

Valid FCSS_SASE_AD-25 Test Practice, FCSS_SASE_AD-25 Exam Topic

BTW, DOWNLOAD part of ExamsTorrent FCSS_SASE_AD-25 dumps from Cloud Storage: <https://drive.google.com/open?id=1YIKBNi6GpZLtOvjzAO3iSXeTQri0Pfbk>

Our company was built in 2008 since all our education experts have more than ten years' experience in FCSS_SASE_AD-25 guide torrent. The most important characters we pay attention on are our quality and pass rate. We devote ourselves to improve passing rate constantly and service satisfaction degree of our FCSS_SASE_AD-25 training guide. And now you can find the data provided from our loyal customers that our pass rate of FCSS_SASE_AD-25 learning guide is more than 98%. You will successfully pass your FCSS_SASE_AD-25 exam for sure.

Fortinet FCSS_SASE_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.
Topic 2	<ul style="list-style-type: none">SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.

Topic 3	<ul style="list-style-type: none"> Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.
Topic 4	<ul style="list-style-type: none"> SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.

Quiz 2025 Valid FCSS_SASE_AD-25 Test Practice - FCSS - FortiSASE 25 Administrator Realistic Exam Topic

Our FCSS_SASE_AD-25 practice materials have picked out all knowledge points for you, which helps you get rid of many problems. In addition, time is money in modern society. It is important to achieve all things efficiently. So our FCSS_SASE_AD-25 study guide just needs less time input, which can suit all people's demands. In the meantime, all knowledge points of our FCSS_SASE_AD-25 Preparation questions have been adapted and compiled carefully to ensure that you absolutely can understand it quickly.

Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q35-Q40):

NEW QUESTION # 35

Refer to the exhibits.

Managed Endpoints

Endpoint	ZTNA Tags (Detailed)	Management Connection	Software OS	FortiClient Version
<input type="checkbox"/> Jumpbox	FortiSASE-Compliant	Online	Microsoft Windows 11 Professional Edition, 64-bit (build 26100)	7.2.8.1140
<input type="checkbox"/> Windows-AD	FortiSASE-Compliant	Online	Microsoft Windows Server 2019 Datacenter Edition, 64-bit (build 17763)	7.2.6.1076
	FortiSASE-Non-Compliant			

ZTNA Tagging Rules

Name

Enabled ☒

When the following rules match

<input type="checkbox"/>	Type	Parameters	Matching Criteria
<input checked="" type="checkbox"/>	Windows 1		
<input type="checkbox"/>	OS Version	<div>Windows 11</div> <div>Windows Server 2019</div>	At least one parameter must pass

Apply the following tag

Tag Name

Name

Enabled ☒

When the following rules match

<input type="checkbox"/>	Type	Parameters	Matching Criteria
<input checked="" type="checkbox"/>	Windows 1		
<input type="checkbox"/>	AntiVirus	<div>NOT AV Software is installed and running</div>	All parameters must pass

Apply the following tag

Jumpbox and Windows-AD are endpoints from the same remote location. Jumpbox can access the internet through FortiSASE, while Windows-AD can no longer access the internet.

Based on the information in the exhibits, which reason explains the outage on Windows-AD?

- A. The FortiClient version installed on Windows AD does not match the expected version on FortiSASE.
- B. Windows-AD is excluded from FortiSASE management.
- C. The remote VPN user on Windows-AD no longer matches any VPN policy.
- **D. The device posture for Windows-AD has changed.**

Answer: D

Explanation:

The Windows-AD endpoint now has both "FortiSASE-Compliant" and "FortiSASE-Non-Compliant" tags due to failing the antivirus software check. As a result, the Secure Internet Access Policy matches the "Non-Compliant" rule, which is set to Deny, causing the device to lose internet access.

NEW QUESTION # 36

Refer to the exhibit.

