

Valid Dumps PSE-Cortex-Pro-24 Pdf, PSE-Cortex-Pro-24 Valid Dumps Files

DOWNLOAD the newest Prep4King PSE-Cortex-Pro-24 PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1L7g4GbOP90d795O3t9Ug8H23ZiLYVF5W>

Many students often feel that their own gains are not directly proportional to efforts in their process of learning. This is because they have not found the correct method of learning so that they often have low learning efficiency. If you have a similar situation, we suggest you try PSE-Cortex-Pro-24 practice materials. PSE-Cortex-Pro-24 test guide is compiled by experts of several industries tailored to PSE-Cortex-Pro-24 Exam to help students improve their learning efficiency and pass the exam in the shortest time. PSE-Cortex-Pro-24 test guide involve hundreds of professional qualification examinations. No matter which industry you are in, PSE-Cortex-Pro-24 practice materials can meet you.

Our company also arranges dedicated personnel to ensure the correctness of our PSE-Cortex-Pro-24 learning quiz. As you know, our PSE-Cortex-Pro-24 study materials are certified products and you can really use them with confidence. On one hand, our company always hire the most professional experts who will be in charge of compiling the content and design the displays. On the other hand, we will ask for some volunteers to study with our PSE-Cortex-Pro-24 learning prep to test the pass rate.

PSE-Cortex-Pro-24 Valid Dumps Files, PSE-Cortex-Pro-24 Vce Download

If you really want to pass the PSE-Cortex-Pro-24 exam faster, choosing a professional product is very important. Our PSE-Cortex-Pro-24 study materials can be very confident that we are the most professional in the industry's products. We are constantly improving and just want to give you the best PSE-Cortex-Pro-24 learning braindumps. And we have engaged for years to become a trustable study platform for helping you pass the PSE-Cortex-Pro-24 exam.

Palo Alto Networks Systems Engineer Professional - Cortex Sample Questions (Q163-Q168):

NEW QUESTION # 163

In addition to migration and go-live, what are two best-practice steps for migrating from SIEM to Cortex XSIAM? (Choose two.)

- A. Execution
- B. Certification
- C. Conclusion
- D. Testing

Answer: C,D

NEW QUESTION # 164

Which two types of indicators of compromise (IOCs) are available for creation in Cortex XDR? (Choose two.)

- **A. file path**
- **B. hash**
- C. hostname
- D. registry

Answer: A,B

NEW QUESTION # 165

What are two capabilities of a War Room? (Choose two.)

- A. create playbooks for orchestration
- **B. run ad-hoc automation commands**
- **C. act as an audit trail for an investigation**
- D. create widgets for an investigation

Answer: B,C

Explanation:

Reference: <https://www.paloaltonetworks.com/cortex/cortex-xsoar>

NEW QUESTION # 166

A customer has purchased Cortex Data Lake storage with the following configuration, which requires 2 TB of Cortex Data Lake to order:

support for 300 total Cortex XDR clients all forwarding Cortex XDR data with 30-day retention storage for higher fidelity logs to support Cortex XDR advanced analytics The customer now needs 1000 total Cortex XDR clients, but continues with 300 clients forwarding Cortex XDR data with 30-day retention.

What is the new total storage requirement for Cortex Data Lake storage to order?

- **A. 2 TB**
- B. 4 TB
- C. 8 TB
- D. 16 TB

Answer: A

Explanation:

Cortex Data Lake (now known as Strata Logging Service in some contexts, but still referred to as Cortex Data Lake for XDR purposes) is the cloud-based storage solution that supports Cortex XDR by storing endpoint telemetry, logs, and analytics data. The customer's storage needs depend on the number of Cortex XDR clients, the subset forwarding data, the retention period, and the type of data stored (e.g., higher fidelity logs for advanced analytics). Let's break down the problem step-by-step to determine the new storage requirement.

Initial Configuration:

- * Total Cortex XDR Clients: 300
- * Clients Forwarding Cortex XDR Data: 300 (all clients are forwarding data)
- * Retention Period: 30 days
- * Additional Requirement: Storage for higher fidelity logs to support Cortex XDR advanced analytics
- * Initial Storage Ordered: 2 TB

This configuration implies that 2 TB was sufficient to support 300 clients, all forwarding data, with a 30-day retention period, including the additional storage needed for advanced analytics logs.

New Configuration:

- * Total Cortex XDR Clients: 1,000
- * Clients Forwarding Cortex XDR Data: 300 (unchanged from the initial setup)
- * Retention Period: 30 days (unchanged)

* Additional Requirement: Storage for higher fidelity logs to support Cortex XDR advanced analytics (unchanged) The key change is the increase in total Cortex XDR clients from 300 to 1,000, but the number of clients forwarding data remains 300, and the retention period and analytics requirements are unchanged. We need to determine how this affects the storage requirement.

Cortex Data Lake Storage Sizing for Cortex XDR:

Palo Alto Networks provides sizing guidelines for Cortex Data Lake based on the number of endpoints forwarding data, the retention period, and the type of data stored. The storage requirement is primarily driven by:

* Clients Forwarding Data: Only the endpoints actively sending telemetry to Cortex Data Lake (e.g., Cortex XDR Pro endpoints with enhanced data collection) contribute significantly to storage needs.

