Users are buying something online (such as 1z0-1127-24 learning materials), always want vendors to provide a fast and convenient sourcing channel to better ensure the user's use. Because without a quick purchase process, users of our 1z0-1127-24 learning materials will not be able to quickly start their own review program. So, our company employs many experts to design a fast sourcing channel for our 1z0-1127-24 Learning Materials. All users can implement fast purchase and use our learning materials.

Oracle 1z0-1127-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Using OCI Generative AI Service: For AI Specialists, this section covers dedicated AI clusters for fine-tuning and inference. The topic also focuses on the fundamentals of OCI Generative AI service, foundational models for Generation, Summarization, and Embedding.
Topic 2	<ul style="list-style-type: none">Building an LLM Application with OCI Generative AI Service: For AI Engineers, this section covers Retrieval Augmented Generation (RAG) concepts, vector database concepts, and semantic search concepts. It also focuses on deploying an LLM, tracing and evaluating an LLM, and building an LLM application with RAG and LangChain.
Topic 3	<ul style="list-style-type: none">Fundamentals of Large Language Models (LLMs): For AI developers and Cloud Architects, this topic discusses LLM architectures and LLM fine-tuning. Additionally, it focuses on prompts for LLMs and fundamentals of code models.

Valid Dumps 1z0-1127-24 Ebook - New 1z0-1127-24 Test Labs

Undoubtedly, passing the Oracle 1z0-1127-24 certification exam is one big achievement. Regardless of how tough the 1z0-1127-24 exam is, it serves an important purpose of improving your skills and knowledge of a specific field. Once you become certified by Oracle 1z0-1127-24, a whole new career scope will open up to you.

Oracle Cloud Infrastructure 2024 Generative AI Professional Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which is the main characteristic of greedy decoding in the context of language model word prediction?

- A. It selects words based on a flattened distribution over the vocabulary.
- B. It chooses words randomly from the set of less probable candidates.
- C. It picks the most likely word email at each step of decoding.
- D. It requires a large temperature setting to ensure diverse word selection.

Answer: C

NEW QUESTION # 59

Which role does a "model end point" serve in the inference workflow of the OCI Generative AI service?

- A. Hosts the training data for fine-tuning custom model
- B. Updates the weights of the base model during the fine-tuning process
- C. Serves as a designated point for user requests and model responses
- D. Evaluates the performance metrics of the custom model

Answer: A

NEW QUESTION # 60

When is fine-tuning an appropriate method for customizing a Large Language Model (LLM)?

- A. When the LLM does not perform well on a task and the data for prompt engineering is too large
- B. When the LLM requires access to the latest data for generating outputs
- C. When you want to optimize the model without any instructions
- D. When the LLM already understands the topics necessary for text generation

Answer: A

Explanation:

Fine-tuning is a technique used to customize an existing Large Language Model (LLM) by training it on domain-specific or task-specific data. Fine-tuning is necessary when:

The LLM's General Knowledge is Insufficient - If the model struggles with a specialized domain (e.g., medical, legal, finance), fine-tuning helps by exposing it to relevant domain-specific data.

Prompt Engineering is Ineffective Due to Large Data Requirements - When a task requires significant custom instructions or examples, fine-tuning is a better approach than prompt engineering, which may have length and complexity limitations.

Improved Accuracy is Required - Fine-tuning helps tailor the model to perform specific tasks more accurately, as it learns from additional training data.

Adapting to a Changing Knowledge Base - Fine-tuning can help update the model with recent trends or company-specific data that were not available during its initial training.

□ Oracle Generative AI Reference:

Oracle supports LLM fine-tuning within its AI ecosystem, allowing enterprises to optimize pre-trained AI models for industry-specific applications.

NEW QUESTION # 61

Which is NOT a typical use case for LangSmith Evaluators?

- A. Aligning code readability
- B. Measuring coherence of generated text
- C. Evaluating factual accuracy of outputs
- D. Detecting bias or toxicity

Answer: A

Explanation:

LangSmith Evaluators are not typically used for aligning code readability. Instead, they are used for tasks such as measuring the coherence of generated text, evaluating the factual accuracy of outputs, and detecting bias or toxicity. Evaluators help ensure the quality and reliability of the outputs generated by language models.

NEW QUESTION # 62

Which role does a "model end point" serve in the inference workflow of the OCI Generative AI service?

- A. Hosts the training data for fine-tuning custom model
- B. Updates the weights of the base model during the fine-tuning process
- **C. Serves as a designated point for user requests and model responses**
- D. Evaluates the performance metrics of the custom model

Answer: C

Explanation:

In the inference workflow of the OCI Generative AI service, a "model endpoint" is a critical component. It serves as a designated point for handling user requests and providing model responses. When users or applications send requests to the model endpoint, the endpoint processes these requests by passing them to the deployed model. The model then generates responses based on the input data, and these responses are returned to the user through the same endpoint. This setup facilitates efficient and scalable interaction with the AI model, ensuring that inference can be performed seamlessly and reliably.

NEW QUESTION # 63

.....

This will help them polish their skills and clear all their doubts. Also, you must note down your Oracle Cloud Infrastructure 2024 Generative AI Professional (1z0-1127-24) practice test score every time you try the Oracle Exam Questions. It will help you keep a record of your study and how well you are doing in them. ITexamReview hires the top industry experts to draft the Oracle Cloud Infrastructure 2024 Generative AI Professional (1z0-1127-24) exam dumps and help the candidates to clear their Oracle Cloud Infrastructure 2024 Generative AI Professional (1z0-1127-24) exam easily. ITexamReview plays a vital role in their journey to get the 1z0-1127-24 certification.
