With great outcomes of the passing rate upon to 98-100 percent, our DP-700 practice materials are totally the perfect ones. We never boost our achievements, and all we have been doing is trying to become more effective and perfect as your first choice, and determine to help you pass the DP-700 practice exam as efficient as possible. Our DP-700 practice materials are your optimum choices which contain essential know-hows for your information. So even trifling mistakes can be solved by using our DP-700 practice materials, as well as all careless mistakes you may make. If you opting for these DP-700 practice materials, it will be a sheer investment. You will get striking by these viable ways.

If you want to get Microsoft certification and get hired immediately, you've come to the right place. TopExamCollection offers you the best exam dump for Microsoft certification i.e. actual DP-700 brain dumps. With the guidance of no less than seasoned DP-700 professionals, we have formulated updated actual questions for DP-700 Certified exams, over the years. To keep our questions up to date, we constantly review and revise them to be at par with the latest DP-700 syllabus for Microsoft certification. With our customizable learning experience and self-assessment features of practice exam software for DP-700 exams, you will be able to know your strengths and areas of improvement. We provide authentic braindumps for DP-700 certification exams.

>> Valid DP-700 Exam Duration <<

DP-700 Updated Dumps, Test DP-700 King

The most important is that you just only need to spend 20 to 30 hours on practicing DP-700 exam questions before you take the exam, therefore you can arrange your time to balance learning and other things. Of course, you care more about your test pass rate. We offer you more than 99% pass guarantee if you are willing to use our DP-700 test guide and follow our plan of learning. If you fail to pass the exam with our **Implementing Data Engineering Solutions Using Microsoft Fabric** torrent prep, you will get a full refund. However, if you want to continue studying our course, you can still enjoy comprehensive services through DP-700 Torrent prep. We will update relevant learning materials in time .And we guarantee that you can enjoy a discount of more than one year.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q68-Q73):

NEW QUESTION # 68

You have a Fabric workspace that contains a warehouse named Warehouse!. Warehouse contains a table named DimCustomers. DimCustomers contains the following columns:

* CustomerName
* CustomerID
* BirthDate
* Email

You need to configure security to meet the following requirements:

* BirthDate in DimCustomer must be masked and display 1900-01-01.
* Email in DimCustomer must be masked and display only the first leading character and the last five characters.
How should you complete the statement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

The screenshot shows the Microsoft ALTER TABLE DimCustomer interface. It displays two dropdown menus for masking functions:

- ALTER COLUMN BirthDate**: The dropdown menu contains:
 - 'default()'
 - 'default()'** (highlighted in blue)
 - 'partial(1900-01-01)'
 - 'random(1900-01-01, 1900-01-01)'
- ALTER COLUMN EmailAddress**: The dropdown menu contains:
 - 'random (1, "@", 5)'
 - 'default()'
 - 'email()'
 - 'partial(1, "@", 5)'
 - 'random (1, "@", 5)'** (highlighted in blue)

Answer:

Explanation:

Answer Area

The screenshot shows the Microsoft ALTER TABLE DimCustomer interface with red arrows pointing to the selected masking functions in the dropdown menus:

- ALTER COLUMN BirthDate**: The dropdown menu contains:
 - 'default()'
 - 'default()'** (highlighted in blue)
 - 'partial(1900-01-01)'
 - 'random(1900-01-01, 1900-01-01)'
- ALTER COLUMN EmailAddress**: The dropdown menu contains:
 - 'random (1, "@", 5)'
 - 'default()'
 - 'email()'
 - 'partial(1, "@", 5)'
 - 'random (1, "@", 5)'** (highlighted in blue)

Explanation:

Answer Area

```
ALTER TABLE DimCustomer
```

```
ALTER COLUMN BirthDate
```

```
ADD MASKED WITH (FUNCTION = default())
```

```
ALTER TABLE DimCustomer
```

```
ALTER COLUMN EmailAddress
```

```
ADD MASKED WITH (FUNCTION = 'random (1, "@", 5)')
```

NEW QUESTION # 69

You have a Fabric workspace named Workspace1 that contains the following items:

- * A Microsoft Power BI report named Report1
- * A Power BI dashboard named Dashboard1
- * A semantic model named Model1
- * A lakehouse named Lakehouse1

Your company requires that specific governance processes be implemented for the items. Which items can you endorse in Fabric?

- A. Report1 and Dashboard1 only
- B. Model1, Report1, and Dashboard1 only
- C. Lakehouse1, Model1, and Report1 only
- D. Lakehouse1, Model1, and Dashboard1 only
- E. Lakehouse1, Model1, Report1 and Dashboard1

Answer: E

NEW QUESTION # 70

You have a Fabric workspace that contains a warehouse named Warehouse1.

You have an on-premises Microsoft SQL Server database named Database1 that is accessed by using an on-premises data gateway.

You need to copy data from Database1 to Warehouse1.

Which item should you use?