Source IP	User	Destination IP	Traffic Type	Application Name	Security Events
100.65.80.2	4ab96f9ff3ea52a	216.239.32.174	Internet Access	Google.Services	Web Filter Application Control
100.65.80.1	4b8fabe946f08a8	34.104.35.123	Internet Access	Google.Services	Web Filter Application Control

While reviewing the traffic logs, the FortiSASE administrator notices that the usernames are showing random characters. Why are the usernames showing random characters?

- A. FortiSASE uses FortiClient unique identifiers for usernames.
- **B. Log anonymization is turned on to hash usernames.**
- C. Users are using a shared single sign-on SSO username.
- D. Special characters are used in usernames.

Answer: B

Explanation:

The usernames appear as random character strings because log anonymization is enabled in FortiSASE, which hashes sensitive user information such as usernames to protect privacy while still allowing log analysis.

NEW QUESTION # 37

Refer to the exhibits.

Endpoint Profile

Vulnerability Dashboard

Vulnerability	Category	Severity	CVE	Patching status
FortiClient CVE-2024-50564 Information Disclosure Vulnerability	Applications	High	CVE-2024-50564	Manual patching required
OpenSSL CVE-2023-5678 Denial of Service Vulnerability	Applications	High	CVE-2023-5678	Manual patching required
Security Vulnerabilities fixed in VMware Workstation Player VMSA-2025-0004	Applications	High	CVE-2025-22226, CVE-20...	Manual patching required

How will the application vulnerabilities be patched, based on the exhibits provided?

- A. The vulnerability will be patched automatically based on the endpoint profile configuration.
- B. The end user will patch the vulnerabilities using the FortiClient software.
- C. The vulnerability will be patched by installing the patch from the vendor's website.
- D. An administrator will patch the vulnerability remotely using FortiSASE.

Answer: C

NEW QUESTION # 38

Refer to the exhibits.

Secure private access network connection

The screenshot shows the 'SECURE PRIVATE ACCESS NETWORK CONFIGURATION' page. The 'BGP Routing Design' section has two tabs: 'BGP per overlay' (selected) and 'BGP on loopback'. Below this, the 'BGP Router ID Subnet' is set to '10.12.11.0/24' and the 'Autonomous System Number (ASN)' is '65001'. The 'BGP Recursive Routing' toggle is turned off. The 'Hub Selection Method' section has two tabs: 'Hub Health and Priority' (selected) and 'BGP MED'. The 'Health Check IP' is set to '10.10.254'.

Secure private access service connection

The screenshot shows the 'UPDATE SECURE PRIVATE ACCESS SERVICE CONNECTION' page. The 'Name' field is 'To Hub'. The 'Remote Gateway' is '35.236.251.54'. The 'Authentication Method' section has two tabs: 'Pre-shared Key' (selected) and 'Certificate'. The 'BGP Peer IP' is '10.11.11.1' and the 'Network Overlay ID' is '100'.

Hub VPN configuration

```
# show vpn ipsec phase1-interface
config vpn ipsec phase1-interface
    edit "Hub"
        set type dynamic
        set interface "port2"
        set ike-version 2
        set peertype any
        set net-device disable
        set mode-cfg enable
        set proposal aes128-sha256 aes256-sha256 aes128gcm-prfsha256
            aes256gcm-prfsha384 chacha20poly1305-prfsha256
        set add-route disable
        set dpd on-idle
        set wizard-type hub-fortigate-auto-discovery
        set auto-discovery-sender enable
        set network-overlay enable
        set network-id 101
        set ipv4-start-ip 10.11.11.10
        set ipv4-end-ip 10.11.11.200
        set ipv4-netmask 255.255.255.0
        set psksecret ENC x
    next
end

# show vpn ipsec phase2-interface
config vpn ipsec phase2-interface
    edit "Hub"
        set phase1name "Hub"
        set proposal aes128-sha1 aes256-sha1 aes128-sha256 aes256-sha256
            aes128gcm aes256gcm chacha20poly1305
    next
end
```

