Test CloudSec-Pro Dumps Free | Training CloudSec-Pro Tools

Hundreds of candidates want to get the CloudSec-Pro certification exam because it helps them in accelerating their Palo Alto Networks careers. Cracking the Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam of this credential is vital when it comes to the up gradation of their resume. The CloudSec-Pro certification exam helps students earn from online work and it also benefits them in order to get a job in any good tech company. The CloudSec-Pro Exam is on trend but the main problem that every applicant faces while preparing for it is not making the right choice of the CloudSec-Pro Questions.

Palo Alto Networks Cloud Security Professional Sample Questions (Q21-

Q26):

NEW QUESTION # 21

Which three types of classifications are available in the Data Security module? (Choose three.)

- A. Compliance standard
- B. Personally identifiable information
- C. Malicious IP
- D. Financial information
- E. Malware

Answer: B,D,E

Explanation:

Palo Alto Networks' Enterprise DLP service and provides data classification that includes built-in data profiles with data patterns that match sensitive information such as PII, health care, financial information and Intellectual Property. In addition to protecting your confidential and sensitive data, your data is also protected against threats-known and unknown (zero-day) malware-using the Palo Alto Networks' WildFire service.

NEW QUESTION # 22

Which step is included when configuring Kubernetes to use Prisma Cloud Compute as an admission controller?

- A. enable Kubernetes auditing from the Defend > Access > Kubernetes page in the Console.
- B. create a new namespace in Kubernetes called admission-controller.
- C. copy the admission controller configuration from the Console and apply it to Kubernetes.
- D. copy the Console address and set the config map for the default namespace.

Answer: C

Explanation:

When configuring Kubernetes to use Prisma Cloud Compute as an admission controller, a crucial step involves D. copy the admission controller configuration from the Console and apply it to Kubernetes. This step is essential for integrating Prisma Cloud Compute's security controls directly into the Kubernetes admission process, enabling real-time security assessments and policy enforcement for new or modified resources within the cluster.

NEW QUESTION # 23

Which component(s), if any, will Palo Alto Networks host and run when a customer purchases Prisma Cloud Enterprise Edition?

- A. Jenkins
- B. Defenders
- C. twistcli
- D. Console

Answer: D

Explanation:

In Prisma Cloud Enterprise Edition, Palo Alto Networks hosts and runs the Console component. The Console serves as the central management interface for Prisma Cloud, allowing customers to configure policies, view alerts, and manage their cloud security posture without the need to host this component themselves.

NEW QUESTION # 24

Which options show the steps required after upgrade of Console?

- A. Update the Console image in the Twistlock hosted registry Update the Defender image in the Twistlock hosted registry Redeploy Console
- B. Update the Console image in the Twistlock hosted registry Update the Defender image in the Twistlock hosted registry

Uninstall Defenders

- C. Upgrade Defenders Upgrade Jenkins Plugin Upgrade twistcli where applicable
- D. Uninstall Defenders Upgrade Jenkins Plugin Upgrade twistcli where applicable Allow the Console to redeploy the Defender

Answer: C

Explanation:

After the Console has been upgraded, check and upgrade any of the Defenders that have reached the end of their support lifecycle (Defenders are backward compatible for N-2 releases). The Defender release image is built from the UBI8-minimal base image and on upgrade it is a full container image upgrade, which means that the old Defender container is replaced with a new container. Then, upgrade all other Prisma Cloud components, such as the Jenkins plugin. https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/upgrade/upgrade_process_saas

NEW QUESTION # 25

The Unusual protocol activity (Internal) network anomaly is generating too many alerts. An administrator has been asked to tune it to the option that will generate the least number of events without disabling it entirely. Which strategy should the administrator use to achieve this goal?

- A. Set Alert Disposition to Aggressive
- B. Change the Training Threshold to Low
- C. Set the Alert Disposition to Conservative
- D. Disable the policy

Answer: C

Explanation:

To reduce the number of alerts generated by the "Unusual protocol activity (Internal)" network anomaly without entirely disabling the policy, setting the Alert Disposition to Conservative (option B) is the most effective strategy. This configuration adjusts the sensitivity of the anomaly detection, reducing the likelihood of false positives and minimizing alert fatigue without compromising the ability to detect genuine security threats. By adopting a more conservative approach to anomaly detection, the administrator can ensure that only the most significant and potentially harmful activities trigger alerts, thus maintaining a balance between security vigilance and operational efficiency.

NEW QUESTION # 26

.....

For one thing, the most advanced operation system in our company which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. For another thing, with the online app version of our CloudSec-Pro actual exam, you can just feel free to practice the questions in our training materials on all kinds of electronic devices. In addition, under the help of our CloudSec-Pro Exam Questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future.
