

Valid Forescout Certified Professional Exam test answers, valid FSCP exam dumps

Updated Forescout Certified Professional FSCP Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=fore-scout-certified-professional-fscp-certification-exam-educationry>

We provide the dumps in the format for your exam. This questions dumps format is fairly easy and it is suitable for smart devices. These actual questions and answers can easily be downloaded on the tablet, laptop or mobile and you can prepare Exam at your own convenience. When you have the exam dumps on your preferred device, then you are at ease of preparing for the exam at your own will.

You can use the latest and up-to-date real questions and answers for the Exam. If you want to have the understanding of different topics, then you need to use the best available practice dumps and this can help you in getting the Exam cleared with ease. These dumps always keep the exam syllabus up to date, and that is the reason all the actual questions and answers are up to date to give worry-free exam preparation to the candidates.

Exam dumps professionals are fully aware of the fact that the syllabus for Exam need to be up to date. Updates for 90 days are provided to the candidate to allow the candidate to prepare exam from the up-to-date dumps. Up-to-dumps let the candidates have the best preparation and get successfully through the Exam. You can download these dumps from our website at any time you want. If you are satisfied with our service, then don't hesitate to make a purchase by clicking on the link given above this paragraph. You can download this dump directly from our site and start practicing for your exam. You will get a dump file that contains questions with answers along with explanations for those questions. Do not waste your time looking for other websites where that charge money for their downloads or even worse sell their study material online! It is the best choice for you if you are looking for preparation material to pass the exam. All you need is an internet connection and an efficient digital device.

The price for the FSCP certification test's registration is somewhere around \$100 to \$1000. Thus, you would never risk your precious time and money. ExamCost offers a demo version of the Forescout Certified Professional Exam (FSCP) practice material which is totally free. You can try a free demo to make yourself more confident about the authenticity of the Forescout Certified Professional Exam (FSCP) product. After buying the FSCP material, you can instantly use it.

You only need 20-30 hours to practice our software and then you can attend the exam. You needn't spend too much time to learn our FSCP study questions and you only need spare several hours to learn our Forescout Certified Professional Exam guide torrent each day. Our FSCP study questions are efficient and can guarantee that you can pass the exam easily. For many people, they don't have enough time to learn the FSCP Exam Torrent. The in-service staff is both busy in their jobs and their family lives and for the students they may have to learn or do other things. But if you buy our FSCP exam torrent you can save your time and energy and spare time to do other things. Please trust us.

>>> Trustworthy FSCP Practice <<<

100% Pass Quiz 2025 High-quality Forescout Trustworthy FSCP Practice

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test FSCP certification can make them become that kind of people and if you are one of them buying our FSCP Study Materials will help you pass the test smoothly with few efforts needed. Our FSCP exam questions are valuable and useful and if you buy our product will provide first-rate service to you to make you satisfied.

Forescout Certified Professional Exam Sample Questions (Q58-Q63):

NEW QUESTION # 58

Select the action that requires symmetrical traffic.

- **A. Endpoint ACL**
- B. Assign to VLAN
- C. WLAN block
- D. Start SecureConnector
- E. Virtual Firewall

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Administration Guide and Switch Plugin documentation, the action that requires symmetrical traffic is the Endpoint Address ACL action (C).

What "Symmetrical Traffic" Means:

Symmetrical traffic refers to network traffic where CounterACT can monitor BOTH directions of communication:

* Inbound - Traffic from the endpoint

* Outbound - Traffic to the endpoint

This allows CounterACT to see the complete conversation flow.

Endpoint Address ACL Requirements:

According to the Switch Plugin documentation:

"The Endpoint Address ACL action applies an ACL that delivers blocking protection when endpoints connect to the network. Other benefits of Endpoint Address ACL include..." For the Endpoint Address ACL to function properly, CounterACT must:

* See bidirectional traffic - Monitor packets in both directions

* Apply dynamic ACLs - Create filtering rules based on both source and destination

* Verify endpoints - Ensure the endpoint IP/MAC matches expected patterns in both directions Why Symmetrical Traffic is Required:

According to the documentation:

Endpoint Address ACLs work by:

* Identifying the endpoint's MAC address and IP address through bidirectional observation

* Creating switch ACLs that filter based on the endpoint's communication patterns

* Verifying the endpoint is communicating in expected ways (symmetrically) Without symmetrical traffic visibility, CounterACT cannot reliably identify and apply address-based filtering.