Hub BGP configuration

```
# show router bgp
config router bgp
  set as 65001
  set router-id 10.1.0.254
  set ibgp-multipath enable
  set additional-path enable
  set cluster-id 10.1.0.254
  config neighbor-group
    edit "Hub"
      set capability-graceful-restart enable
      set link-down-failover enable
      set next-hop-self enable
      set interface "Hub"
      set remote-as 65001
      set additional-path both
      set adv-additional-path 4
      set route-reflector-client enable
    next
  end
  config neighbor-range
    edit 1
      set prefix 10.11.11.0 255.255.255.0
      set neighbor-group "Hub"
    next
  end
  config network
    edit 1
      set prefix 10.0.3.0 255.255.255.0
    next
  end
```

Hub Firewall Policies

```
# show firewall policy
edit 5
    set name "vpn_Hub_spoke2hub_0"
    set srcintf "Hub"
    set dstintf "port5"
    set action accept
    set srcaddr "all"
    set dstaddr "Hub_local"
    set schedule "always"
    set service "ALL"
    set logtraffic all
next
edit 6
    set name "vpn_Hub_spoke2spoke_0"
    set srcintf "Hub"
    set dstintf "Hub"
    set action accept
    set srcaddr "all"
    set dstaddr "all"
    set schedule "always"
    set service "ALL"
next
edit 8
    set name "Health Check Policy"
    set srcintf "Hub"
    set dstintf "HealthCheck"
    set action accept
    set srcaddr "all"
    set dstaddr "all"
    set schedule "always"
    set service "ALL"
next
end
```

A FortiSASE administrator is trying to configure FortiSASE as a spoke to a FortiGate hub.
The VPN tunnel does not establish.
Which configuration needs to be modified to bring the tunnel up?

- A. FortiSASE spoke devices do not support mode config.
- **B. The network overlay ID must match on FortiSASE and the hub.**
- C. The BGP router ID must match on the hub and FortiSASE.
- D. Auto-discovery-sender must be disabled on IPsec phase1 settings.

Answer: B

Explanation:

Fortinet documentation makes clear that overlay IDs must be identical on hub and spoke for ADVPN to establish correctly:

* "When configuring the root and downstream FortiGates the Fabric Overlay Orchestrator configures...

IPsec overlay configuration (hub and spoke ADVPN tunnels)."

- * "The Fabric root will be the hub and any first-level downstream devices from the Fabric root will be spokes." In the scenario:
- * FortiSASE overlay ID = 100
- * FortiGate hub overlay ID = 101

Mismatch prevents tunnel establishment. Therefore, the fix is: B. The network overlay ID must match on FortiSASE and the hub.

NEW QUESTION # 39

Which two are required to enable central management on FortiSASE? (Choose two.)

- A. FortiManager and FortiSASE registered under the same FortiCloud account.
- **B. The FortiManager IP address in the FortiSASE central management configuration.**
- C. FortiSASE central management entitlement applied to FortiManager.
- **D. FortiSASE connector configured on FortiManager.**

Answer: B,D

Explanation:

To enable central management, FortiManager must have a FortiSASE connector configured, and both FortiSASE and FortiManager must be registered under the same FortiCloud account to establish trust and synchronization.

NEW QUESTION # 40

.....

The world today is in an era dominated by knowledge. Knowledge is the most precious asset of a person. If you feel exam is a headache, don't worry. FCSS_SASE_AD-25 test answers can help you change this. FCSS_SASE_AD-25 study material is in the form of questions and answers like the real exam that help you to master knowledge in the process of practicing and help you to get rid of those drowsy descriptions in the textbook. FCSS_SASE_AD-25 Test Dumps can make you no longer feel a headache for learning, let you find fun and even let you fall in love with learning. The content of FCSS_SASE_AD-25 study material is comprehensive and targeted so that your learning is no longer blind. FCSS_SASE_AD-25 test answers help you to spend time and energy on important points of knowledge, allowing you to easily pass the exam.
