2025 Latest Dupleader NCP-MCA PDF Dumps and NCP-MCA Exam Engine Free Share: [https://drive.google.com/open?id=1N9SNmev\\_7z8oD0izQig1mxHkvFmkNB57](https://drive.google.com/open?id=1N9SNmev_7z8oD0izQig1mxHkvFmkNB57)

If you want to improve your own IT techniques and want to pass NCP-MCA certification exam, our Dupleader website may provide the most accurate Nutanix's NCP-MCA exam training materials for you, and help you Pass NCP-MCA Exam to get NCP-MCA certification. If you are still hesitated, you can download NCP-MCA free demo and answers on probation on Dupleader websites. We believe that we won't let you down.

## Understand why Nutanix experts work only for top consulting companies

Earning a Nutanix certification requires one to be highly skilled at their job. This is why only a few are able to earn this certification. Also, if you earn a Nutanix certification, you get the opportunity to work with only the leading companies in the world.

Here are some of the biggest reasons as to why IT industry professionals work only for leading companies:

**Higher Salary:** According to official statistics, Nutanix certified professionals earn an average salary of \$111,850 per year. This is much higher than what an uncertified application system engineer earns. It goes without saying that this higher salary brings along with it several other benefits including better health insurance and retirement benefits. **Nutanix NCP-MCA Exam Dumps** are the best solution to help you pass your exam.

**More Stability:** The top companies in the world hire certified experts because they need people who will improve their business and help them stand out from their competition. They also know that certified professionals have a greater chance of helping them grow their business than others do. This means that once you are hired by a top company, you can have the peace of mind that you aren't going anywhere for a long time.

**Opportunity for Growth:** Working for top companies gives an IT expert the opportunity to grow his/her career at a much faster pace than one can do while working for.

## The Exam cost of Nutanix NCP-MCA Exam

The cost of the Nutanix NCP-MCA Exam is USD \$199 per attempt.

## Study NCP-MCA Group & Exam NCP-MCA Labs

We have prepared our NCP-MCA training materials for you. They are professional practice material under warranty. Accompanied

with acceptable prices for your reference, all our materials with three versions are compiled by professional experts in this area more than ten years long. Moreover, there are a series of benefits for you. So the importance of NCP-MCA Actual Test is needless to say. If you place your order right now, we will send you the free renewals lasting for one year. All those supplements are also valuable for your NCP-MCA practice exam.

The NCP-MCA certification is ideal for IT professionals who are interested in advancing their career in multicloud automation. Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) certification enables candidates to validate their skills and knowledge in automating and managing multicloud environments using Nutanix technology. By passing NCP-MCA Exam, candidates can demonstrate their expertise to potential employers and gain a competitive edge in the job market. Additionally, the NCP-MCA certification is recognized globally, making it a valuable credential for IT professionals who want to work with multicloud environments.

## Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q100-Q105):

### NEW QUESTION # 100

What are capabilities of Projects in Self-Service?

- A. Assigning blueprints and runbooks to clusters
- **B. Grouping users and managing role-based access**
- C. Automating VM migrations across clusters and providers
- D. Monitoring Prism Central hardware alerts

**Answer: B**

### NEW QUESTION # 101

Refer to the exhibit.

```
1
2
3     Directory: C:\
4
5
6  Mode                LastWriteTime         Length Name
7  ----                -
8  d----  8/31/2019  3:40 AM                MSSQLSVR_Essentials
9  A specified logon session does not exist. It may already have been terminated
10 At C:\Users\Administrator\AppData\Local\Temp\karn\271556c9-330a-4583-a26d-4fa8079d4012\2745f3c9-330a-4583-a26d-4fa8079d4012-503653a3-6879-4bfa-b209-286a95ec332a.ps1:15 char:1

13 + ~~~~~
14 + ~~~~~
15 + CategoryInfo          : InvalidOperation: (T:PSDriveInfo) [New-PSDrive], Win32Exception
16 + FullyQualifiedErrorId : CouldNotMapNetworkDrive,Microsoft.PowerShell.Commands.NewPSDriveCommand
```

Calm encountered the error shown in the exhibit when importing a script that maps a network drive.

Upon further investigation, the Calm administrator was unable to run the script manually on a VM and discovered that elevated permissions were needed.

Which command should the administrator add to the script?

- **A. Enable-WSManCredSSP -Role Client**
- B. Enable-WSManCredSSP -Role Server -Force
- C. Disable-WSManCredSSP -Role Server -Force
- D. Enable-WSManCredSSP -Role Server

