Valid FCP_FMG_AD-7.4 Exam Notes & Examcollection FCP_FMG_AD-7.4 Dumps Torrent

In order to help you control the FCP_FMG_AD-7.4 examination time, we have considerably designed a special timer to help your adjust the pace of answering the questions of the FCP_FMG_AD-7.4 study materials. Many people always are stopped by the difficult questions. Then they will fall into thoughts to try their best to answer the questions of the FCP_FMG_AD-7.4 Real Exam. But they forgot to answer the other questions, our FCP_FMG_AD-7.4 training guide can help you solve this problem and get used to the pace.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q24-Q29):

NEW QUESTION # 24

Refer to the exhibit.

An administrator is about to add the FortiGate device to FortiManager using the discovery process.

FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result?

- A. During discovery, FortiManager uses only the FortiGate serial number to establish the connection.
- B. During discovery, FortiManager sets the NATed device IP address on FortiGate.
- C. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.
- D. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.

Answer: C

Explanation:

When adding a FortiGate device to FortiManager that is operating behind a NAT device, and the FortiManager NATed IP address is configured under the system administration settings, FortiManager will set the FortiManager NATed IP address on the FortiGate device during the discovery process. This ensures that the FortiGate knows how to reach the FortiManager through the NAT device.

Options A, B, and C are incorrect because:

* A is incorrect because the discovery process also requires knowing the NATed IP to establish a connection, not just the serial number.

* B is incorrect because FortiManager does not set the NAT device's IP address on the FortiGate.

* C is incorrect because it implies that the NAT device IP is set on FortiGate, which is not the expected outcome.

FortiManager References:

* Refer to FortiManager 7.4 Administrator Guide: Device Discovery and Management with NAT.

NEW QUESTION # 25

An administrator created a new global policy package that includes header and footer policies and then assigned it to an ADOM. What are two outcomes of this action? (Choose two.)

- A. After you assign the global policy package to an ADOM, the impacted policy packages become hidden in that ADOM.
- B. To assign another global policy package later to the same ADOM, you must unassign this policy first.
- C. You can edit or delete all the global objects in the global ADOM.
- D. You must manually move the header and footer policies after the policy assignment.

Answer: B,C

NEW QUESTION # 26

Refer to the exhibit.

The screenshot shows the FortiManager interface with the 'Meta Fields' tab selected. At the top, there are buttons for 'Create New', 'Edit', 'Delete', 'Collapse All', and 'Expand All'. Below this, a list of meta fields is shown, with 'Firewall Address' selected. Under 'Firewall Address', there are two sub-fields: 'ExternalSubnet' and 'InternalSubnet'. The 'Firewall Address' section is highlighted with a blue background.

Meta Fields
<input type="checkbox"/> Meta Fields
<input checked="" type="checkbox"/> Firewall Address (2)
<input type="checkbox"/> ExternalSubnet
<input type="checkbox"/> InternalSubnet

An administrator created two new meta fields in FortiManager.

Which operation can be performed with these parameters?

- A. You can add them to objects as custom attributes.
- B. You can use them as variables in scripts.
- C. You can export them to be used in other ADOMs.
- D. You can invoke them using the \$ character.

