NEW QUESTION # 149

A developer creates a simple webpage with an input field. When a user enters text in the input field and clicks the button, the actual value of the field must be displayed in the console.

Here is the HTML file content:

```
<input type="text" value="Hello" name="input">
```

```
<button type="button">Display </button>
```

 The developer wrote the javascript code below:

```
Const button = document.querySelector('button');
```

```
button.addEventListener('click', () => (
```

```
Const input = document.querySelector('input');
```

```
console.log(input.getAttribute('value'));
```

When the user clicks the button, the output is always "Hello".

What needs to be done to make this code work as expected?

- A. **Replace line 04 with console.log(input .value);**
- B. Replace line 02 with button.addEventListener("onclick", function() {
- C. Replace line 03 with const input = document.getElementById('input');
- D. Replace line 02 with button.addCallback("click", function() {

Answer: A

NEW QUESTION # 150
