How to study the 1z0-591 Exam

There are two main types of resources for preparation of certification exams first there are the study guides and the books that are detailed and suitable for building knowledge from ground up then there are video tutorial and lectures that can somehow ease the

pain of through study and are comparatively less boring for some candidates yet these demand time and concentration from the learner. Smart Candidates who want to build a solid foundation in all exam topics and related technologies usually combine video lectures with study guides to reap the benefits of both but there is one crucial preparation tool as often overlooked by most candidates the practice exams. Practice exams are built to make students comfortable with the real exam environment. Statistics have shown that most students fail not due to that preparation but due to exam anxiety the fear of the unknown. Itexamguide expert team recommends you to prepare some notes on these topics along with it don't forget to practice **Oracle 1z0-591 Exam Dumps** which have been written by our expert team, Both these will help you a lot to clear this exam with good marks.

NEW QUESTION # 111

Which are the three types of tables available to physical tables in the physical layer?

- A. Stored Proc

- B. View
- C. Physical Table
- D. Select
- E. Table

Answer: A,C,D

Explanation:

Pull the table and column definition into the physical layer Use the OBIEE "import metadata" wizard to pull the table and column definition into the physical layer. The wizard is used so that all of the column definitions do not need to be manually added into the physical layer.

Figure: Note: The physical layer is the layer of the Logical Business Model where you define the physical data model of your data source. It contains information about the physical data sources.

NEW QUESTION # 112

There are two aggregate tables that are available for query. How would they be mapped into the logical data model so queries can use them?

- A. By creating two new logical tables sources
- B. By creating one new Logical Table Source
- C. By opening the two logical Table Source dialog boxes and mapping the appropriate levels in the Content tab
- D. Both A and B

Answer: C

Explanation:

Explanation

B: Example:

1. Configure the new source table to have the 'logical level' under the content set to 'Countries' (the summarized level)

b

2. Do the similar setting for dimension table

Now when user query the data at 'Countries' level, the query will be redirected to these summary table instead of the more detail fact table Note: Aggregate tables are Physical tables that store Aggregates of measures across multiple levels of a Hierarchy.
