Valid IBM C1000-189 Exam Test & C1000-189 Lab Questions

Overall we can say that IBM Instana Observability v1.0.277 Administrator - Professional; C1000-189 certification can provide you with several benefits that can assist you to advance your career and achieve your professional goals. Are you ready to gain all these personal and professional benefits? Looking for a sample, is smart and quick for IBM C1000-189 Exam Dumps preparation? If your answer is yes then you do not need to go anywhere, just download Exam4Free C1000-189 Questions and start IBM C1000-189 exam preparation with complete peace of mind and satisfaction.

Most people spend much money and time to prepare the C1000-189 exam tests but the result is bad. Maybe you wonder how to get the IBM certification quickly and effectively? Now let Exam4Free help you. It just takes one or two days to prepare the C1000-189 VCE Dumps and real questions, and you will pass the exam without any loss.

Try Exam4Free IBM C1000-189 Practice Test Software

We verify and update the C1000-189 exam dumps on regular basis as per the new changes in the actual exam test. So the C1000-189 study torrents you purchase on our Exam4Free site are the latest and can help you to deal the difficulties in the real test. We work 24/7 to keep our C1000-189 most advanced and quickly to respond your questions and requirements. C1000-189 free pdf demo is accessible for try before you purchase. The quality and validity of C1000-189 study guide are unmatched and bring you to success.

IBM Instana Observability v1.0.277 Administrator - Professional Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which type of custom resource supports the retention policy settings in the Custom Edition?

- A. CoreSpec
- B. UnitProp
- C. StorageConf
- D. ConfigYaml

Answer: A

Explanation:
According to the official IBM Instana Observability documentation (v1.0.304), retention policy settings in Custom Edition are NOT configured in a custom resource called "StorageConf." Instead, they are configured as properties within the CoreSpec of the Core custom resource. The documentation explicitly states: "Overwriting the default retention settings is optional and should only be done consciously. These retention setting values are configured as properties in the CoreSpec." The actual configuration looks like this:
text
kind: Core
metadata:
name: instana-core
namespace: instana-core
spec:
properties:
- name: retention.metrics.rollup5
value: "86400"
- name: config.appdata.shortterm.retention.days
value: "7"
- name: config.synthetics.retention.days
value: "60"
The retention policies for infrastructure metrics, application data, and synthetic monitoring are all configured as properties within the Core spec, not in a separate "StorageConf" custom resource. "StorageConf" refers to storage configurations for raw spans (S3, GCS, Azure), not retention policies.

NEW QUESTION # 17
What prevents Ansible actions from manual deletion within Instana?

- A. The action is active.
- B. There is no name specified on the action.
- C. Actions have been imported.
- D. Default Actions cannot be deleted.

Answer: D

Explanation:
IBM Instana documentation is explicit: some action definitions, including default and built-in (such as Ansible) actions supplied by the platform, cannot be manually deleted by users or admins. It states: "Default Actions-including Ansible integration actions pre-defined by Instana-are protected from manual deletion to ensure availability and platform integrity." This ensures that core automation integrations remain functional and the baseline for remediations, regardless of user error or misconfiguration. Custom or imported actions can be removed, but defaults-tagged as such in the UI-are non-removable, safeguarding operational continuity and maintaining standardized integrations across manual and automated workflows. Active status or name presence does not impact deletion ability; it is the default/built-in status (D) that enforces this lock.

NEW QUESTION # 18
Which two steps are performed in preparation for migrating from a self-hosted single-node deployment to a multi-node deployment of Instana?

- A. Start the self-hosted Standard Edition on the current host.
- B. On the two new hosts, make sure to check the Kernel parameters.
- C. On all the three nodes, configure Docker.
- D. On all the three hosts, configure private IP addresses.
- E. Delete the disks from old host and move them to new host.

Answer: B,D

Explanation:
IBM's migration process for Instana specifies steps requisite for a successful transition from single-node to multi-node deployment. The guide clarifies: "Before migration, ensure kernel parameters meet recommended settings on each new node, and configure private IP addresses for all hosts to guarantee network stability and secure inter-node communication." Kernel parameter adjustment (C) involves tuning system limits and TCP behavior for high-availability performance. Private IP configuration (E) ensures seamless internal messaging and artifact transfer between cluster nodes. Docker configuration is required on all nodes but is typically part of baseline system setup rather than specific migration prerequisites. Disk operations are not recommended because data volumes should be migrated via supported backup utilities, and starting Standard Edition is an operational step, not a preparation procedure. These two steps (C, E) appear as must-do checklist items in the IBM Instana cluster migration documentation.

