Salesforce Financial Services Cloud (FSC) Accredited Professional Sample Questions (Q55-Q60):

NEW QUESTION # 55

An insurance company wants to create a car insurance quote process for its website. The process should include the following functionality:

- * The user has to enter contact and address information.
 - * The user has to enter the driver's age and the car model and year.
 - * The process should calculate an insurance quote based on the data the customer provided and save the offer to the client's record.
- Which three OmniStudio tools should the consultant use to design a solution that meets these requirements?

- A. FlexCards
- B. Business Rules Engine
- C. Integration Procedures
- D. APEX Code
- E. OmniScripts

Answer: B,C,E

Explanation:

Explanation

The following OmniStudio tools should be used to design a solution that meets the requirements for creating a car insurance quote process for the website:

OmniScripts, which are tools that allow users to create guided, interactive, and intuitive scripts that capture data and execute actions.

By using OmniScripts, the consultant can create a script that guides the user through the car insurance quote process and captures the contact and address information, the driver's age, and the car model and year.

Integration Procedures, which are tools that allow users to orchestrate data and actions across multiple systems using RESTful APIs.

By using Integration Procedures, the consultant can create a procedure that calls the core system service to calculate an insurance quote based on the data provided by the user and returns the quote to the OmniScript.

Business Rules Engine, which is a tool that allows users to define business logic and validation rules using natural language expressions. By using Business Rules Engine, the consultant can create rules that validate the data entered by the user and enforce any business policies or conditions for the car insurance quote process.

NEW QUESTION # 57

A Bank of the Future customer calls the bank to update the address on their account. The call center agent handling the call needs to enter a new address into the system. The agent enters the new contact information using an OmniScript and then needs to generate a prefilled PDF with the new address that can be shared with the customer.

Which two OmniStudio tools should a consultant recommend to generate the prefilled PDF?

- A. Calculation Procedure
- B. DataRaptor
- C. Integration Procedure
- D. OmniStudio Action Document Generation

Answer: B,D

Explanation:

Explanation

The following OmniStudio tools should be recommended to generate the prefilled PDF:

OmniStudio Action Document Generation, which is a tool that allows users to create documents from templates and data sources using OmniScripts and Integration Procedures. By using OmniStudio Action Document Generation, the consultant can create a document template with placeholders for the contact and address information and generate a PDF file from it using an OmniScript.

DataRaptor, which is a tool that allows users to extract and transform data from Salesforce or external systems using Integration Procedures. By using DataRaptor, the consultant can create a data source that retrieves the contact and address information from

Salesforce and maps it to the document template placeholders.
