Salesforce Certification Preparation for Advanced Administrator Sample Questions (Q144-Q149):

NEW QUESTION # 144

AW Computers has enabled the feature for Contact to multiple Accounts. A rep is trying to remove the primary Account from a Contact but is unable to do so. The administrator has already updated the page layout to no longer require an Account. What could be the issue?

- A. A primary Account relationship is required on a Contact regardless of the page layout settings.
- B. The Account Contact relationship record needs to be deleted first in order to disassociate the Contact from the Account.
- C. The Contact has indirect relationships to other Accounts.
- D. Private Contacts need to be enabled in Setup.

Answer: A

Explanation:

A primary account relationship is a feature that allows you to link a contact to a single account as its primary account. A primary account relationship is required on a contact regardless of the page layout settings or the contact to multiple accounts feature. This means that you cannot remove the primary account from a contact, but you can change it to another account. You can also add secondary accounts to a contact if you have enabled the contact to multiple accounts feature. References:

NEW QUESTION # 145

The Cloud Kicks security team has seen an increase in unattended device attacks, where hackers can view sensitive information when users leave devices unlocked in public settings. The security team wants to ensure Salesforce data cannot be viewed after 10 minutes of inactivity.

What is the recommended security setting to configure?

- A. Lock sessions to the domain in which they were first used.
- B. Enforce login IP ranges on every request.
- C. Force logout on session timeout.
- D. Require a high assurance session.

Answer: C

Explanation:

Force logout on session timeout is the recommended security setting to configure because it prevents users from resuming their sessions after they time out due to inactivity, which reduces the risk of unauthorized access to Salesforce data from unattended devices.
