resource Management document, users with the pps_resource role can be considered for resource planning, as this role grants access to the Resource Management application and allows the users to view and update their resource allocations. The other options are not correct, as they are not roles that are related to resource planning. The it_project_user role grants access to the Project Portfolio Management application and allows the users to create and update projects. The it_user role grants access to the IT Service Management application and allows the users to manage incidents, problems, and changes. The it_pps_user role grants access to the Project Portfolio Suite application and allows the users to manage portfolios, programs, and projects.

NEW QUESTION # 68

Instead of starting from scratch, what can project managers make use of to rapidly build their project plan

- A. Project Baselines
- B. Project Workspace
- C. Project Templates
- D. Planning Console

Answer: C

NEW QUESTION # 69

If a sub-project and parent project have different project currencies, this property should be set to true for cost roll-ups.

- A. com.snc.project.rollup_project_start_date
- B. com.snc.project.multicurrency.rollup_if_different
- C. com.snc.project.calculate_roi
- D. com.snc.project.copy.additional_attributes

Answer: B

Explanation:

Explanation

According to the ServiceNow documentation¹, this property controls whether the cost roll-ups are performed when a sub-project and parent project have different project currencies. If this property is set to true, then the system converts the sub-project currency to the parent project currency using the exchange rate table and performs the cost roll-ups. If this property is set to false, then the system does not perform the cost roll-ups for sub-projects with different currencies.