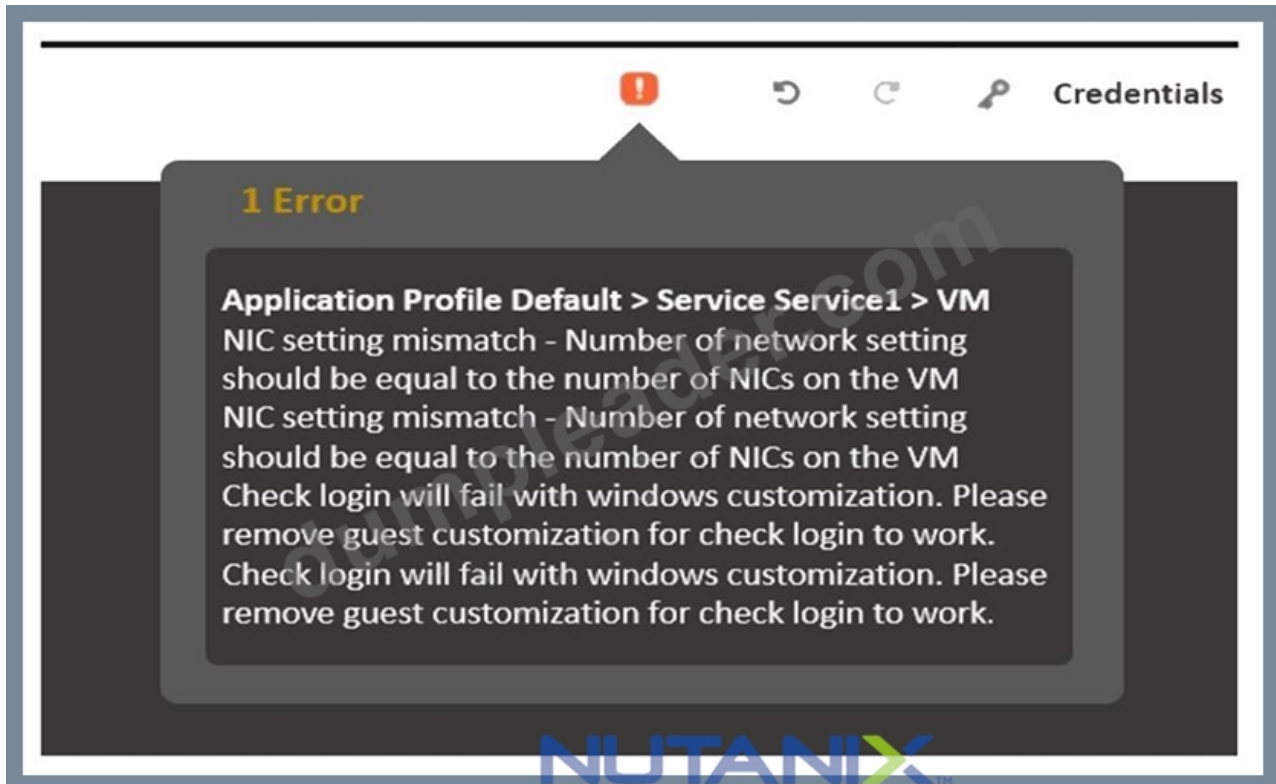

**Answer: A**

Explanation:

The error message indicates that the script failed to authenticate to the remote server using CredSSP. CredSSP is a security mechanism that allows a client to delegate its credentials to a remote server for authentication. To use CredSSP, both the client and the server need to enable it and configure the role and the trusted hosts. The command `Enable-WSManCredSSP -Role Client` enables CredSSP on the client side and specifies the remote server as a trusted host. This command should be added to the script before invoking the `Invoke-Command` cmdlet that runs the script block on the remote server. The other commands are either irrelevant or incorrect for this scenario. References: Nutanix Calm: PowerShell Scripts - Read the Docs and Enable-

### NEW QUESTION # 102

Refer to the exhibit.

Saving the Calm Blueprint gives the validation error for VMware Blueprints shown in the exhibit.

What could be the cause of the error?

- A. Number of Template vCPU components should be equal to the number of pCPU configured.
- B. Number of Template devices components should be equal to the number of Devices configured.
- **C. Number of Template NICs components should be equal to the number of Network Settings configured.**
- D. Number of Template VMXNET3 components should be equal to the number of Virtual e1000 adapters configured.

**Answer: C**

### NEW QUESTION # 103

An application developer has been given operator permissions within a Project. The developer has been tasked with creating a blueprint that will create a Linux VM with the application NGINX installed and configured.

What is required to complete this task?

- A. The developer will import a Linux blueprint into the project with the required task sequence pre-created and select the image.
- B. The developer will create a multi-VM blueprint within the specified project.
- **C. The developer will create a single-VM blueprint. Select Linux as the operating system. Then create a shell task to install NGINX.**
- D. The developer must request additional permissions before taking the steps to create the Linux blueprint and task sequence.

**Answer: C**

Explanation:

In Self-Service, an Operator role can:

- \* Create blueprints
- \* Modify blueprints
- \* Add tasks (shell, PowerShell, script, package installs, etc.)
- \* Use project-provided resources (images, networks, credentials)

To deploy a Linux VM with NGINX:

\* A single-VM blueprint is sufficient.

\* Developer must select Linux substrate.

\* Installation of NGINX occurs through a shell task in the blueprint's package or service.

No additional permissions are required for an Operator to perform these actions.

Therefore, the correct answer is C.

#### NEW QUESTION # 104

Which action should an administrator use to request a static IP address from an IPAM solution?

- A. Create
- **B. Pre-create**
- C. Guest Customization
- D. Profile

**Answer: B**

Explanation:

When integrating with an IP Address Management (IPAM) solution within Nutanix Calm, an administrator would use a 'Pre-create' task to request a static IP address. This task is performed before the actual creation of the VM, ensuring that the IP address is allocated and can be assigned during the VM's creation process.

Profiles (A) are used to define deployment environments, Guest Customization (C) is used for configuring the OS settings, and Create (D) is typically the task for provisioning the actual VM, not for requesting an IP.