* Retention Period: The number of days data is retained directly scales the storage requirement.

* Data Type: Higher fidelity logs for advanced analytics (e.g., XDR Pro features like behavioral analytics) increase storage per endpoint compared to basic logs.

* Cortex XDR Prevent: Provides basic endpoint protection with minimal data forwarding (e.g., alerts only), typically included in a 30-day retention baseline with minimal storage impact.

* Cortex XDR Pro: Includes enhanced endpoint data collection (e.g., process execution, network activity) for advanced analytics, significantly increasing storage needs when enabled.

The problem states that all 300 initial clients were forwarding data, and the same 300 continue to do so in the new setup, with support for advanced analytics. This suggests these are likely Cortex XDR Pro clients, as Pro is required for full telemetry and analytics capabilities.

Storage Calculation:

Palo Alto Networks doesn't publish exact per-endpoint storage figures publicly, but we can infer the requirement from the initial configuration and industry benchmarks:

* Initial Setup (300 Clients, 30 Days, 2 TB):

* 2 TB supports 300 clients forwarding data for 30 days with advanced analytics.

* Per client, this approximates to: $2 \text{ TB} \div 300 \text{ clients} = 0.00667 \text{ TB/client}$ $0.00667 \text{ TB} \div 300 \text{ clients} = 0.00667 \text{ TB/client}$ $2 \text{ TB} \div 300 \text{ clients} = 0.00667 \text{ TB/client}$ or 6.67 GB per client for 30 days with higher fidelity logs.

* This aligns with typical XDR Pro storage estimates, where enhanced data collection (e.g., 5-10 GB per endpoint per 30 days) is common depending on activity levels and analytics features.

* New Setup (1,000 Total Clients, 300 Forwarding, 30 Days):

* Clients Forwarding Data: Still 300, unchanged.

* Retention: Still 30 days, unchanged.

* Analytics Logs: Still required, unchanged.

* Storage is driven by the 300 clients forwarding data, not the total number of clients. The additional 700 clients (1,000 - 300 = 700) are not forwarding data, suggesting they might be on Cortex XDR Prevent licenses or not fully activated for data collection, contributing negligible storage (e.g., only alerts, which are minimal).

Thus, the storage requirement remains:

$300 \text{ clients} \times 6.67 \text{ GB/client} = 2,001 \text{ GB} \approx 2 \text{ TB}$

References:

Cortex XDR Documentation: Indicates that storage is calculated based on endpoints with data collection enabled, not total agents (e.g., docs-cortex.paloaltonetworks.com).

Cortex Data Lake Sizing: Palo Alto's sizing tools (e.g., Strata Logging Service Estimator) emphasize active data sources and retention, not total licenses.

Industry Norms: XDR solutions typically require 5-15 GB per endpoint per 30 days for advanced analytics, consistent with the 2 TB for 300 clients.

NEW QUESTION # 167

If you have a playbook task that errors out, where could you see the output of the task?

- A. War Room of the incident
- B. /var/log/messages
- C. Demisto Audit log
- D. Playbook Editor

Answer: A

NEW QUESTION # 168

.....

Our PSE-Cortex-Pro-24 guide tests can solve these problems perfectly, because our study materials only need little hours can be grasped. Once you use our PSE-Cortex-Pro-24 latest dumps, you will save a lot of time. High effectiveness is our great advantage. After twenty to thirty hours' practice, you are ready to take the real PSE-Cortex-Pro-24 Exam Torrent. The results will never let you down. You just need to wait for obtaining the certificate.

PSE-Cortex-Pro-24 Valid Dumps Files: <https://www.prep4king.com/PSE-Cortex-Pro-24-exam-prep-material.html>

(PSE-Cortex-Pro-24 exam study material) Recently, a research shows that many companies prefer the person who has passed exam and get a certification especially to those fresh graduates, So far, our latest PSE-Cortex-Pro-24 latest study questions will be the most valid and high quality training material for your preparation of the PSE-Cortex-Pro-24 actual test, Our PSE-Cortex-Pro-24 learning materials can assure you that you only need to spend twenty to thirty hours to pass the exam.

The role of storyboards and scenes, Check for issues, (PSE-Cortex-Pro-24 exam study material) Recently, a research shows that many companies prefer the person who has passed exam and get a certification especially to those fresh graduates.

Efficient Valid Dumps PSE-Cortex-Pro-24 Pdf & Passing PSE-Cortex-Pro-24 Exam is No More a Challenging Task

So far, our latest PSE-Cortex-Pro-24 Latest Study Questions will be the most valid and high quality training material for your preparation of the PSE-Cortex-Pro-24 actual test.

Our PSE-Cortex-Pro-24 learning materials can assure you that you only need to spend twenty to thirty hours to pass the exam, Even if the exam is very hard, many people still choose to sign up for the exam.

The Prep4King guarantees their customers that if they have prepared with Palo Alto Networks PSE-Cortex-Pro-24 practice test, they can pass the Palo Alto Networks PSE-Cortex-Pro-24 certification easily.
