

Valid CNX-001 Torrent Offers Candidates Latest-updated Actual CompTIA CompTIA CloudNetX Certification Exam Exam Products

BONUS!!! Download part of PassLeader CNX-001 dumps for free: https://drive.google.com/open?id=1OndI4mY6RoSMRaaGKr bwfXIHvM_hN58w

Being a social elite and making achievements in your own field may be the dream of all people. However, only a very few people seize the initiative in their life. Perhaps our research data will give you some help. As long as you spend less time on the game and spend more time on learning, the CNX-001 Study Materials can reduce your pressure so that users can feel relaxed and confident during the preparation and certification process.

If you still desperately cram knowledge and spend a lot of precious time and energy to prepare for passing CompTIA certification CNX-001 exam, and at the same time do not know how to choose a more effective shortcut to pass CompTIA Certification CNX-001 Exam. Now PassLeader provide you a effective method to pass CompTIA certification CNX-001 exam. It will play a multiplier effect to help you pass the exam.

CNX-001 Valid Exam Fee - CNX-001 Hot Spot Questions

No matter when you need help on our CNX-001 training questions, the after-sale service staffs in our company share a passion for you, an intense focus on teamwork, speed and agility, and a commitment to trust and respect for all individuals. At present, our company is a leading global provider of CNX-001 Preparation exam in the international market. And as you know, the first-class quality comes with the first-class service. So you will find our CNX-001 is the best in every detail!

CompTIA CloudNetX Certification Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40

A company hosts its application s on the cloud and is expanding its business to Europe. The company must comply with General Data Protection Regulation to limit European customers' access to data. The network team configures the firewall rules but finds that some customers in the United States can access data hosted in Europe. Which of the following is the best option for the network team to configure?

- A. SASE
- B. CDN
- C. Network security groups
- D. Geofencing rule

Answer: D

Explanation:

Using a geofencing (geo#restriction) policy lets you block or allow traffic based on the client's geographic location. This ensures that

only users in approved regions (e.g., the United States) can reach the European- hosted data, effectively preventing unintended European customer access without complex IP ACLs.

NEW QUESTION # 41

A cloud network engineer needs to enable network flow analysis in the VPC so headers and payload of captured data can be inspected. Which of the following should the engineer use for this task?

- A. Syslog service
- B. Network flows
- C. Application monitoring
- **D. Traffic mirroring**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Traffic mirroring allows a copy of network traffic - including headers and payloads - to be sent to an analysis tool or appliance for deep packet inspection. This is essential for security analysis, network troubleshooting, and performance diagnostics in cloud environments.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Packet Capture and Network Flow Monitoring": "Traffic mirroring enables the capture of full packet data, including payloads, for forensic or performance analysis within cloud networks." Other options:

- * A. Application monitoring focuses on app-level metrics, not packet inspection.
- * B. Syslog is log-based, not for inspecting packets.
- * D. Network flows (e.g., NetFlow, VPC flow logs) provide metadata (source, destination, size) but not full packet content.

NEW QUESTION # 42

A SaaS company is launching a new product based in a cloud environment. The new product will be provided as an API and should not be exposed to the internet. Which of the following should the company create to best meet this requirement?

- A. A transit gateway that connects the API to the customer's VPC
- **B. A private service endpoint exposing the API endpoint to the customer's VPC**
- C. A VPC peering connection from the API VPC to the customer's VPC
- D. Firewall rules allowing access to the API endpoint from the customer's VPC

Answer: B

Explanation:

AWS PrivateLink (a private service endpoint) lets you expose your API over an interface endpoint directly into each customer's VPC without ever traversing the public internet, ensuring the service remains fully private.

NEW QUESTION # 43

A network architect needs to design a new network to connect multiple private data centers. The network must:

- * Provide privacy for all traffic between locations
 - * Use preexisting internet connections
 - * Use intelligent steering of application traffic over the best path
- Which of the following best meets these requirements?

- A. Site-to-site VPN
- B. ExpressRoute
- C. MPLS connections
- **D. SD-WAN**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

SD-WAN (Software-Defined Wide Area Network) enables private, encrypted connections over public internet links and supports

policy-based routing for application-aware traffic steering. It offers centralized management, redundancy, and automatic path selection - all aligned with the stated requirements.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Software-Defined Networking and WAN Optimization":

"SD-WAN uses secure tunnels over the public internet, supports dynamic path selection, and provides application-aware routing, making it ideal for multi-site enterprise connectivity without dedicated links." Other options:

- * A. MPLS requires dedicated circuits and is costly.
- * C. Site-to-site VPN provides security but lacks intelligent traffic steering.
- * D. ExpressRoute is a private connection to Azure, not suited for general internet-based multi-site connectivity.

NEW QUESTION # 44

A company is transitioning from on premises to a hybrid environment. Due to regulatory standards, the company needs to achieve a high level of reliability and high availability for the connection between its data center and the cloud provider. Which of the following solutions best meets the requirements?

- A. Establish a VPN with two tunnels to a transit gateway at the cloud provider.
- B. Establish a Direct Connect with the cloud provider and a redundant connection with a VPN over the internet.
- C. Establish two Direct Connect connections to the cloud provider using two different suppliers.
- D. Establish a Direct Connect with the cloud provider and peer to two different VPCs in the cloud network.

Answer: C

Explanation:

By provisioning two dedicated Direct Connect circuits from separate carriers (diverse physical paths and providers), you achieve a true highly available, fault-tolerant link that meets stringent reliability and regulatory requirements without relying on the public internet.

NEW QUESTION # 45

.....

One of the biggest challenges of undertaking a CompTIA CNX-001 exam is managing your time effectively. This means setting aside enough time to study. Many students struggle with this challenge because they are not able to set aside enough time to study and end up rushing through the material at the last minute. Our CompTIA CNX-001 PdfDumps offer an alternate way by providing relevant CompTIA CNX-001 questions and answers to prepare in the shortest possible time.