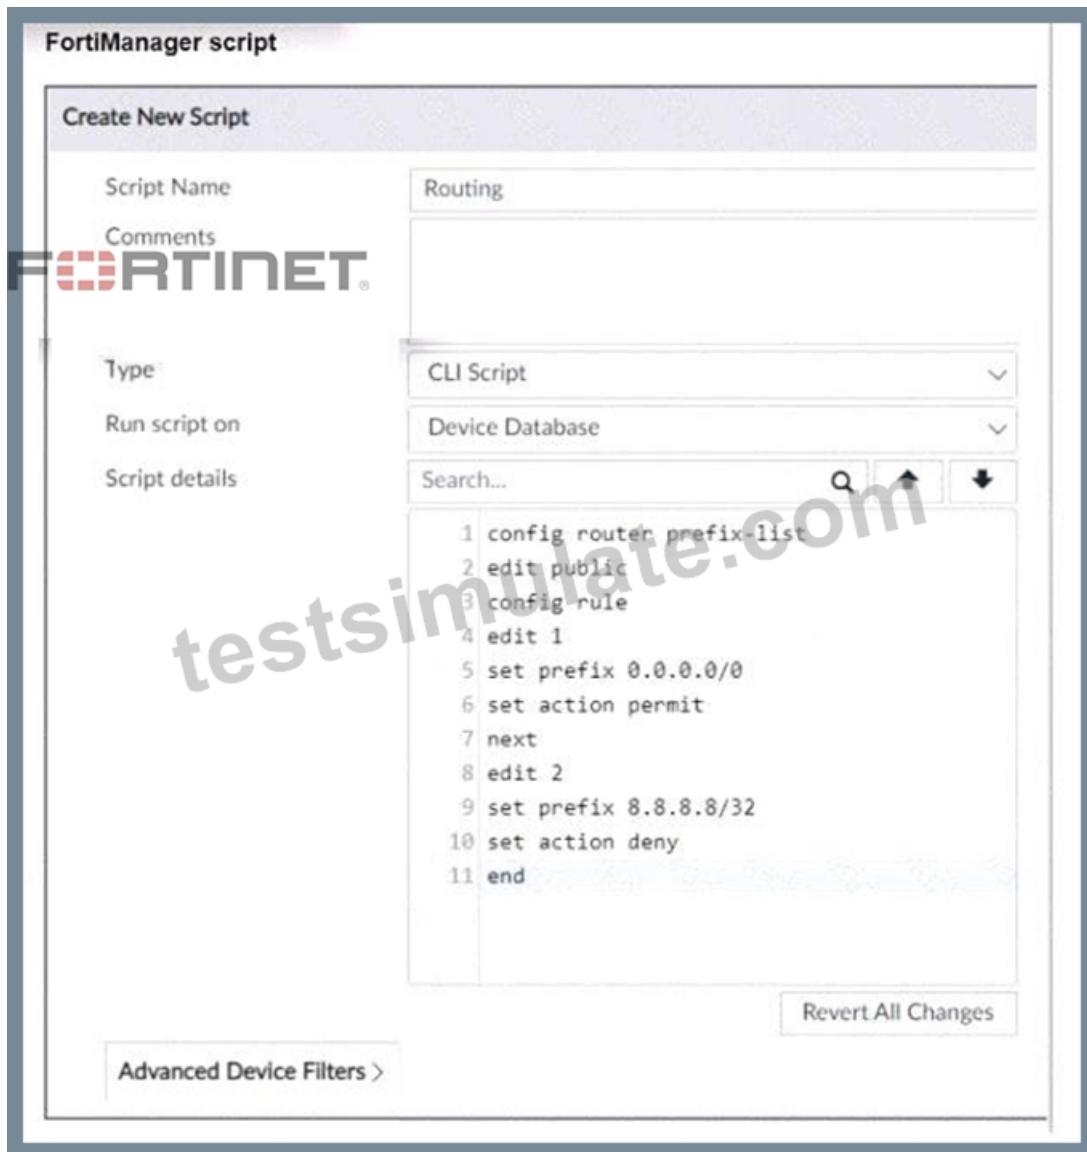

Answer: A

Explanation:

Meta fields in FortiManager can be used to add additional metadata or custom attributes to various objects, such as firewall addresses or other configuration objects. These meta fields help in organizing and identifying objects with custom information that is not part of the standard configuration. They are particularly useful for categorizing or tagging objects in large environments.

NEW QUESTION # 27

Refer to the exhibit.

Which two results occur if the script is run using the Device Database option? (Choose two.)

- A. You must install these changes on a managed device using the Install Wizard.
- B. The successful execution of a script on the Device Database creates a new revision history.
- C. The device Config Status is tagged as Modified.
- D. The script history shows successful installation of the script on the remote FortiGate device.

Answer: A,C

NEW QUESTION # 28

An administrator enabled workspace mode and now wants to delete an address object that is currently referenced in a firewall policy. Which two results can the administrator expect? (Choose two.)

- A. FortiManager will replace the deleted address object with the none address object in the referenced firewall policy.
- B. FortiManager will temporarily change the status of the referenced firewall policy to disabled.
- C. FortiManager will not allow the administrator to delete a referenced address object until they lock the ADOM.
- D. FortiManager will disable the status of the address object until the changes are installed.

Answer: A,C

NEW QUESTION # 29

.....

Fortinet FCP_FMGI_AD-7.4 certification exams are a great way to analyze and evaluate the skills of a candidate effectively. Big companies are always on the lookout for capable candidates. You need to pass the Fortinet FCP_FMGI_AD-7.4 Certification Exam to become a certified professional. This task is considerably tough for unprepared candidates however with the right FCP_FMGI_AD-7.4 prep material there remains no chance of failure.
