### SAP Certified Application Associate - SAP Enable Now Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

Your customer has created a content structure that includes different languages, processes, roles and courses. The customer wants to grant access to the content via Library on a web server but does not know how to publish it as a single deployment without redundancies. Which solutions would you suggest? Note: There are 3 correct answers to this question.

- A. Distribute deep links to sub-trees of the structure for different target groups.
- B. Create and provide filters for the library before deploying the complete structure.
- C. Define Manager tags per target group and tag the content accordingly.
- D. Provide pre-filtered links to show only language-related content.
- E. Use the Included Dependent Objects option in the publishing rule wizard.

Answer: A,B,D

#### NEW QUESTION # 40

According to SAP best practice, why should you use the Web Assistant Editor? Note: There are 2 correct answers to this question.

- A. To translate content
- B. To maintain system meta-information
- C. To create context help and guided tours
- D. To perform basic text editing of tiles and bubbles

Answer: C,D

#### NEW QUESTION # 41

In Producer, what must you consider when you modify files manually (not using the GUI)? Note: There are 2 correct answers to this question.

## SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q12-Q17):

### NEW QUESTION # 12

Your company has a reporting page with features that have always been available. They recently added the ability for users to create their own reports. Not everyone uses the reporting tools, but they want to announce the new report creation feature for those who do use it. They will use a ShoutOut for this and only want to show it to users who use the tool. Under the ShoutOut's engagement tab, which auto-play option would be best?

- A. Play once a day
- B. **Play according to a rule**
- C. Auto-play
- D. Off(activate via a Launcher)

**Answer: B**

### NEW QUESTION # 13

Which steps would you take to publish items to Production that you add to the user-facing Menu in the Menu Organizer?

- A. Changing the name of an added item in the Menu Organizer publishes it to Production.
- B. Adding items to the user-facing Menu are automatically published to Production.
- C. Adding an item to the user-facing Menu and clicking Save automatically publishes it to Production.
- D. **Manually publishing the item to Production after adding it to the Menu Organizer and saving it.**

**Answer: D**

### NEW QUESTION # 14

How does WalkMe's Digital Experience Analytics (DXA) support organizations?

- A. By eliminating the need for employee training
- B. By creating new applications to replace existing ones
- C. **By tracking how users interact with predefined on-screen elements**
- D. By replacing all manual processes with automation

**Answer: C**

Explanation:

WalkMe's Digital Experience Analytics (DXA) supports organizations by tracking how users interact with predefined on-screen elements, such as buttons, forms, or pages. This provides insights into user behavior, friction points, and adoption gaps, enabling organizations to optimize processes and improve digital experiences. DXA integrates with WalkMe Insights to deliver actionable data.

The other options are incorrect:

- \* Replacing manual processes(A) is a benefit of automation, not DXA's primary role.
- \* Creating new applications(C) is outside WalkMe's scope.
- \* Eliminating training(D) is an exaggeration, as WalkMe supports training, not replaces it.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.1: Analytics Overview):

"Digital Experience Analytics (DXA) tracks user interactions with predefined elements, offering insights into engagement and pain points to enhance digital adoption." The course WalkMe Fundamentals explains:

"DXA helps organizations by monitoring how users interact with on-screen elements, providing data to identify inefficiencies and improve user experiences." Option B correctly describes DXA's support for organizations.

Course:WalkMe Fundamentals, Module 3: Analytics Capabilities.

### NEW QUESTION # 15

Your company has a reporting page with features that have always been available. They recently added the ability for users to create their own reports. Not everyone uses the reporting tools, but they want to announce the new report creation feature for those who do use it. They will use a ShoutOut for this and only want to show it to users who use the tool. Under the ShoutOut's engagement tab, which auto-play option would be best?

- A. Off(activate via a launcher)
- B. Play once a day
- **C. Play according to a rule**
- D. Auto-play

**Answer: C**

Explanation:

To target a ShoutOut to users who actively use the reporting tools, the best approach is to use thePlay according to a ruleoption in the ShoutOut's engagement tab. This allows Builders to define a segmentation rule (e.g., based on user behavior, such as having accessed the reporting page) to ensure the ShoutOut only appears to the relevant audience. This targeted approach avoids annoying non-users and maximizes the announcement's effectiveness for the intended group.

The other options are less suitable:

- \* Auto-play(B) displays the ShoutOut to all users on page load, regardless of their interaction with the reporting tools.
- \* Play once a day(C) also lacks targeting and may show to irrelevant users.
- \* Off(activate via a launcher)(D) requires manual user action, which may reduce visibility for the announcement.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.9:

ShoutOuts):

"The 'Play according to a rule' option in the ShoutOut engagement tab allows targeting specific user segments based on behavior or attributes, ensuring relevant delivery of announcements." The courseGetting Started with Building WalkMe Solutionsexplains: "For announcements like new feature releases to specific user groups, use 'Play according to a rule' to segment the audience, such as users who have interacted with a particular tool." Option A is the best auto-play option for this targeted ShoutOut.

Course:Getting Started with Building WalkMe Solutions, Module 6: Configuring ShoutOuts.

### NEW QUESTION # 16

What are the key capabilities of WalkMe's Analytics tools? Note: There are 3 correct answers to this question.

- **A. Providing real-time insights into software usage and process efficiency**
- B. Automatically deleting unused software from the tech stack
- **C. Tracking user engagement with on-screen guidance**
- D. Preventing users from accessing certain applications
- **E. Identifying workflow friction points and adoption gaps**

**Answer: A,C,E**

Explanation:

WalkMe's Analytics tools, primarily through Insights and Digital Experience Analytics (DXA),offer the following key capabilities:

\* Tracking user engagement with on-screen guidance(A): Measures how users interact with WalkMe content like Smart Walk-Thrus and ShoutOuts.

\* Identifying workflow friction points and adoption gaps(D): Pinpoints where users struggle or fail to adopt processes, enabling optimization.

\* Providing real-time insights into software usage and process efficiency(E): Delivers actionable data on how software is used, highlighting inefficiencies.

The other options are incorrect:

\* Automatically deleting unused software(B) is not a WalkMe capability; Discovery identifies, but doesn't delete.

\* Preventing access to applications(C) is not an analytics function; it's related to policy enforcement.

Extract from Official WalkMe Documentation:

According to the SAP WalkMe Digital Adoption Consultant Study Guide (Section 3.1: Analytics Overview):

"WalkMe Analytics tracks engagement with guidance, identifies friction points and adoption gaps, and provides real-time insights into software usage and efficiency." The course WalkMe Fundamentals states:

"Key analytics capabilities include monitoring user engagement, detecting workflow issues, and offering real-time data to improve process efficiency." Options A, D, and E are the key capabilities.
