Latest CTFL-AcT Practice Questions & CTFL-AcT Practice Guide

The learning material of BraindumpsPass is in three different formats so the students can take full benefit from it and use it anywhere anytime while preparing for ISTQB Foundation Level - Acceptance Testing exam questions. The ISTQB Foundation Level - Acceptance Testing (CTFL-AcT) guarantees its customers that they will pass the ISTQB Foundation Level - Acceptance Testing (CTFL-AcT) certification exams in a single try if they prepare with our product and if they fail to do it so then they can reclaim their money back according to terms and conditions.

ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q36-Q41):
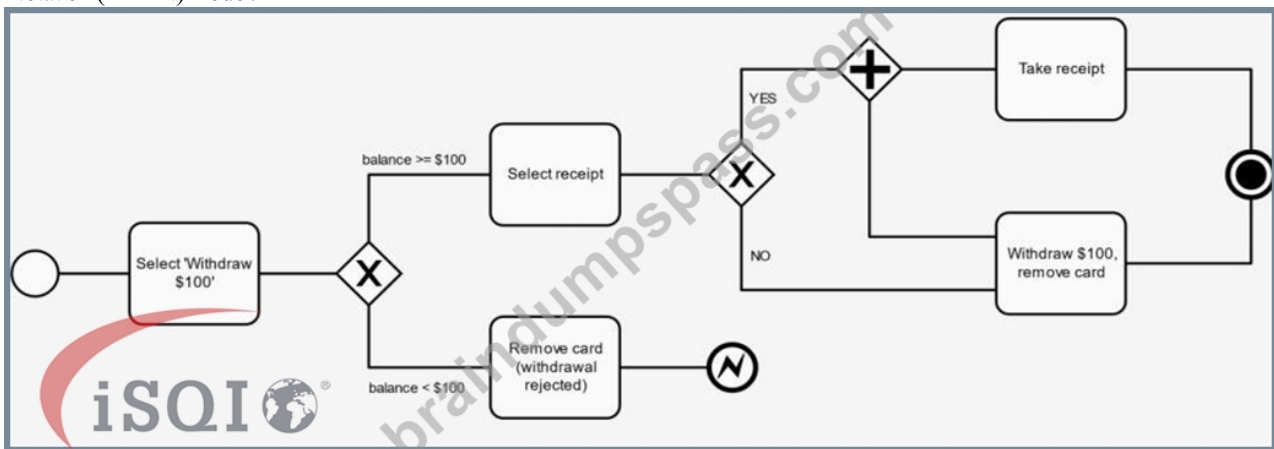

NEW QUESTION # 36
Which one of the following acceptance criteria relates to security requirements?

- A. The system shall be web-based.
- B. Normal users shall have restricted access to private data.
- C. The graphical user interface shall comply with corporate style guides.
- D. The system's response time shall not exceed 3 seconds.

Answer: B

NEW QUESTION # 37
As an acceptance tester you want to test the $100 withdrawal process described by the following Business Process Model and Notation (BPMN) model.

You would like to achieve the following coverage criterion "execute all possible process tasks". Consider the following test cases:
Test 1: balance = $100, receipt = YES
Test 2: balance = $120, receipt = NO
Test 3: balance = $85
Test 4: balance = $20, receipt = YES
Which of the following is the minimal set of test cases allowing to achieve required coverage?

- A. Test 2, Test 4
- B. Test 1, Test 2, Test 4
- C. Test 1, Test 2, Test 3
- D. Test 1, Test 3

Answer: D

Explanation:
Comprehensive Detailed Explanation (Approx. 200-220 words):
This question focuses on the coverage criterion "execute all possible process tasks" from the BPMN model of a $100 withdrawal.
Let's analyze the process:
The process starts when the user selects "Withdraw $100."
A decision gateway checks if the balance is # $100.
If NO: the card is removed and withdrawal is rejected.
If YES: the user is prompted to select whether they want a receipt.
Depending on the user's choice:
If YES: the receipt is printed # then $100 is withdrawn # card is removed.
If NO: $100 is withdrawn # card is removed (no receipt printed).
To meet the criterion "execute all possible process tasks," we must cover:
Rejected withdrawal path (balance < 100)
Withdrawal without receipt
Withdrawal with receipt
Receipt printing

Card removal in both success and failure
Test case coverage:
Test 1 (balance = $100, receipt = YES): covers successful withdrawal + receipt printed.
Test 3 (balance = $85): covers withdrawal rejected + card removed.
Together, these two tests execute all possible process tasks:
Withdraw with receipt
Reject due to insufficient balance
Receipt printed
Withdraw funds
Remove card
Other test combinations are redundant or do not add new path coverage.

NEW QUESTION # 38
How does ISTQB CTFL test activities relate to the IQBBA FL business analysis and requirements engineering activities?

- A. Business analysts and tester have to decide, whether they follow the IQBBA or ISTQB lifecycle processes, because they exclude each other.
- B. The IQBBA solution evaluation phase precedes the ISTQB test implementation and test execution activities.
- C. Test analysis and test design activities may result in changes of acceptance criteria.
- D. Business analysts who follow the IQBBA requirements engineering process will not be involved in designing test cases.

Answer: C

Explanation:
The relationship between testing and requirements engineering is iterative and collaborative. According to ISTQB CTFL and IQBBA FL syllabi, test activities such as test analysis and test design involve reviewing and interpreting acceptance criteria to derive test conditions and test cases. During this process, testers may identify ambiguities, conflicts, or missing acceptance conditions. These insights often result in feedback to business analysts or stakeholders, leading to refinement or changes in the acceptance criteria to ensure clarity, completeness, and testability.
This iterative feedback loop is essential in both Agile and traditional lifecycles. Therefore, option D is correct.
It reflects the dynamic interaction between requirements and test design, where improving one often improves the other.
Other options are incorrect:
Option A falsely assumes business analysts don't engage in test design, while in practice, they collaborate closely with testers.
Option B incorrectly suggests that IQBBA and ISTQB lifecycles are mutually exclusive. In fact, they complement each other.
Option C is incorrect in sequencing. In reality, solution evaluation (IQBBA) follows test execution, not precedes it.
Exact Reference - ISTQB CTFL Acceptance Testing Syllabus (Section 1.3.2):
"During test analysis, inconsistencies or missing information in the acceptance criteria can be identified and addressed through collaboration with business analysts."

NEW QUESTION # 39
Which one of the following statements regarding ATDD / BDD is true?

- A. Behavior-Driven Development (BDD. considers acceptance test design as an activity to be handled by the test team after requirements have been finalized.
- B. In Acceptance-Test Driven Development (ATDD., test cases are written prior to the acceptance criteria.
- C. In both Acceptance-Test Driven Development (ATD and Behavior-Driven Development (BD, acceptance test cases are written by a test automation engineer as test automation code.
- D. In both Acceptance-Test Driven Development (ATDD. and Behavior-Driven Development (BDD., test cases provide examples of product use.

Answer: D

NEW QUESTION # 40
How does ISTQB CTFL test activities relate to the IQBBA FL business analysis and requirements engineering activities?

- A. Business analysts and tester have to decide, whether they follow the IQBBA or ISTQB lifecycle processes, because they exclude each other.

- B. The IQBBA solution evaluation phase precedes the ISTQB test implementation and test execution activities.
- C. Test analysis and test design activities may result in changes of acceptance criteria.
- D. Business analysts who follow the IQBBA requirements engineering process will not be involved in designing test cases.

Answer: C

NEW QUESTION # 41

......