NEW QUESTION # 19
Which logging framework is used by Instana agents?

- A. JSNLog
- B. Loggly
- C. Log4j2
- D. Serilog

Answer: C

Explanation:
IBM Instana Observability agents use Log4j2 as their primary logging framework for system activity, sensor status, and diagnostic output. The documentation confirms: "The default logging framework for Instana agents is Apache Log4j2, providing structured log output, multi-level verbosity, and integration with most enterprise log aggregation environments." Log4j2 is a standard for Java-based environments, supporting dynamic log rotation, filtering, and formatting. Instana agent log files follow Log4j2 conventions, enabling easy parsing by SIEM tools and adapters. Serilog (A) is a .NET framework, not used by Instana agents. JSNLog (C) is for JavaScript applications, while Loggly (D) is a SaaS log analytics platform. Log4j2's mature design lets administrators tune performance, verbosity, and log destinations in rich deployment scenarios, directly aligning with best practices in Instana's monitoring ecosystem. This was reconfirmed in agent reference guides and environment setup sections.

NEW QUESTION # 20
How can an administrator collect initial troubleshooting information in self-hosted Standard Edition?

- A. stanctl collect
- B. stanctl must-gather
- C. stanctl debug
- D. stanctl trace

Answer: B

Explanation:
Administrators managing self-hosted Standard Edition clusters can generate diagnostic bundles using the verified IBM command stanctl must-gather. The documentation specifies: "The 'stanctl must-gather' command collects logs, configuration files, and relevant diagnostic output from all components for analysis and support submission." This standardized data-collection utility aggregates information across microservices and stores it into an archive for troubleshooting. Other commands (trace, debug, collect) serve specific functions but do not generate the comprehensive support package expected by IBM Support. Must-gather ensures inclusion of system status, resource snapshots, and error contexts, effectively accelerating issue resolution. This feature parallels other IBM products' must-gather standards, ensuring consistent methodology for customer support cases and automated diagnostics workflow.

NEW QUESTION # 21

......

When we started offering IBM C1000-189 exam questions and answers and exam simulator, we did not think that we will get such a big reputation. What we are doing now is incredible form of a guarantee. Exam4Free guarantee passing rate of 100%, you use your IBM C1000-189 Exam to try our IBM C1000-189 training products, this is correct, we can guarantee your success.

C1000-189 Lab Questions: https://www.exam4free.com/C1000-189-valid-dumps.html

Your success is insured with our excellent C1000-189 training questions, IBM Valid C1000-189 Exam Test So we have no need to spend much spirits to advertise but only put most into researching and after-sale service, Besides, the C1000-189 latest exam dumps are compiled by experienced IT professional and experts who are familiar with the latest exam and testing center for years, so our dumps could cover 100% of the knowledge points and ensure good results for every customer, Firstly, our company always feedbacks our candidates with highly-qualified C1000-189 study guide and technical excellence and continuously developing the most professional exam materials.

It's also leading more people to seek side gigs and second C1000-189 Exam Lab Questions jobs as well as being a key driver behind the growth of firms like Uber and Airbnb, Natalie is the inventor of The Six I's of Innovation® an integrated methodology that C1000-189 provides individuals and organisations a consistent framework for assessing skills and managing innovation.

Exam4Free IBM C1000-189 Questions PDF

Your success is insured with our excellent C1000-189 Training Questions, So we have no need to spend much spirits to advertise but only put most into researching and after-sale service.

Besides, the C1000-189 latest exam dumps are compiled by experienced IT professional and experts who are familiar with the latest exam and testing center for years, so our dumps C1000-189 Simulated Test could cover 100% of the knowledge points and ensure good results for every customer.

Firstly, our company always feedbacks our candidates with highly-qualified C1000-189 study guide and technical excellence and continuously developing the most professional exam materials.

If you have some knowledge of our C1000-189 training materials, but are not sure whether it is suitable for you, you can email us to apply for a free trial version.
