

Valid DP-300 Exam Labs - DP-300 Reliable Exam Registration

BONUS!!! Download part of DumpsValid DP-300 dumps for free: https://drive.google.com/open?id=1jOfN_6Cp2j3gv3KkJIIWzabgjJtpLODB

Contrary to the high prices of the other exam materials available online, our DP-300 exam questions can be obtained on an affordable price yet their quality and benefits beat all similar products of our competitors. Some of our customer will be surprised to find that the price of our DP-300 Study Guide is too low to believe for they had been charged a lot before on the other websites. But after they passed their exams with our DP-300 preparation materials. They said that our DP-300 simulating exam is proved the best alternative of the time and money.

DumpsValid has many Administering Relational Databases on Microsoft Azure (DP-300) practice questions that reflect the pattern of the real Microsoft DP-300 exam. DumpsValid allows you to create a Administering Relational Databases on Microsoft Azure (DP-300) exam dumps according to your preparation. It is easy to create the Administering Relational Databases on Microsoft Azure (DP-300) practice questions by following just a few simple steps. Our DP-300 exam dumps are customizable based on the time and type of questions.

Microsoft DP-300 Reliable Exam Registration & DP-300 Latest Test Dumps

The Microsoft DP-300 certification exam is one of the top-rated and valuable credentials in the Microsoft world. This Microsoft DP-300 exam questions is designed to validate the candidate's skills and knowledge. With Administering Relational Databases on Microsoft Azure exam dumps everyone can upgrade their expertise and knowledge level. By doing this the successful DP-300 Exam candidates can gain several personal and professional benefits in their career and achieve their professional career objectives in a short time period.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q13-Q18):

NEW QUESTION # 13

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named user1@contoso.com and an Azure SQL managed instance named SQLMI1.

You need to ensure that user1@contoso.com can create logins in SQLMI1 that map to Azure AD service principals.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Run CREATE LOGIN user1@contoso.com FROM EXTERNAL PROVIDER on the master database.

Run ALTER SERVER ROLE securityadmin ADD MEMBER user1@contoso.com.

Create a managed identity for SQLMI1.

Grant SQLMI1 read access to Azure AD.

Run CREATE USER user1@contoso.com FROM LOGIN user1@contoso.com.

Answer Area

Answer:

Explanation:

ACTIONS

Run CREATE LOGIN user1@contoso.com FROM EXTERNAL PROVIDER on the master database.

Run ALTER SERVER ROLE securityadmin ADD MEMBER user1@contoso.com.

Create a managed identity for SQLMI1.

Grant SQLMI1 read access to Azure AD.

Run CREATE USER user1@contoso.com FROM LOGIN user1@contoso.com.

Answer Area

Grant SQLMI1 read access to Azure AD.

Run CREATE LOGIN user1@contoso.com FROM EXTERNAL PROVIDER on the master database.

Run ALTER SERVER ROLE securityadmin ADD MEMBER user1@contoso.com.

Explanation

Text Description automatically generated with medium confidence

Grant SQLMI1 read access to Azure AD.

Run CREATE LOGIN user1@contoso.com FROM EXTERNAL PROVIDER on the master database.

Run ALTER SERVER ROLE securityadmin ADD MEMBER user1@contoso.com.

NEW QUESTION # 14

SIMULATION

You plan to perform performance testing of db1.

You need prevent db1 from reverting to the last known good query plan.

To complete this task, sign in to the virtual machine. You may need to use SQL Server Management Studio and the Azure portal.

Answer:

Explanation:

Automatic tuning options

The automatic tuning options available in Azure SQL Database and Azure SQL Managed Instance are:

* FORCE LAST GOOD PLAN (automatic plan correction)

Identifies Azure SQL queries using an execution plan that is slower than the previous good plan, and forces queries to use the last known good plan instead of the regressed plan.

* Etc.