- A. a KQL queryset
- B. a Dataflow Gen1 dataflow
- C. a data pipeline
- D. a notebook

Answer: C

Explanation:

To copy data from an on-premises Microsoft SQL Server database (Database1) to a warehouse (Warehouse1) in Microsoft Fabric, the best option is to use a data pipeline. A data pipeline in Fabric allows for the orchestration of data movement, from source to destination, using connectors, transformations, and scheduled workflows. Since the data is being transferred from an on-premises database and requires the use of a data gateway, a data pipeline provides the appropriate framework to facilitate this data movement efficiently and reliably.

NEW QUESTION # 71

HOTSPOT

You have a Fabric workspace that contains two lakehouses named Lakehouse1 and Lakehouse2. Lakehouse1 contains staging data in a Delta table named Orderlines. Lakehouse2 contains a Type 2 slowly changing dimension (SCD) dimension table named Dim_Customer.

You need to build a query that will combine data from Orderlines and Dim_Customer to create a new fact table named Fact_Orders. The new table must meet the following requirements:

Enable the analysis of customer orders based on historical attributes.

Enable the analysis of customer orders based on the current attributes.

How should you complete the statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
SELECT
    orderlines.order_line_id
    ,orderdate order_date
    ,r.customer_key
    ,r.customer_id
    ,Quantity order_quantity
    ,unitprice unit_price
    ,taxrate tax_rate
FROM
    Lakehouse1.orderlines o
INNER JOIN
    Lakehouse2.dim_customer c
    ON o.customerid = c.customer_id
    AND c.is_current = 1
    AND o.OrderDate >= valid_c_valid_datetime
    AND o.OrderDate <= valid_c_from_datetime;
```

AND

cis_current = 1
o.OrderDate <= valid_c_valid_datetime
o.OrderDate <= valid_c_from_datetime

Answer:

Explanation:

Answer Area

```
SELECT
    orderlines.order_line_id
    ,orderdate order_date
    ,r.customer_key
    ,r.customer_id
    ,Quantity order_quantity
    ,unitprice unit_price
    ,taxrate tax_rate
FROM
    Lakehouse1.orderlines o
INNER JOIN
    Lakehouse2.dim_customer c
    ON o.customerid = c.customer_id
    AND c.is_current = 1
    AND o.OrderDate >= valid_c_valid_datetime
    AND o.OrderDate <= valid_c_from_datetime;
```

AND

cis_current = 1
o.OrderDate <= valid_c_valid_datetime
o.OrderDate <= valid_c_from_datetime

Explanation:

Answer Area

```
SELECT
    OrderLineID order_line_id
    ,OrderDate order_date
    ,c.customer_key
    ,c.customer_id
    ,Quantity order_quantity
    ,UnitPrice unit_price
    ,TaxRate tax_rate
FROM
    Lakehouse1.orderlines o
INNER JOIN
    Lakehouse2.dim_customer c
    ON o.customerid = c.customer_id
```

AND

c.is_current = 1
o.OrderDate > c.valid_to_datetime
o.OrderDate >= c.valid_from_datetime t

AND

c.is_current = 1
o.OrderDate < c.valid_to_datetime
o.OrderDate <= c.valid_from_datetime

NEW QUESTION # 72

You are building a data loading pattern by using a Fabric data pipeline. The source is an Azure SQL database that contains 25 tables. The destination is a lakehouse.

In a warehouse, you create a control table named Control.Object as shown in the exhibit. (Click the Exhibit tab.) You need to build a data pipeline that will support the dynamic ingestion of the tables listed in the control table by using a single execution.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- ::: Add a Get metadata activity to query Control.Object and generate a list of schemas and tables to copy.
- ::: Add an Until activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.
- ::: Add a Lookup activity to query Control.Object and generate a list of the schemas and tables to copy.
- ::: Add a ForEach activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.
- ::: Add a Copy data activity as an inner activity to the iterator activity.

Answer Area**Answer:**

Explanation:

Actions

- Add a Get metadata activity to query Control.Object and generate a list of schemas and tables to copy.
- Add an Until activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.
- Add a Lookup activity to query Control.Object and generate a list of the schemas and tables to copy.
- Add a ForEach activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.
- Add a Copy data activity as an inner activity to the iterator activity.

Explanation:**Actions**

- Add a Get metadata activity to query Control.Object and generate a list of schemas and tables to copy.
- Add an Until activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.

Answer Area

- Add a Lookup activity to query Control.Object and generate a list of the schemas and tables to copy.
- Add a ForEach activity to iterate over the list of tables and copy the source data to the lakehouse Delta tables.
- Add a Copy data activity as an inner activity to the iterator activity.

NEW QUESTION # 73

.....

Nowadays, we live so busy every day. Especially for some businessmen who want to pass the DP-700 exam and get related certification, time is vital importance for them, they may don't have enough time to prepare for their exam. Some of them may give it up. After so many years' development, our DP-700 exam torrent is absolutely the most excellent than other competitors, the content of it is more complete, the language of it is more simply. Believing in our DP-700 Guide tests will help you get the certificate and embrace a bright future. Time and tide wait for no man. Come to buy our test engine.
