Docker Certified Associate (DCA) Exam Sample Questions (Q182-Q187):

NEW QUESTION # 182

You created a new service named 'http*' and discover it is not registering as healthy. Will this command enable you to view the list of historical tasks for this service?

Solution. 'docker inspect http'

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

Using docker inspect http does not enable you to view the list of historical tasks for this service. The docker inspect command shows low-level information about one or more objects, such as containers, images, networks, etc. It does not show information about services or tasks. To view the list of historical tasks for this service, you need to use docker service ps http --no-trunc.

NEW QUESTION # 183

You are troubleshooting a Kubernetes deployment called api, and want to see the events table for this object. Does this command display it?

Solution: kubectl logs deployment api

- **A. No**
- B. Yes

Answer: A

Explanation:

= The command kubectl logs deployment api does not display the events table for the deployment object, but rather the logs of the pods that belong to the deployment. To see the events table, you need to use the command kubectl describe deployment api, which shows the details of the deployment, including the events¹.