You can either manually apply tuning recommendations using the Azure portal, or you can let automatic tuning autonomously apply tuning recommendations for you.

Azure defaults are set to FORCE_LAST_GOOD_PLAN enabled.

We need to disable it.

With transact-SQL:

ALTER DATABASE SET options (Transact-SQL)

Parameters include:

<automatic_tuning_option> ::=

```
{  
    AUTOMATIC_TUNING ( FORCE_LAST_GOOD_PLAN = { DEFAULT | ON | OFF } )  
}
```

Solution with T-SQL

Stored procedure execution

You can use the SQL Server Management Studio (SSMS) user interface or Transact-SQL in an SSMS query window to execute a stored procedure. Always use the latest version of SSMS.

Use SQL Server Management Studio

Step 1: In Object Explorer, connect to an instance of SQL Server or Azure SQL Database, expand that instance, and then expand Databases.

Step 2: Expand the database that you want, expand Programmability, and then expand Stored Procedures.

Step 3: Right-click the stored procedure that you want to run [here: ALTER DATABASE SET] and select Execute Stored Procedure.

Step 4: Set the parameters: AUTOMATIC_TUNING (FORCE_LAST_GOOD_PLAN = { OFF })

Step 5: Select OK to execute the stored procedure. If the stored procedure doesn't have any parameters, just select OK.

NEW QUESTION # 15

You have an Azure Data Lake Storage Gen2 account named account1 that stores logs as shown in the following table.

Type	Designated retention period
Application	360 days
Infrastructure	60 days

You do not expect that the logs will be accessed during the retention periods.

You need to recommend a solution for account1 that meets the following requirements:

* Automatically deletes the logs at the end of each retention period

* Minimizes storage costs

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To minimize storage costs:

- Store the infrastructure logs and the application logs in the Archive access tier.
- Store the infrastructure logs and the application logs in the Cool access tier.
- Store the infrastructure logs in the Cool access tier and the application logs in the Archive access tier.

To delete the logs automatically:

- Azure Data Factory pipelines
- Azure Blob storage lifecycle management rules
- Immutable Azure Blob storage time-based retention policies

Answer:

Explanation:

To minimize storage costs:

- Store the infrastructure logs and the application logs in the Archive access tier.
- Store the infrastructure logs and the application logs in the Cool access tier.
- Store the infrastructure logs in the Cool access tier and the application logs in the Archive access tier.

To delete the logs automatically:

- Azure Data Factory pipelines
- Azure Blob storage lifecycle management rules
- Immutable Azure Blob storage time-based retention policies

Explanation:

To minimize storage costs:

- Store the infrastructure logs and the application logs in the Archive access tier.
- Store the infrastructure logs and the application logs in the Cool access tier.
- Store the infrastructure logs in the Cool access tier and the application logs in the Archive access tier.

To delete the logs automatically:

- Azure Data Factory pipelines
- Azure Blob storage lifecycle management rules
- Immutable Azure Blob storage time-based retention policies

Box 1: Store the infrastructure logs in the Cool access tier the application logs in the Archive access tier Hot - Optimized for storing data that is accessed frequently.

Cool - Optimized for storing data that is infrequently accessed and stored for at least 30 days.

Archive - Optimized for storing data that is rarely accessed and stored for at least 180 days with flexible latency requirements, on the order of hours.

Box 2: Azure Blob storage lifecycle management rules

Blob storage lifecycle management offers a rich, rule-based policy that you can use to transition your data to the best access tier and to expire data at the end of its lifecycle.

<https://docs.microsoft.com/en-us/azure/storage/blobs/storage-blob-storage-tiers>

NEW QUESTION # 16

You create a new Azure SQL managed instance named SQL1 and enable Database Mail extended stored You need to ensure that SQ Server Agent jobs running on SQL 1 can notify when a failure Occurs Which three actions should you perform in sequence 7 TO answer. move the appropriate actions from the list Of actions to answer area and arrange them in correct order.

