Benefits of Study AACN CCRN-Pediatric: Critical Care Nursing Exam

In order to link medical practice to patient outcomes, the AACN Synergy Framework for Patient Care was developed. Incorporation of the Resonance Version into AACN CCRN-Pediatric: The credentials of Critical Care Nursing Exam Company concentrate on the person as well as on the assertions made worldwide that people come foremost. The health care providers provide unique contributions to high quality customer and family care, scientific proof approaches and a complete and nutritious workplace. Critical Care Nursing Exam results indicate the importance of an element of Clinical Judgement as well as a section of hospital treatment and honest technology which reflect the registered characteristics of nursing of the Harmony version including Advocacy/Moral Company, Caring Practices, Medical Issues, Partnership, Knowledge Assistance, Variety Action and also Solution Rationalization. The Synergy Design and also it's right to integrate it into AACN CCRN-Pediatric: Critical Care Nursing Exam except for recording the individual or registered nurse characteristics, but it is intended to help to comprehend the version. Examine questions addressed in **AACN CCRN Pediatric exam dumps** that did not contain its nomenclature but included the Harmony version application. The certified board is a phrase used mainly by doctors' organizations. While a business may use the phrase board-licensed for their professional certifications, it does not reflect a unique or higher degree of qualification. Board licensed in the nursing field refers simply to a globally known institution's accreditation that is monitored by an executive committee. Because of this, Emergency Medicine Nursing Exam programs are certainly accredited by the AACN CCRN-Pediatric committee.

CCRN is both a certified training mark and a trademark. It does not say "Important Registered Treatment Nurse," since AACN cannot ensure that a certification is a registered nurse this concerns the nurse practitioner and its condition. This certificate is necessary while looking for an examination and renewing their certification, when they provide us with a current unencumbered Registered Nurse or APRN license, which informs us of any changes in their status. CCRN certification is an AACN CCRN-Pediatric Critical Care Nursing Exam Company-approved credential. More than 75,000 acute and also crucial caregivers in adult, pediatric or neonatal nursing are presently certified globally. CCRN Certification validates your knowledge of acute/critically ill health care to health care managers, colleagues, customers and, above all. CCRN certification announces the progress of excellence in the area of critical nursing care. CCRN Certification lets you keep an up-to-date database of critical and critical treatment. CCRN certification not only gives you a feeling of expert glory and accomplishment but also reinforces the unique knowledge and experiences needed for acute and critical medical care. The study combines a higher degree of medical knowledge, training and expertise with CCRN accreditation, which also includes **AACN CCRN Pediatric exam dumps**. The CCRN certificate is recognized for a three-year term and may also be renewed by taking the CCRN test again or meeting the criteria of the Harmony CERPs (Continuing Education and Recognition Factors) program throughout a three-year period of authorization.

AACN Critical Care Nursing Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

The nurse assigned at the ER admits a child who had a seizure episode at school. The mother comments that this is the first occurrence, and denies any family history of epilepsy. What is the best response by the nurse?

- A. "Seizure may or may not mean that your child is suffering from epilepsy"
- B. "Since it was his first episode, it will not happen again"
- C. "Your child needs a lifetime medication to prevent seizure"
- D. "There is no need to worry. The sky won't fall down"

Answer: A

Explanation:

Explanation: There are many possible causes for a childhood seizure. These include fever, central nervous system conditions, trauma, metabolic alterations and idiopathic causes.

NEW QUESTION # 65

A mother of a 6 month-old breast fed baby asks the nurse about increasing the baby's diet. Which of the following should be added first?

- A. Fruit juices
- B. Egg yolk

- C. Cereals
- D. Lean meat

Answer: C

Explanation:

Explanation: According to the American Academy of Pediatrics, one new food should be introduced at a time, beginning with strained cereal.

NEW QUESTION # 66

A patient has a right groin central venous catheter with vasoactive infusions. The nurse notices swelling and increased circumference of the right thigh and calf. The first action should be to:

- A. Apply a warm compress alternating with a cool compress
- B. Put compression stockings on the right leg
- C. Elevate the leg above the level of the heart
- D. Massage the leg with long strokes toward the heart

Answer: C

Explanation:

This presentation is concerning for deep vein thrombosis (DVT) or infiltration/extravasation of vasoactive medications. The first step is to elevate the limb, which reduces venous pressure and minimizes further tissue damage. Massaging or compressing the area is contraindicated due to risk of embolization or tissue injury.

"Suspected venous obstruction or extravasation requires elevation of the affected limb and notification of the provider. Avoid massage or compression until diagnosis is confirmed." (Referenced from CCRN Pediatric - Direct Care: Multisystem, Vascular Access Complications)

NEW QUESTION # 67

Which of the following behavior of a preschooler indicates that the child is in the stage of initiative?

- A. the child talks to his friends on the telephone and arranges for them to visit
- B. the child ignores his parents and continues to watch television with other child
- C. the child wants to finish his game of Candyland before his dressing is changed
- D. the child cries and has a temper tantrum when he is sent to bed to go to sleep

Answer: C

Explanation:

Explanation: A child who wants to finish his game of Candyland before his dressing is changed is in the stage of initiative. During this stage, a child plays, works and lives to the fullest and feels a real sense of accomplishment and satisfaction in activities. Completing tasks becomes increasingly important. Temper tantrum is a characteristic behavior of a toddler.

NEW QUESTION # 68

A school age girl with rubella should be isolated from an unimmunized:

- A. 18 year old sister who has recently married.
- B. 21 year old brother living at home.
- C. 14 year old brother who had rubella as a child.
- D. 4 year old child who lives next door.

Answer: A

Explanation:

Explanation: An unimmunized woman like 18 year old sister who has recently got married and is exposed to rubella virus is at a higher risk. If she contracts the disease it may be transmitted to her fetus once she got pregnant. Option b has a lesser effect as it would probably be mild and confer immunity.

NEW QUESTION # 69
