Fortinet EMEA Advanced Support Exam Certification Materials Can Alleviated Your Pressure from EMEA-Advanced-Support certification - PremiumVCEDump

Of course, when you are seeking for exam materials, it is certain that you will find many different materials. However, through investigation or personal experience, you will find PremiumVCEDump questions and answers are the best ones for your need. The candidates have not enough time to prepare the exam, while PremiumVCEDump certification training materials are to develop to solve the problem. So, it can save much time for us. What's more important, 100% guarantee to pass Fortinet EMEA-Advanced-Support Exam at the first attempt. In addition, PremiumVCEDump exam dumps will be updated at any time. If exam outline and the content change, PremiumVCEDump can provide you with the latest information.

Fortinet EMEA Advanced Support Exam Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which of the following are request methods in HTTP?

- A. HEAD
- B. LIST
- C. RETR
- D. GET

Answer: A,D

Explanation:

HTTP defines standard request methods, including GET (retrieve a resource) and HEAD (retrieve headers only). LIST and RETR are not standard HTTP methods; RETR is used in FTP, and LIST is not a recognized method in either protocol. The original document incorrectly lists only A, omitting C. Exact extract: "HTTP supports several request methods, including GET, HEAD, POST, PUT, DELETE, etc... GET retrieves a resource, while HEAD retrieves only the headers without the body content."

NEW QUESTION # 14

Which of the following protocols operates at Layer 4

- A. ARP
- B. BGP
- C. OSPF
- **D. IPSEC**

Answer: D

Explanation:

IPsec operates at Layer 4 (Transport Layer) in the OSI model, providing secure communication via protocols like ESP and AH, which work with TCP or UDP. BGP and OSPF are Layer 3 (Network Layer) routing protocols, and ARP operates at Layer 2 (Data Link Layer). Fortinet's FortiGate uses IPsec for VPNs at Layer

4. Exact extract: "IPsec operates at the Transport Layer (Layer 4) to secure communications, encapsulating TCP or UDP packets... BGP and OSPF function at the Network Layer, while ARP resolves IP to MAC addresses at the Data Link Layer."

NEW QUESTION # 15

Which parts of the IKE protocol below are responsible for authenticating the User (username/password) of a dialup IPsec tunnel? (Check all correct answers)

- A. IKEv1 phase1
- **B. IKEv1 Xauth**
- **C. IKEv2 EAP**
- D. IKEv1 phase2
- E. IKEv2 SA_INIT

Answer: B,C

Explanation:

For user authentication in dialup IPsec, IKEv1 uses XAuth (Extended Authentication) after Phase 1 for username/password. IKEv2 uses EAP (Extensible Authentication Protocol) for similar user auth. Phase 1 and SA_INIT are for peer auth, Phase 2 for child SA negotiation. Exact extract: XAuth increases security by requiring remote dialup client users to authenticate in a separate exchange at the end of phase 1. IPsec IKEv2 VPNs now support certificate authentication and EAP authentication at the same time from a dialup FortiClient. With the eap-cert-auth setting ... IPsec IKEv2 VPNs now support certificate authentication and EAP authentication at the same time from a dialup FortiClient. IPsec IKEv1 uses XAUTH for user authentication, and IPsec IKEv2 uses EAP for user authentication. Only EAP-TTLS is interoperable with LDAP. For LDAP based user ... In your scenario, the user cannot authenticate by providing both a PSK and their credentials (using one of multiple EAP methods).

NEW QUESTION # 16

Which command would you use to verify the status of an IPsec VPN tunnel on a FortiGate?

- A. diagnose ipsec status
- B. show crypto ipsec sa
- **C. diagnose vpn tunnel list**
- D. get vpn ipsec status

Answer: C

Explanation:

The 'diagnose vpn tunnel list' command on FortiGate displays detailed status information about IPsec VPN tunnels, including phase 1 and phase 2 states, uptime, and traffic statistics. Options B, C, and D are not valid FortiGate commands for this purpose. Exact extract: "Use diagnose vpn tunnel list to view the status of IPsec VPN tunnels, including phase 1 and phase 2 details, such as SA

status, uptime, and traffic counters."

NEW QUESTION # 17

Which protocols are used by an email client to retrieve emails?

- A. IMAP4
- B. POP3
- C. SMTP
- D. SNMP

Answer: A,B

Explanation:

Email clients use POP3 (Post Office Protocol) and IMAP4 (Internet Message Access Protocol) to retrieve emails from a server. POP3 downloads emails and typically removes them from the server, while IMAP4 allows synchronized access. SMTP is used for sending emails, and SNMP is for network monitoring, not email retrieval. Exact extract: "Email clients use POP3 or IMAP to retrieve email messages from a mail server... IMAP allows users to access and manage email directly on the server, while POP3 typically downloads messages to the client."

NEW QUESTION # 18

.....

It is certain that the pass rate among our customers is the most essential criteria to check out whether our EMEA-Advanced-Support training materials are effective or not. The good news is that according to statistics, under the help of our training materials, the pass rate among our customers has reached as high as 98% to 100%. And you can prepare for your EMEA-Advanced-Support Exam with under the guidance of our training materials anywhere at any time. Just take action to purchase we would be pleased to make you the next beneficiary of our EMEA-Advanced-Support exam practice.
