ISC2 CC Exam Questions With 100% Correct Answers 2024

What is MAC (Mandatory Access Control)? - Correct Answer-
The operating system determines who gets access to resources. Much more restricted, not used as much.

Which of the following is a detection control?:

Bollards
Turnstiles
Firewalls

Smoke sensors - Correct Answer-Smoke sensors. By definition, smoke detectors are fire protection devices employed for the early detection of fire. Firewalls are devices that filter incoming traffic, and are a type of logical preventive control. Bollards and turnstiles are types of physical preventive controls.

Which of the following is NOT an ethical canon of the ISC2?

-Advance and protect the profession
-Act honorably, honestly, justly, responsibly and legally

ISC CC PDF Dumps - Effective Tips To Pass

Life is full of ups and downs. We cannot predicate what will happen in the future. To avoid being washed out by the artificial intelligence, we must keep absorbing various new knowledge. Our CC learning questions will inspire your motivation to improve yourself. Tens of thousands of our loyal customers are benefited from our CC Study Materials and lead a better life now after they achieve their CC certification.

ISC CC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Security Principles: This section of the exam measures skills of Security Analysts and Information Assurance Specialists and covers fundamental security concepts such as confidentiality, integrity, availability, authentication methods including multi-factor authentication, non-repudiation, and privacy. It also includes understanding the risk management process with emphasis on identifying, assessing, and treating risks based on priorities and tolerance. Candidates are expected to know various security controls, including technical, administrative, and physical, as well as the ISC2 professional code of ethics. Governance processes such as policies, procedures, standards, regulations, and laws are also covered to ensure adherence to organizational and legal requirements.
Topic 2	<ul style="list-style-type: none"> Network Security: This domain assesses the knowledge of Network Security Engineers and Cybersecurity Specialists. It covers foundational computer networking concepts including OSI and TCP IP models, IP addressing, and network ports. Candidates study network threats such as DDoS attacks, malware variants, and man-in-the-middle attacks, along with detection tools like IDS, HIDS, and NIDS. Prevention strategies including firewalls and antivirus software are included. The domain also addresses network security infrastructure encompassing on-premises data centers, design techniques like segmentation and defense in depth, and cloud security models such as SaaS, IaaS, and hybrid deployments.
Topic 3	<ul style="list-style-type: none"> Business Continuity (BC), Disaster Recovery (DR) & Incident Response Concepts: This domain targets Business Continuity Planners and Incident Response Coordinators. It focuses on the purpose, importance, and core components of business continuity, disaster recovery, and incident response. Candidates learn how to prepare for and manage disruptions while maintaining or quickly restoring critical business operations and IT services.
Topic 4	<ul style="list-style-type: none"> Security Operations: This area targets Security Operations Center (SOC) Analysts and System Administrators. It covers data security with encryption methods, secure handling of data including classification and retention, and the importance of logging and monitoring security events. System hardening through configuration management, baselines, updates, and patching is included. Best practice security policies such as data handling, password, acceptable use, BYOD, change management, and privacy policies are emphasized. Finally, the domain highlights security awareness training addressing social engineering awareness and password protection to foster a security-conscious organizational culture.
Topic 5	<ul style="list-style-type: none"> Access Control Concepts: This section measures skills of Access Control Specialists and Physical Security Managers in understanding physical and logical access controls. Topics include physical security measures like badge systems, CCTV, monitoring, and managing authorized versus unauthorized personnel. Logical access control concepts such as the principle of least privilege, segregation of duties, discretionary access control, mandatory access control, and role-based access control are essential for controlling information system access.

ISC Certified in Cybersecurity (CC) Sample Questions (Q235-Q240):

NEW QUESTION # 235

A _____ is a record of something that has occurred.

- A. Biometric
- B. Firewall
- C. Log
- D. Law

Answer: C

NEW QUESTION # 236

What is meant by non-repudiation?

- A. It is part of the rules set by administrative controls.

- B. If a user does something, they can't later claim that they didn't do it.
- C. It is a security feature that prevents session replay attacks.
- D. Controls to protect the organization's reputation from harm due to inappropriate social media postings by employees, even if on their private accounts and personal time.

Answer: B

NEW QUESTION # 237

Which aspect of cybersecurity is MOST impacted by Distributed Denial of Service (DDoS) attacks?

- A. Confidentiality
- B. Non-repudiation
- C. Integrity
- D. Availability

Answer: D

NEW QUESTION # 238

Exhibit.

Symmetric Encryption	(ISC)² Asymmetric Encryption
<ul style="list-style-type: none">• Symmetric encryption consists of one key for encryption and decryption.• Symmetric Encryption is a lot quicker compared to the Asymmetric method.	<ul style="list-style-type: none">• Asymmetric Encryption consists of two cryptographic keys known as Public Key and Private Key. As Asymmetric Encryption incorporates two separate keys, the process is slowed down considerably.
<ul style="list-style-type: none">• RC4• AES• DES• 3DES• QUAD	<ul style="list-style-type: none">• RSA• Diffie-Hellman• ECC• El Gamal• DSA

How many keys would be required to support 50 users in an asymmetric cryptography system?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

NEW QUESTION # 239

Tekila works for a government agency. All data in the agency is assigned a particular sensitivity level, called a "classification." Every person in the agency is assigned a "clearance" level, which determines the classification of data each person can access. What is the access control model being implemented in Tekila's agency?

- A. DAC (discretionary access control)
- B. MAC (mandatory access control)
- C. FAC (formal access control)
- D. RBAC (role-based access control)

Answer: B

NEW QUESTION # 240

.....

The advent of our ISC CC study guide with three versions has helped more than 98 percent of exam candidates get the certificate successfully. Rather than insulating from the requirements of the Certified in Cybersecurity (CC) CC Real Exam, our CC practice materials closely co-related with it.
