Although it is not an easy thing for most people to pass the exam, therefore, they can provide you with efficient and convenience learning platform, so that you can obtain as many certificates as possible in the shortest time. We provide all candidates with H12-831_V1.0-ENU test torrent that is compiled by experts who have good knowledge of exam, and they are very experience in compile study materials. Not only that, our team checks the update every day, in order to keep the latest information of H12-831_V1.0-ENU latest question. Once we have latest version, we will send it to your mailbox as soon as possible.

The H12-831_V1.0 exam is a challenging exam that requires a deep understanding of Huawei's datacom products and advanced networking concepts. It is an essential certification for IT professionals who want to demonstrate their expertise in this area and advance their careers. By passing the exam, professionals can prove their ability to design, deploy and manage complex networks using Huawei's advanced routing and switching technologies.

The Huawei H12-831_V1.0-ENU Exam covers a wide range of topics related to advanced routing and switching technologies, including network design, routing protocols, MPLS, VLANs, QoS, and more. Candidates will be expected to demonstrate a deep understanding of these concepts and their practical applications, as well as their ability to troubleshoot complex network issues.

Authoritative Valid H12-831_V1.0-ENU Mock Test & Passing H12-831_V1.0-ENU Exam is No More a Challenging Task

To get success in the Huawei H12-831_V1.0-ENU exam is not an easy task, it is quite difficult to pass it. But with proper planning, firm commitment, and Exam-Killer H12-831_V1.0-ENU Questions, you can pass this milestone easily. Exam-Killer is a leading platform that offers real, valid, and updated Huawei H12-831_V1.0-ENU Exam Dumps. With the Exam-Killer HCIP-Datacom-Advanced Routing & Switching Technology V1.0 (H12-831_V1.0-ENU) Questions you can easily prepare well for the final Huawei H12-831_V1.0-ENU exam and crack it easily.

The H12-831_V1.0 certification exam covers a range of topics, including advanced IP routing protocols, MPLS VPNs, and multicast routing technologies. It also tests candidates on their knowledge of advanced switching technologies, such as VLANs, STP, and link aggregation. H12-831_V1.0-ENU Exam is designed to test the candidate's ability to design, configure, and troubleshoot complex networks using these technologies.

Huawei HCIP-Datacom-Advanced Routing & Switching Technology V1.0 Sample Questions (Q78-Q83):

NEW QUESTION # 78

Which of the following is not included in OSPF Hello packets?

Options:

- A. Process ID
- B. Network Mask
- C. Area ID
- D. Router ID

Answer: A

Explanation:

Comprehensive and Detailed In-Depth Explanation:

* OSPF Hello packets are used to establish and maintain neighbor relationships between routers.

* Hello packets contain# Router ID - Unique identifier for the OSPF router.# Area ID - Defines the OSPF area to which the router belongs.# Network Mask - Helps ensure routers are on the same subnet.

* Process ID is NOT included because the OSPF Process ID is a local parameter used only within the router itself and is not exchanged between routers.

Reference: HCIP-Datcom Advanced Routing & Switching Technology - OSPF Packet Types

NEW QUESTION # 79

A network engineer entered the following information when troubleshooting OSPF faults. Based on this, you can judge what causes the adjacency relationship to fail to be established normally?

OSPF Process 1 with Router ID 10*0.12.2			
OSPF error statistics			
Interface: GigabitEthernet0/0/0 (10.0.122)			
General packet errors:			
0	Bad version	0	Bad checksum
0	Bad area id	0	Bad authentication type
0	Bad authentication key	0	Unknown neighbor
0	Bad net segment	0	Extern option mismatch
0	Router id confusion		
HELLO packet errors:			
2	Netmask mismatch	0	Hello timer mismatch
0	Dead timer mismatch	0	Invalid Source Address

- A. Authentication passwords do not match
- B. interfaceIPInconsistent address masks
- C. Hello timer mismatch
- D. Inconsistent area type

Answer: B

NEW QUESTION # 80

Engineer Guan used two routers to test IPv6 services. By running the BGP4+ module to communicate with the branch, as shown in Juxin, an engineer captured packets to view the Update packets sent by R1. Which of the following statements is true about the description of the message information?

- A. The next hop address of the route described in this packet is:2001:db8:2345::1
- B. This message describes only one BGP Attribute: Multi-protocol unreachable NLRI Attributes
- C. This message describes the current cancellation IPv6 routing
- D. The maximum and the preceding length of the routing address described in this packet is:2001:db8:2345::1/128

Answer: B,C,D

NEW QUESTION # 81

When a fault occurs, the fault can be classified to reduce the scope of fault location. Which of the following is not an interface configuration fault?

- A. IP address conflict
- B. The receiving and emitting power of both ends is inconsistent
- C. Inconsistent interface authentication
- D. The duplex modes of the interfaces on both ends are inconsistent

Answer: B

NEW QUESTION # 82

Network administrator A wants to use ACL to match specific routing entries. Which of the following routing entries will be matched by the ACL rules in the figure? (Multiple choice) acl number 2000 rule 10 permit source 10.0.0.0 0.0.6.0

- A. 10.0.0.0/24
- B. 10.0.2.0/24
- C. 10.0.0.1/32
- D. 10.0.1.0/24 :

Answer: A,B
