

# Valid NetSec-Generalist Vce File Help You Clear Your NetSec-Generalist: Palo Alto Networks Network Security Generalist Exam Surely

DOWNLOAD the newest PremiumVCEDump NetSec-Generalist PDF dumps from Cloud Storage for free:  
[https://drive.google.com/open?id=1MVqAa38X7lRWChZBOe63\\_xwkKj-IIyJ](https://drive.google.com/open?id=1MVqAa38X7lRWChZBOe63_xwkKj-IIyJ)

Every browser such as Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, and Opera supports this format of Palo Alto Networks Network Security Generalist (NetSec-Generalist) mock exam. You can attempt the Palo Alto Networks Network Security Generalist (NetSec-Generalist) test multiple times to relieve exam stress and boosts confidence. Besides Windows, PremiumVCEDump Palo Alto Networks NetSec-Generalist web-based practice exam works on iOS, Android, Linux, and Mac.

## Palo Alto Networks NetSec-Generalist Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Infrastructure Management and CDSS: This section measures the skills of Infrastructure Managers in managing CDSS infrastructure by configuring profiles</li><li>policies for IoT devices or enterprise DLP</li><li>SaaS security solutions while ensuring data encryption</li><li>access control practices are implemented correctly across these platforms. A key skill measured is securing IoT devices through proper configuration.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>NGFW and SASE Solution Functionality: This section targets Cybersecurity Specialists to understand the functionality of Cloud NGFWs, PA-Series, CN-Series, and VM-Series firewalls. It includes perimeter security, zone segmentation, high availability configurations, security policy implementation, and monitoring</li><li>logging practices. A critical skill assessed is implementing zone security policies effectively.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Platform Solutions, Services, and Tools: This section measures the skills of IT Architects in describing Palo Alto Networks NGFW and Prisma SASE products for enhanced security efficacy. It covers creating security policies with User-ID</li> <li>• App-ID configurations along with monitoring tools like CDSS (Cloud-Delivered Security Services). A key skill measured is configuring cloud-delivered services efficiently.</li> </ul>

## **NetSec-Generalist Reliable Practice Materials & NetSec-Generalist Valid Braindumps Ppt**

As we all know, in the highly competitive world, we have no choice but improve our software power, such as international NetSec-Generalist certification, working experience, educational background and so forth. Therefore, it is of great significance to have a NetSec-Generalist certificate in hand to highlight your resume, thus helping you achieve success in your workplace. So with our NetSec-Generalist Preparation materials, you are able to pass the exam more easily in the most efficient and productive way and learn how to study with dedication and enthusiasm. There are many advantages of our NetSec-Generalist guide torrent.

### **Palo Alto Networks Network Security Generalist Sample Questions (Q31-Q36):**

#### **NEW QUESTION # 31**

Which Security profile should be queried when investigating logs for upload attempts that were recently blocked due to sensitive information leaks?

- A. Anti-spyware
- B. Antivirus
- **C. Data Filtering**
- D. URL Filtering

**Answer: C**

#### **NEW QUESTION # 32**

Which type of traffic can a firewall use for proper classification and visibility of internet of things (IoT) devices?

- **A. DHCP**
- B. RTP
- C. RADIUS
- D. SSH

**Answer: A**

Explanation:

To properly classify and gain visibility into Internet of Things (IoT) devices, a firewall can analyze DHCP traffic, as IoT devices frequently use DHCP for network connectivity.

Why DHCP is the Correct Answer?

IoT Devices Often Use DHCP for IP Assignment -

Most IoT devices (smart cameras, sensors, medical devices, industrial controllers) dynamically obtain IP addresses via DHCP. Firewalls can inspect DHCP requests to identify device types based on DHCP Option 55 (Parameter Request List) and Option 60 (Vendor Class Identifier).

Enhances IoT Security with Granular Policies -

Palo Alto Networks IoT Security uses DHCP data to assign risk scores, enforce access control policies, and detect anomalies.

Does Not Require Deep Packet Inspection -

Unlike RTP, RADIUS, or SSH, which focus on specific protocols for media streaming, authentication, and encryption, DHCP data is lightweight and easily analyzed.

Why Other Options Are Incorrect?

B . RTP (Real-Time Transport Protocol)

Incorrect, because RTP is used for media streaming (VoIP, video conferencing), not device classification.

C . RADIUS (Remote Authentication Dial-In User Service)

Incorrect, because RADIUS is an authentication protocol, not a traffic type used for IoT device classification.

D . SSH (Secure Shell)

Incorrect, because SSH is an encrypted protocol used for remote device access, not identifying IoT devices.

Reference to Firewall Deployment and Security Features:

Firewall Deployment - Firewalls use DHCP fingerprinting for IoT visibility.

Security Policies - DHCP data enables dynamic security policy enforcement for IoT devices.

VPN Configurations - Ensures IoT devices using VPN connections are correctly classified.

Threat Prevention - Detects malicious IoT devices based on DHCP metadata.

WildFire Integration - Prevents IoT devices from being used in botnet attacks.

Zero Trust Architectures - Ensures least-privilege access policies for IoT devices.

### NEW QUESTION # 33

What should be reviewed when log forwarding from an NGFW to Strata Logging Service becomes disconnected?

- A. Device certificates
- B. Software warranty
- C. Decryption profile
- D. Auth codes

**Answer: A**

### NEW QUESTION # 34

Which two cloud deployment high availability (HA) options would cause a firewall administrator to use Cloud NGFW? (Choose two.)

- A. Terraform to automate HA
- B. **Automated autoscaling**
- C. Dedicated vNIC for HA
- D. Deployed with load balancers

**Answer: B**

### NEW QUESTION # 35

Which tool will help refine a security rule by specifying the applications it has viewed in past weeks?

- A. Autonomous Digital Experience Management (ADEM)
- B. Custom Reporting
- C. Policy Optimizer
- D. **Security Lifecycle Review (SLR)**

**Answer: D**

### NEW QUESTION # 36

.....

You must want to know your scores after finishing exercising our NetSec-Generalist study materials, which help you judge your revision. Now, our windows software and online test engine of the NetSec-Generalist study materials can meet your requirements. You can choose from two modules: virtual exam and practice exam. Then you are required to answer every question of the NetSec-Generalist Study Materials. In order to make sure you have answered all questions, we have answer list to help you check.