Actions

- Create a Database Mail account.
- Enable pager notifications upon failure.
- Create a profile named AzureManagedInstance_dbmail_profile.
- Enable email notifications upon failure.
- Create a profile named application_dbmail_profile.

Answer Area

1. Create a Database Mail account.

2. Create a profile named AzureManagedInstance_dbmail_profile.

3. Enable email notifications upon failure.

Answer:

Explanation:

Answer Area

Create a Database Mail account

Create a profile named AzureManagedInstance,,,,,

Enable email notifications upon failure.

- 1 - Create a Database Mail account.
- 2 - Create a profile named AzureManagedInstance,,,,,
- 3 - Enable email notifications upon failure.

NEW QUESTION # 17

You have SQL Server on an Azure virtual machine named SQL1.

SQL1 has an agent job to back up all databases.

You add a user named dbadmin1 as a SQL Server Agent operator.

You need to ensure that dbadmin1 receives an email alert if a job fails.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a job alert

Create a job notification

Enable Database Mail

Enable the email settings for the SQL Server Agent

Create a job target

Answer Area

Answer:

Explanation:

Actions

Create a job alert

Create a job notification

Enable Database Mail

Enable the email settings for the SQL Server Agent

Create a job target

Answer Area

Enable the email settings for the SQL Server Agent

Create a job alert

Create a job notification

Explanation:

Step 1: Enable the email settings for the SQL Server Agent.

To send a notification in response to an alert, you must first configure SQL Server Agent to send mail.

Step 2: Create a job alert

Step 3: Create a job notification

Example:

-- adds an e-mail notification for the specified alert (Test Alert)

-- This example assumes that Test Alert already exists

-- and that Francois Ajenstat is a valid operator name.

USE msdb ;

GO

EXEC dbo.sp_add_notification

@alert_name = N'Test Alert',

@operator_name = N'Francois Ajenstat',

@notification_method = 1 ;

GO

Reference:

<https://docs.microsoft.com/en-us/sql/ssms/agent/notify-an-operator-of-job-status>

<https://docs.microsoft.com/en-us/sql/ssms/agent/assign-alerts-to-an-operator>

NEW QUESTION # 18

.....

In this way, you cannot miss a single DP-300 exam question without an answer. One more thing to give you an idea about the top features of Administering Relational Databases on Microsoft Azure exam questions before purchasing, the DumpsValid are offering a Free DP-300 Exam Questions demo download facility. This facility is being offered in all three Administering Relational Databases on Microsoft Azure exam question formats. Just choose the right DP-300 exam questions format demo and download it quickly.

DP-300 Reliable Exam Registration: <https://www.dumpsvalid.com/DP-300-still-valid-exam.html>

Based on our past record people who pay attention on our DP-300 premium VCE file all passed Microsoft exams, Microsoft Valid DP-300 Exam Labs In addition, you will find the operation is very smooth, Our site is working on providing most helpful the real test questions answer in IT certification exams many years especially for DP-300, Windows, Mac, iOS, Android, and Linux support this Administering Relational Databases on Microsoft Azure (DP-300) practice exam.

Snowstorms tend to disrupt northern schedules during Valid DP-300 Exam Labs the winter, whereas thunderstorms wreak havoc with all airports during the summer months, This attention isn't just coming from corporate broom closets DP-300 where statisticians are huddled over computers and poring over the output from complex analyses.

Best Way To Ensure Success With Microsoft DP-300 Exam Questions

Based on our past record people who pay attention on our DP-300 premium VCE file all passed Microsoft exams, In addition, you will find the operation is very smooth.

Our site is working on providing most helpful the real test questions answer in IT certification exams many years especially for DP-300, Windows, Mac, iOS, Android, and Linux support this Administering Relational Databases on Microsoft Azure (DP-300) practice exam.

Passed the DP-300 certification you will get to a good rise.
