

# Valid E-S4CPE-2405 Mock Test - E-S4CPE-2405 Reliable Exam Questions

2025 Latest PDFTorrent E-S4CPE-2405 PDF Dumps and E-S4CPE-2405 Exam Engine Free Share:  
[https://drive.google.com/open?id=1ISxWW2NiHR9BLGMIJv1y\\_WOFsYExRAWW](https://drive.google.com/open?id=1ISxWW2NiHR9BLGMIJv1y_WOFsYExRAWW)

PDFTorrent is not only a website but as a professional E-S4CPE-2405 Study Tool for candidates. Last but not least, we have advanced operation system of E-S4CPE-2405 training materials which not only can ensure our customers the fastest delivery speed but also can protect the personal information of our customers automatically. In addition, our professional after sale stuffs will provide considerate online after sale service twenty four hours a day, seven days a week for all of our customers.

## SAP E-S4CPE-2405 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>System Landscapes and Identity Access Management:</b> This section of the exam measures skills of system administrators and focuses on designing and managing SAP system landscapes while ensuring secure and efficient identity access management. It includes concepts related to system environments, user authentication, and authorization controls.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Extensibility, Integration, and Clean Core:</b> This section of the exam measures skills of integration specialists and involves understanding the principles of extending SAP functionality without compromising the clean core approach. It includes integrating SAP with other systems, maintaining system integrity, and ensuring sustainable customizations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops:</b> This section of the exam measures skills of project managers and emphasizes the importance of adopting a cloud-first approach when implementing SAP solutions. It also includes building the right implementation team and running fit-to-standard workshops to align system configuration with best practices and standard business processes.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Data Migration and Business Process Testing:</b> This section of the exam measures skills of SAP implementation consultants and covers the core principles of migrating data into SAP systems while ensuring that business processes run as intended. It involves understanding the methods for transferring data, verifying its accuracy, and executing process testing to confirm that the system meets operational requirements.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• <b>Configuration and the SAP Fiori Launchpad:</b> This section of the exam measures skills of application consultants and covers configuring SAP solutions to meet business needs, along with setting up and managing the SAP Fiori Launchpad. It also touches on customizing the user interface for an optimal and user-friendly experience.</li></ul>

## SAP - E-S4CPE-2405 –Efficient Valid Mock Test

Since inception, our company has been working on the preparation of E-S4CPE-2405 learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the E-S4CPE-2405 Exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our E-S4CPE-2405 actual exam.

### SAP Certified Specialist - Implementation Consultant - SAP S/4HANA Cloud Private Edition Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

Which tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Fiori extensibility apps
- B. SAP Business Application Studio
- C. SAP Build
- D. SAP Cloud SDK

**Answer: A,C**

Explanation:

SAP provides tools that enable non-developers to create low-code/no-code extensions, facilitating customization without extensive programming knowledge.

Option A: SAP Business Application Studio

This option is incorrect. SAP Business Application Studio is a development environment designed for professional developers, offering comprehensive coding capabilities.

Option B: SAP Build

This option is correct. SAP Build is a suite of low-code/no-code tools that allow business users to create applications, automate processes, and design business sites with minimal coding. It includes SAP Build Apps, SAP Build Process Automation, and SAP Build Work Zone.

Option C: SAP Fiori extensibility apps

This option is correct. SAP Fiori extensibility apps are key user tools embedded in SAP S/4HANA that enable non-developers to adapt and extend SAP applications, such as adding custom fields or creating custom business objects, using a low-code/no-code approach.

Option D: SAP Cloud SDK

This option is incorrect. SAP Cloud SDK is intended for professional developers to build extensions and applications on SAP Cloud Platform, requiring coding expertise.

In summary, SAP Build and SAP Fiori extensibility apps empower non-developers to create low-code/no-code extensions within SAP S/4HANA Cloud Private Edition.

#### NEW QUESTION # 45

Which analyses does the Custom Code Migration app deliver? Note: There are 2 correct answers to this question.

- A. Identifying SAP Fiori apps that best fit the customer's needs, based on historical transaction volume and usage
- B. Gathering the number of active business functions in the customer's system and whether they are compatible with SAP S/4HANA
- C. Checking customer-defined artifacts against the simplification database to analyze which items do NOT comply with SAP S/4HANA
- D. Gathering statistical information about development objects in the customer's system that need to be adapted

**Answer: C,D**

Explanation:

The Custom Code Migration app in SAP S/4HANA Cloud Private Edition supports system conversions by analyzing custom ABAP code for compatibility with S/4HANA. Let's analyze:

\* A. Gathering statistical information about development objects in the customer's system that need to be adapted: This is correct.

The app provides statistics on custom objects (e.g., programs, enhancements) in the customer's system, identifying those requiring adaptation due to S/4HANA's simplified data models or deprecated features.

