What's more, part of that PrepAwayETE HPE0-V25 dumps now are free: <https://drive.google.com/open?id=1791mZH1QhfwccK2svDy6Mo6c2TX6cTb>

PrepAwayETE IT experts specialize in training way which is the latest short-term effective. This training method is very helpful to you and you can achieve the expected result. In particular, it brings convenience to these candidates both working and studying. To the best of our knowledge the information contained in this publication is accurate. PrepAwayETE HP HPE0-V25 Test Questions and test answers have an advantage over other products with the accuracy of 100%. You may be worried that our HPE0-V25 practice test is old version. Don't worry, Our PrepAwayETE HP HPE0-V25 exam dumps is the latest. Free update is for one year.

HPE0-V25 exam covers a wide range of topics, including understanding hybrid cloud solutions, designing hybrid cloud solutions, implementing and deploying hybrid cloud solutions, and managing and maintaining hybrid cloud solutions. HPE0-V25 Exam also evaluates the candidate's knowledge of HPE products such as HPE OneSphere, HPE SimpliVity, and HPE Helion.

Real and Updated HPE0-V25 Exam Questions

The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our HPE0-V25 exam torrent boosts timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our HPE0-V25 study questions have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents.

HPE Hybrid Cloud Solutions Sample Questions (Q41-Q46):

NEW QUESTION # 41

Match the preconfigured HPE workload Profile With Its definition.

| Profile | Definition |
|---------------------------------|---|
| General power efficient compute | This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads |
| IO throughput | This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance. |
| Graphics processing | It is intended for configurations that depend on maximum throughput between IO and memory. |
| Virtualization —Max Performance | This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory. |

Answer:

Explanation:

| Profile | Definition |
|---------------------------------|---|
| General power efficient compute | This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads |
| Virtualization —Max Performance | This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance. |
| IO throughput | It is intended for configurations that depend on maximum throughput between IO and memory. |
| Graphics processing | This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory. |

Explanation:

HPE workload profile is one of the HPE Intelligent System Tuning (IST) features and allows you to tune the resources in your HPE ProLiant server by choosing a preconfigured workload profile. The server will automatically configure the BIOS settings to match the selected workload12.

According to the information I found on the web, here is how you can match the preconfigured HPE workload profile with its definition:

General power efficient compute: This is a default out-of-the-box profile that uses the most common performance settings seen across most application workloads. It also enables power management settings that have minimal impact to overall performance. This profile is recommended for customers that do not typically tune their BIOS for their workload1.

IO throughput: This profile is intended for configurations that depend on maximum throughput between IO and memory. It disables power management settings that are known to have impact on maximum achievable bandwidth. It also applies settings that benefit NUMA awareness, as best throughput is achieved when the workload is also NUMA aware and optimized1.

Graphics processing: This profile is intended for configurations that use GPUs and depend on maximum bandwidth between IO and memory. It disables power management settings that are known to have impact on maximum achievable bandwidth. It also applies settings that benefit NUMA awareness, as best throughput is achieved when the workload is also NUMA aware and optimized1.

Virtualization -Max Performance: This profile setting will ensure that all available virtualization technologies are enabled and configured for maximum performance. It disables power management settings in favor of delivering maximum performance. Certain virtualization technologies can have possible performance impacts to nonvirtualized environments and can be disabled in other profiles

NEW QUESTION # 42

Drag and Drop Question

Match the RAID level with its capacity overhead. (Each option may be used once, more than once, or not at all.)

prepawayetc.com

| Answer Area | |
|---|--------|
| Capacity of one drive | RAID 1 |
| Capacity of two drives | RAID 0 |
| Zero overhead from capacity prospective | RAID 5 |
| | RAID 6 |

Answer:

Explanation:

prepawayetc.com

| Answer Area | |
|---|--------|
| Capacity of one drive | RAID 1 |
| Capacity of two drives | RAID 0 |
| Zero overhead from capacity prospective | RAID 5 |
| Capacity of one drive | RAID 6 |
| Capacity of two drives | |

NEW QUESTION # 43

Your customer wants to receive emails When a hardware event occurs on their HPE proLiant Gen10 server. Click where you can find the iLO management interface to set this option.

Information - iLO Overview

Server

| | |
|----------------------|---|
| Product Name | ProLiant DL360 Gen10 |
| Server Name | h5171.wsw.edunet.hpe.com |
| System ROM | U32 v2.62 (03/08/2022) |
| System ROM Date | 03/08/2022 |
| Redundant System ROM | U32 v2.50 (05/24/2021) |
| Server Serial Number | CZJ1410057 |
| Product ID | 867959-B21 |
| UUID | 39373638-3935-5A43-4A31-383130305337 |
| Remote Console | HTML5 <input checked="" type="checkbox"/> .NET <input type="checkbox"/> Java Web Start <input type="checkbox"/> |

iLO

| | |
|----------------------------|--------------------------|
| IP Address | 15.194.45.181 |
| Link-Local IPv6 Address | FE80:B67A:F1FF:FECE:1114 |
| iLO Hostname | h5181.wsw.edunet.hpe.com |
| iLO Dedicated Network Port | Enabled |
| iLO Shared Network Port | Disabled |
| iLO Virtual NIC | Disabled |
| License Type | iLO Advanced |
| iLO Firmware Version | 2.65 Feb 23 2022 |
| iLO Date/Time | Fri Jul 22 11:24:21 2022 |

Status

| | |
|---------------------------|-----------------------------|
| Server Health | OK |
| Health LED | OK |
| iLO Health | OK |
| iLO Security | Risk |
| Server Power | OFF |
| UID Indicator | UID OFF |
| Trusted Platform Module | Not Present |
| microSD Flash Memory Card | Not Present |
| Connection to HPE | Not registered |
| AMS | Not available |

Answer:

Explanation:

Explanation:

To set the email notification option, you need to go to the "Administration" tab and select the "Management" option. Then you need to enter the email address and SMTP server information in the "AlertMail" section and enable the "AlertMail" feature. You can also specify which events you want to receive emails for by selecting the appropriate severity level.

NEW QUESTION # 44

How does HPE GreenLake Central help organizations manage their hybrid cloud environments?

- A. By optimizing storage performance
- B. By automating server provisioning
- C. By providing a unified management interface

Answer: C

Explanation:

HPE GreenLake Central is a platform that helps organizations manage their hybrid cloud environments.

It provides a unified management interface, allowing organizations to manage their on-premises and cloud resources from a single location. It also provides visibility into resource usage, helping organizations optimize their cloud spend.

NEW QUESTION # 45

You are preparing a proposal to refresh your customer's existing DL380 G6 and G7 servers with newer generations. Before making a decision, your customer needs to know if a refresh is worth the cost.

Which option will show the value of the purchase to your customer?

- A. TCO/ROI Calculator
- B. Selective Storage Presentation
- C. Solution Sales Enablement Tool
- D. Smart CID

Answer: A

Explanation:

TCO/ROI Calculator: The Total Cost of Ownership (TCO) and Return on Investment (ROI) calculator provides a detailed financial analysis that compares the costs and benefits of maintaining existing servers versus investing in new hardware. It helps customers understand the long-term value and potential savings of upgrading to newer server generations.

HPE TCO/ROI Calculator

NEW QUESTION # 46

.....

Our HPE0-V25 study materials include 3 versions and they are the PDF version, PC version, APP online version. You can understand each version's merits and using method in detail before you decide to buy our HPE0-V25 learning guide. And the content of the three different versions is the same, but the displays are totally different according to the study interest and hobbies. And it is quite enjoyable to learn with our HPE0-V25 Exam Questions.