Why Other Options Do NOT Require Symmetrical Traffic:

* A. Assign to VLAN - Only requires knowing the switch port; doesn't need traffic monitoring

* B. WLAN block - Works at the wireless access point level without needing symmetrical traffic observation

* D. Start SecureConnector - Deployment action that doesn't require traffic symmetry

* E. Virtual Firewall - Works at the endpoint level and can function with asymmetrical or passive monitoring Asymmetrical vs.

Symmetrical Deployment:

According to the administrative guide:

* Asymmetrical Deployment - CounterACT sees traffic from one direction only

* Used for passive monitoring of device discovery

* Sufficient for many actions

* Symmetrical Deployment - CounterACT sees traffic in both directions

* Required for endpoint ACL actions

* Necessary for accurate address-based filtering

Referenced Documentation:

* Endpoint Address ACL Action documentation

* ForeScout CounterACT Administration Guide - Switch Plugin actions

NEW QUESTION # 59

Policies will recheck when certain conditions are met. These may include...

- A. Policy categorization, admission event, action schedule activation
- **B. Policy recheck timer expires, admission event, SC event change**
- C. Admission event, policy categorization, SC event change
- D. Policy recheck timer expires, group name change, SC event change

- E. Admission event, group name change, Scope recheck timer expires

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Administration Guide, policies recheck when the following conditions are met: Policy recheck timer expires, admission event, or SC event change.

Policy Recheck Conditions:

According to the Main Rule Advanced Options documentation:

"By default, both matched endpoints and unmatched endpoints are rechecked every eight hours, and on any admission event."

Additionally, according to the documentation:

"You can also configure several recheck settings to work simultaneously. For example, when a host IP address changes every five hours, recheck settings can be configured for:

- * Policy recheck timer expires - Default 8 hours
 - * Admission events - Triggers like DHCP request, IP address change
 - * SC (SecureConnector) event change - When SecureConnector status changes"
- Three Main Policy Recheck Triggers:

According to the documentation:

- * Policy Recheck Timer Expires
- * Default: Every 8 hours
- * Can be customized (1 hour to infinite)
- * Applies to all endpoints matching or not matching the policy
- * Admission Event
- * DHCP Request
- * IP Address Change
- * Switch Port Change
- * Authentication event
- * VPN user connection
- * Immediate recheck when triggered
- * SC Event Change
- * SecureConnector deployed or removed
- * SecureConnector status changes (online/offline)
- * SecureConnector version changes

Why Other Options Are Incorrect:

- * A. Admission event, group name change, Scope recheck timer expires - Group name change is NOT a recheck trigger
- * C. Admission event, policy categorization, SC event change - Policy categorization is NOT a recheck trigger
- * D. Policy categorization, admission event, action schedule activation - Neither policy categorization nor action schedule activation triggers rechecks
- * E. Policy recheck timer expires, group name change, SC event change - Group name change does NOT trigger policy rechecks

Recheck Configuration:

According to the documentation:

"You can configure under what conditions to perform a recheck. By default, endpoints are rechecked every eight hours, and on any admission event. To define the recheck policy, you can configure:

- * Custom recheck interval (instead of 8 hours)
- * Which admission events trigger rechecks
- * Whether SecureConnector events trigger rechecks"

NEW QUESTION # 60

Place the DNS Enforce control actions into the correct workflow order for endpoints which have a pending control action.

E

First	Choose... Choose... Endpoint tries to access www.website.com CounterACT responds with HTTP redirect Endpoint requests the page from CounterACT CounterACT serves the captive portal DHCP assigns CounterACT as the DNS Server
Second	Choose... Choose... Endpoint tries to access www.website.com CounterACT responds with HTTP redirect Endpoint requests the page from CounterACT CounterACT serves the captive portal DHCP assigns CounterACT as the DNS Server
Third	Choose... Choose... Endpoint tries to access www.website.com CounterACT responds with HTTP redirect Endpoint requests the page from CounterACT CounterACT serves the captive portal DHCP assigns CounterACT as the DNS Server
Fourth	Choose... Choose... Endpoint tries to access www.website.com CounterACT responds with HTTP redirect Endpoint requests the page from CounterACT CounterACT serves the captive portal DHCP assigns CounterACT as the DNS Server
Fifth	Choose... Choose... Endpoint tries to access www.website.com CounterACT responds with HTTP redirect Endpoint requests the page from CounterACT CounterACT serves the captive portal DHCP assigns CounterACT as the DNS Server

Answer:

Explanation:

NEW QUESTION # 61

Which field in the User Directory plugin should be configured for Active Directory subdomains?

