

Valid EMEA-Advanced-Support Test Syllabus & Authorized EMEA-Advanced-Support Pdf

P.S. Free 2025 Fortinet EMEA-Advanced-Support dumps are available on Google Drive shared by PDF4Test:
https://drive.google.com/open?id=1yK4dNy4whMqdGpB6QmY00oFu9-_te7yH

Our EMEA-Advanced-Support exam materials allows you to have a 98% to 100% pass rate; allows you takes only 20 to 30 hours to practice before you take the exam; provide you with 24 free online customer service; provide professional personnel remote assistance; give you full refund if you fail to pass the EMEA-Advanced-Support Exam. Our EMEA-Advanced-Support real test serve you with the greatest sincerity. Face to such an excellent product which has so much advantages, do you fall in love with our EMEA-Advanced-Support study materials now? If your answer is yes, then come and buy our EMEA-Advanced-Support exam questions now.

The price for EMEA-Advanced-Support exam torrent is quite reasonable, you can afford it no matter you are a student or you are an employee in the company. You just need to spend some money, and you can get a certificate. In addition, EMEA-Advanced-Support exam dumps are high-quality and accuracy, and you can pass the exam successfully by using them. We also pass guarantee and money back guarantee for your failure of the exam after using EMEA-Advanced-Support Exam Dumps. We offer you free update for 365 days after purchasing, and the update version will be sent to your email address automatically.

Authorized EMEA-Advanced-Support Pdf - Customized EMEA-Advanced-Support Lab Simulation

To be successful in your social life and own a high social status you must own good abilities in some area and plenty of knowledge. Passing the test EMEA-Advanced-Support exam can make you achieve those goals and prove that you are competent. Buying our

EMEA-Advanced-Support practice test can help you pass the EMEA-Advanced-Support Exam fluently and the learning costs you little time and energy. The questions and answers of our EMEA-Advanced-Support test question are chosen elaborately and to simplify the important information to make your learning relaxing and efficient.

Fortinet EMEA Advanced Support Exam Sample Questions (Q11-Q16):

NEW QUESTION # 11

What are the advantages of using a hub-and-spoke IPSec VPN configuration instead of a fully-meshed set of IPSec tunnels? (Select all that apply below)

- A. Using a hub and spoke topology provides stronger encryption.
- B. Using a hub and spoke topology is required to achieve full redundancy.
- C. Using a hub and spoke topology simplifies configuration because fewer tunnels are required.
- D. The routing table management is simpler because of fewer routes compared to a fully meshed node.

Answer: C,D

Explanation:

Hub-and-spoke IPsec VPN reduces the number of tunnels needed (one per spoke to hub instead of $n(n-1)/2$ in full mesh), simplifying configuration and routing tables with summarized routes at the hub. It does not inherently provide stronger encryption or require for redundancy (though can be made redundant). Exact extract: I want to have a way to quickly (preferably automated) setup VPN's to my 2 hubs from each spoke.

However we do not want/need VPNs between spokes. Hub Configuration: Configure the FortiGate unit as the hub. Set up IPsec VPN tunnels for each spoke. Use preshared keys for authentication. The purpose of this document is to describe the requirements and general information for building a Hub & Spoke architecture using FortiGate-VM on Oracle Cloud ... The remote sites do not need to have connectivity to each other nor does the customer want them to have connectivity to each other. Given these ... This article gives a brief configuration example from one spoke to other spoke using IPsec, through the Hub firewall.

NEW QUESTION # 12

What are source and destination MAC addresses of an ARP request?

- A. The source MAC is that of the sending device and the destination of the targeted device
- B. The source MAC is that of the sending device and the destination MAC is a broadcast address
- C. The source MAC is that of the sending device and the destination is a multicast address
- D. The source MAC is that of the forwarding switch and destination of the targeted device

Answer: B

Explanation:

An ARP (Address Resolution Protocol) request is broadcast to resolve an IP address to a MAC address. The source MAC is the sender's MAC address, and the destination MAC is the broadcast address (FF:FF:FF:FF:FF:FF) to reach all devices on the local network. Fortinet devices handle ARP for Layer 2 communication.

Options B, C, and D are incorrect as switches don't originate ARP requests, the target's MAC is unknown, and ARP uses broadcast, not multicast. Exact extract: "In an ARP request, the source MAC address is that of the sending device, and the destination MAC address is the broadcast address (FF:FF:FF:FF:FF:FF), sent to all devices in the local network segment."

NEW QUESTION # 13

Which FortiGate feature supports load balancing across multiple WAN links?

- A. Link Aggregation
- B. Multi-Path Routing
- C. Virtual Routing
- D. SD-WAN

Answer: D

Explanation:

FortiGate's SD-WAN feature enables load balancing and intelligent traffic steering across multiple WAN links based on criteria like bandwidth, latency, or application. Link Aggregation (B) bonds interfaces, Virtual Routing (C) is VRF, and Multi-Path Routing (D)

is not a standard term. Exact extract: "SD-WAN enables load balancing and traffic steering across multiple WAN links, optimizing performance and reliability based on configured rules and metrics."

NEW QUESTION # 14

Which FortiGate feature allows for dynamic routing protocol updates to be propagated through an IPsec VPN tunnel?

- A. Virtual Routing and Forwarding (VRF)
- **B. Auto Discovery VPN (ADVPN)**
- C. Route-based VPN
- D. Dynamic Routing Gateway

Answer: B

Explanation:

Auto Discovery VPN (ADVPN) in FortiGate enables dynamic routing protocols (e.g., OSPF, BGP) to propagate updates through IPsec VPN tunnels by automatically creating shortcut paths between spokes. This simplifies configuration and enhances scalability in hub-and-spoke topologies. Route-based VPN (D) supports routing but not dynamic discovery, VRF (C) is for segmentation, and Dynamic Routing Gateway (B) is not a standard Fortinet feature. Exact extract: "ADVPN allows dynamic routing protocols to be used over IPsec VPN tunnels, enabling spokes to discover and communicate directly via shortcuts, improving efficiency in hub-and-spoke setups."

NEW QUESTION # 15

Which FortiGate log type records denied traffic events?

- A. System Log
- B. Event Log
- C. Security Log
- **D. Traffic Log**

Answer: D

Explanation:

Traffic Logs in FortiGate record all traffic events, including denied packets, with details like source, destination, and policy ID. Security Logs (B) cover UTM events, Event Logs (C) system events, and System Logs (D) hardware or system status, not specifically denied traffic. Exact extract: "Traffic Logs record all packet activity, including allowed and denied traffic, with details such as source/destination IPs, ports, and the firewall policy applied."

NEW QUESTION # 16

.....

I want to share valid EMEA-Advanced-Support Latest Exam Cram review with you. If you are preparing for this exam, you can purchase our dumps for valid preparing plan. Everyone has potential. Our updated latest valid Fortinet EMEA-Advanced-Support exam cram review covers all exam questions of exam center which guarantee candidates to clear exam successfully and obtain certified certification. Facing pressure examinees should trust themselves, everything will go well.