\* B. Identifying SAP Fiori apps that best fit the customer's needs, based on historical transaction volume and usage: This is incorrect. This analysis is part of tools like the SAP Readiness Check or Fiori Apps Recommendation Report, not the Custom Code Migration app, which focuses on code compatibility.

\* C. Gathering the number of active business functions in the customer's system and whether they are compatible with SAP S/4HANA: This is incorrect. Business function compatibility is assessed via the SAP Readiness Check or Simplification Item Check, not the Custom Code Migration app, which targets custom code.

\* D. Checking customer-defined artifacts against the simplification database to analyze which items do NOT comply with SAP S/4HANA: This is correct. The app compares custom artifacts against the S/4HANA simplification database, flagging non-compliant items (e.g., obsolete transactions, tables) that need adjustment.

In summary, the Custom Code Migration app delivers A (Gathering statistical information about development objects) and D (Checking customer-defined artifacts against the simplification database).

### NEW QUESTION # 46

How do you set up SAP Test Automation by Tricentis for a customer?

- A. With an app in SAP Cloud ALM
- **B. With an app in SAP Business Technology Platform**
- C. With an API from the SAP Business Accelerator Hub
- D. With an integration package from SAP Signavio Process Navigator

**Answer: B**

Explanation:

SAP Test Automation by Tricentis is a cloud-based testing solution integrated with SAP S/4HANA Cloud Private Edition for automated testing. Let's evaluate how it's set up:

\* A. With an app in SAP Business Technology Platform: This is correct. SAP Test Automation by Tricentis is provisioned and configured through SAP Business Technology Platform (BTP) as part of the RISE with SAP offering. It integrates with SAP S/4HANA via a BTP app, enabling customers to set up automated test cases, execute them, and monitor results.

\* B. With an API from the SAP Business Accelerator Hub: This is incorrect. While APIs for testing might be available in the SAP Business Accelerator Hub, the setup of Tricentis involves a broader integration via BTP, not just an API.

\* C. With an app in SAP Cloud ALM: This is incorrect. SAP Cloud ALM manages test plans and manual testing but does not host or set up SAP Test Automation by Tricentis—it integrates with it via BTP.

\* D. With an integration package from SAP Signavio Process Navigator: This is incorrect. SAP Signavio focuses on process modeling, not test automation setup.

In summary, SAP Test Automation by Tricentis is set up A (With an app in SAP Business Technology Platform).

\* SAP Help Portal: "SAP BTP - Test Automation Integration" ([help.sap.com](https://help.sap.com))

### NEW QUESTION # 47

How are SAP Best Practices business processes activated in the SAP S/4HANA Cloud Private Edition production system?

- A. Through the SAP GUI
- **B. Through SAP Solution Builder**
- C. Through transports
- D. Through SAP Signavio Process Navigator

**Answer: B**

Explanation:

In SAP S/4HANA Cloud Private Edition, SAP Best Practices business processes are activated in the production system using the following tool:

Option A: SAP Signavio Process Navigator

This option is incorrect. SAP Signavio Process Navigator is used for process modeling and analysis, not for activating business processes in the production system.

Option B: Through transports

This option is incorrect. While transports are used to move configurations between systems, the activation of SAP Best Practices content is managed by a specific tool.

Option C: Through the SAP GUI

This option is incorrect. The SAP GUI is an interface for accessing SAP systems but does not directly handle the activation of Best Practices content.

Option D: SAP Solution Builder

This option is correct. SAP Solution Builder is utilized to activate SAP Best Practices content in the production system, ensuring that predefined business processes are correctly implemented.

Therefore, the activation of SAP Best Practices business processes in the SAP S/4HANA Cloud Private Edition production system is performed using SAP Solution Builder.

### NEW QUESTION # 48

How do you set up SAP Test Automation by Tricentis for a customer?

- A. With an API from the SAP Business Accelerator Hub
- **B. With an app in SAP Cloud ALM**
- C. With an app in SAP Business Technology Platform
- D. With an integration package from SAP Signavio Process Navigator

**Answer: B**

### NEW QUESTION # 49

.....

Elaborately designed and developed E-S4CPE-2405 test guide as well as good learning support services are the key to assisting our customers to realize their dreams. Our E-S4CPE-2405 study braindumps have a variety of self-learning and self-assessment functions to detect learners' study outcomes, and the statistical reporting function of our E-S4CPE-2405 test guide is designed for students to figure out their weaknesses and tackle the causes, thus seeking out specific methods dealing with them. Most of them give us feedback that they have learned a lot from our E-S4CPE-2405 Exam Guide and think it has a lifelong benefit. They have more competitiveness among fellow workers and are easier to be appreciated by their boss. In fact, the users of our E-S4CPE-2405 exam have won more than that, but a perpetual wealth of life.
