ISO-IEC-27001-Foundation Valid Dumps Pdf & ISO-IEC-27001-Foundation Vce Download

The ISO-IEC-27001-Foundation exam question offer a variety of learning modes for users to choose from, which can be used for multiple clients of computers and mobile phones to study online, as well as to print and print data for offline consolidation. For any candidate, choosing the ISO-IEC-27001-Foundation question torrent material is the key to passing the exam. Our study materials can fully meet all your needs: Avoid wasting your time and improve your learning efficiency. Spending little hours per day within one week, you can pass the exam easily. You will don't take any risks and losses if you purchase and learn our ISO-IEC-27001-Foundation Latest Exam Dumps, do you?

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

To whom does the scope of the Terms and conditions of employment control apply?

- A. Contractors only
- B. Personnel and the organization
- C. Employees only
- **D. All employees, contractors and third-party users**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

NEW QUESTION # 48

Which action is an organization required to take to ensure that personnel are competent to perform their assigned tasks within the ISMS?

- A. Ensure all personnel are trained to ISO/IEC 27001 Foundation level
- B. Ensure that the controls for compliance with legal and contractual requirements are implemented
- C. Identify products which could be used in the organization to improve ISMS performance and effectiveness
- **D. Hold up-to-date records on training, skills, experience and qualifications**

Answer: D

Explanation:

Clause 7.2 (Competence) requires the organization to:

* "determine the necessary competence of person(s) doing work under its control that affects its information security performance;"

* "ensure that these persons are competent on the basis of appropriate education, training, or experience;"

* "retain appropriate documented information as evidence of competence." This makes holding up-to-date records on training, skills, experience, and qualifications (D) the correct answer. Option A is irrelevant to competence. Option B is incorrect since ISO does not require Foundation-level training - competence is context-based. Option C is related to compliance but does not ensure individual competence.

Thus, the verified correct answer is D.

NEW QUESTION # 49

What activity is done first when preparing for an initial certification audit?

- A. Provide evidence that nonconformities from an internal audit have been actioned
- **B. Agree the scope of the ISMS with the Certification Body auditor**
- C. Provide documents to the Certification Body auditor for the Stage 1 audit
- D. Provide records to the Certification Body auditor for the Stage 2 audit

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001:2022 standards and certification guidance:

Before a certification audit can begin, the scope of the ISMS must be clearly defined and agreed with the Certification Body.

ISO/IEC 27001 Clause 4.3 requires: "The scope shall be available as documented information." Certification Bodies require this scope statement to plan audit duration, resources, and coverage. Only after the scope is agreed does the Stage 1 audit begin, which reviews documented information and readiness. Stage

2 focuses on implementation and effectiveness. Evidence of corrective actions (C) is checked at Stage 2 if issues were identified earlier. Records provision (D) occurs during Stage 2, not first.

Thus, the first step in preparing for certification is A: Agreeing the scope of the ISMS with the Certification Body auditor.

NEW QUESTION # 50

Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Auditors who audit each area of operation
- **B. Top management of the organization**
- C. Management responsible for each area of operation
- D. ISO/IEC 27001 practitioners within the organization

Answer: B

Explanation:

Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

NEW QUESTION # 51

Which statement about the conduct of audits is true?

- A. Third party audits are conducted by a customer of the organization
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- C. During Stage 1 of a certification audit, evidence is collected by observing activities
- **D. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**

Answer: D

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is

primarily documentation and readiness review, not evidence observation.
Therefore, the verified correct answer is C.

NEW QUESTION # 52

.....

It is known to us that having a good job has been increasingly important for everyone in the rapidly developing world; it is known to us that getting a ISO-IEC-27001-Foundation certification is becoming more and more difficult for us. If you are worried about your job, your wage, and a ISO-IEC-27001-Foundation certification, if you are going to change this, we are going to help you solve your problem by our ISO-IEC-27001-Foundation Exam Torrent with high quality, now allow us to introduce you our ISO-IEC-27001-Foundation guide torrent. I promise you will have no regrets about reading our introduction.
