

Valid L3M6 Exam Simulator, Reliable L3M6 Guide Files

BONUS!!! Download part of TroytecDumps L3M6 dumps for free: <https://drive.google.com/open?id=1TTohGqJw8BoUqzbo1UrohVTWP2NAoJqt>

Our team of experts updates actual Socially Responsible Warehousing and Distribution (L3M6) questions regularly so you can prepare for the Socially Responsible Warehousing and Distribution (L3M6) exam according to the latest syllabus. Additionally, we also offer up to 1 year of free Socially Responsible Warehousing and Distribution (L3M6) exam questions updates. We have a 24/7 customer service team available for your assistance if you get stuck somewhere. Buy CIPS L3M6 Latest Questions of TroytecDumps now and get ready to crack the L3M6 certification exam in a single attempt.

CIPS L3M6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Understand the Concepts of Sustainability and Corporate Social Responsibility (CSR): This section of the exam measures the knowledge of Procurement Specialists and covers the foundational concepts of sustainability and CSR. It explains how sustainability involves meeting present needs without compromising future generations' ability to do the same. The focus extends beyond traditional economic criteria, incorporating environmental and social impacts into procurement decisions. CSR emphasizes extending corporate goals to include social responsibility, promoting good citizenship, and encouraging positive impacts on stakeholders, including social, economic, and cultural diversity.
Topic 2	<ul style="list-style-type: none">Understand the Environmental Impact of Warehousing and Distribution: This section targets Logistics Coordinators and examines how warehousing and distribution contribute to environmental challenges. Topics include air pollution, carbon footprint, noise pollution, accidents, land use, and visual intrusion. It also discusses the environmental costs associated with logistics activities such as greenhouse gas emissions and global warming and strategies to mitigate these impacts. The role of government policies in sustainable logistics is emphasized, including reducing freight intensity, improving utilization rates, promoting greener transport modes, enhancing energy efficiency, and cutting emissions.

Topic 3	<ul style="list-style-type: none"> • Understand Methods for the Storage and Movement of Inventory: This section assesses the expertise of Warehouse Managers in inventory storage and movement methods. It includes principles of warehouse design, focusing on location, layout factors such as flow and space utilization, and flexibility. It also explains various types of warehousing equipment like material handling systems, palletization techniques, packaging standards, and automation technologies that align with environmental standards.
Topic 4	<ul style="list-style-type: none"> • Understand the Environmental Impact of Procurement and Supply: This section evaluates the skills of Supply Chain Analysts in understanding how procurement affects the environment. It explores global challenges such as balancing globalization with green logistics, public awareness, external pressures, and international regulations. The environmental impact of transportation and storage is covered, including air pollution, carbon footprint calculations, noise pollution, accidents, and land use. Additionally, it highlights the government's role in promoting sustainability through policies like greener transport modes, energy efficiency, and emission reduction.

Reliable CIPS L3M6 Guide Files - Reliable L3M6 Exam Test

People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the certification exam and get some certificate. The L3M6 exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our L3M6 Test Torrent provides the statistics report function and help the students find the weak links and deal with them.

CIPS Socially Responsible Warehousing and Distribution Sample Questions (Q178-Q183):

NEW QUESTION # 178

The globally conscious consumer tends to be the younger generation. What percentage are under the age of 40?

- A. 58%
- B. 63%
- C. 53%
- D. 68%

Answer: D

Explanation:

Research cited in the CIPS L3M6 module indicates that globally conscious consumers-those prioritizing sustainability and ethics-are predominantly younger, with approximately 68% being under 40. This reflects a generational shift toward valuing CSR, influencing purchasing decisions and pressuring organizations to adopt sustainable practices.

NEW QUESTION # 179

When monitoring CSR in the supply chain, procurement teams should focus on investigating low-risk suppliers first, not ones from industries that are known to face particular challenges, for example, fuels, energy and power, chemicals, plastics, and food.

- A. TRUE
- B. FALSE

Answer: B

Explanation:

Effective CSR monitoring prioritizes high-risk suppliers, particularly those in industries like fuels, energy, chemicals, plastics, and food, which are prone to environmental, labour, or ethical challenges. Focusing on low-risk suppliers first would be inefficient and fail

to address critical vulnerabilities. The CIPS L3M6 module advocates a risk-based approach to supply chain monitoring, targeting areas with the greatest potential for CSR issues.

NEW QUESTION # 180

Which of the following warehouse and store impacts on the environment would you be considering with long-term, regular exposure to HAV leading to vibration white finger and carpal tunnel syndrome?

- A. Visual intrusion
- B. Land take
- C. Accidents/risks
- D. Noise pollution
- E. Vibration

Answer: E

Explanation:

Vibration (D) from warehouse equipment (e.g., Hand-Arm Vibration, HAV) can cause health issues like vibration white finger, as per the CIPS L3M6 syllabus. Other options-accidents/risks (A), land take (B), noise pollution (C), and visual intrusion (E)-are unrelated to this specific impact. CSR includes monitoring vibration for worker safety and environmental health.

Reference:

NEW QUESTION # 181

Physical vibrations can cause structural problems to a building, which can be expensive to repair.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

Physical vibrations from transport or industrial activity can damage buildings by cracking foundations, walls, or windows, leading to costly repairs. The CIPS L3M6 module notes this as an environmental and economic concern in supply chains-e.g., a warehouse near a busy rail line might face structural fatigue over time. Mitigation (e.g., dampening systems) adds expense, reinforcing the statement's truth. LO2 emphasizes minimizing such impacts to balance sustainability and cost.

Reference:

NEW QUESTION # 182

A _____ measures the total greenhouse gas emissions caused directly and indirectly by people and organizations.

- A. Environment handprint
- B. Environment footprint
- C. Carbon footprint
- D. Carbon handprint

Answer: C

Explanation:

A carbon footprint (A) quantifies total GHG emissions from activities, per the CIPS L3M6 syllabus. Carbon handprint (B) measures positive impacts, while environment footprint (C) and handprint (D) are broader or less defined terms. CSR focuses on carbon footprints for accountability.