- A. Address
- B. Parent Groups
- C. Replicas
- D. DNS Detection
- E. Domain Aliases

Answer: E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout User Directory Plugin Configuration Guide - Microsoft Active Directory Server Settings, the field that should be configured for Active Directory subdomains is "Domain Aliases".

Domain Aliases for Subdomains:

According to the Microsoft Active Directory Server Settings documentation:

"Configure the following additional server settings in the Directory and Additional Domain Aliases sections:

Domain Aliases - Configure additional domain names that users can use to log in, such as subdomains." Purpose of Domain Aliases:

According to the documentation:

Domain Aliases are used to specify:

- * Subdomains - Alternative domain names like subdomain.company.com
- * Alternative Domain Names - Other domain name variations
- * User Login Options - Additional domains users can use to authenticate
- * Alias Resolution - Maps aliases to the primary domain

Example Configuration:

For an organization with the primary domain company.com and subdomain accounts.company.com:

- * Domain Field - Set to: company.com
- * Domain Aliases Field - Add: accounts.company.com

This allows users from either domain to authenticate successfully.

Why Other Options Are Incorrect:

- * A. Replicas - Replicas configure redundant User Directory servers, not subdomains
- * B. Address - Address field specifies the server IP/FQDN, not domain aliases
- * C. Parent Groups - Parent Groups relate to group hierarchy, not domain subdomains
- * E. DNS Detection - DNS Detection is not a User Directory configuration field

Additional Domain Configuration:

text

Primary Configuration:

```
## Domain: company.com
## Domain Aliases: accounts.company.com
# services.company.com
# mail.company.com
## Port: 636 (default)
```

Referenced Documentation:

- * Microsoft Active Directory Server Settings
- * Define User Directory Servers - Domain Aliases section

NEW QUESTION # 62

Which of the following User Directory server settings is necessary to enable guest approval by sponsors?

- **A. Sponsor Group**
- B. Guest password policy
- C. Guest Tags
- D. Policy to control
- E. Authentication Server

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

The Sponsor Group is the necessary User Directory server setting required to enable guest approval by sponsors. According to the Forescout User Directory Plugin Configuration Guide and Guest Management Portal documentation, Sponsor Groups must be created and configured to define the corporate employees (sponsors) who are authorized to approve or decline guest network access requests.

Sponsor Group Configuration:

In the Guest Management pane, the Sponsors tab is used to define the corporate employees who are authorized to log into the Guest Management Portal to approve network access requests from guests. These employees are assigned to specific Sponsor Groups, which control which sponsors can approve guest access requests.

How Sponsor Groups Enable Guest Approval:

- * Sponsor Definition - Corporate employees must be designated as sponsors and assigned to a Sponsor Group
 - * Approval Authority - Sponsors in assigned groups can approve or decline guest network access requests
 - * Authentication - When "Enable sponsor approval without authentication via emailed link" is selected, sponsors in the designated group can approve guests based on email link authorization
 - * Guest Registration - Guest registration options connect Sponsor Groups to the guest approval workflow
- Why Other Options Are Incorrect:
- * A. Policy to control - While policies are used for guest control, they do not define which sponsors can approve guests

- * B. Guest Tags - Guest Tags are used to classify and organize guest accounts, not to enable sponsor approval
- * D. Guest password policy - This setting controls password requirements for guests, not sponsor approval authority
- * E. Authentication Server - Authentication servers verify credentials but do not establish sponsor approval groups Referenced Documentation:
 - * Forescout User Directory Plugin Configuration Guide - Create Sponsors section
 - * Guest Management Portal - Sponsor Configuration documentation
 - * "Create sponsors" - Forescout Administration Guide section

NEW QUESTION # 63
