The PDF version of the Getcertkey Oracle 1z0-591 prep material is easily accessible. This format is ideal for someone who is constantly on the move, as you can prepare for your Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) exam whether you are using your smartphone, tablet, or laptop. You can study anywhere, at any time, without having to worry about installing anything. Furthermore, you can study with a hard copy by printing all of your Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) PDF questions. We offer regular updates in PDF format to improve Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) questions according to changes in the exam.

Passing the Oracle 1Z1-591 certification exam is no easy feat, but it is possible with the right preparation and knowledge. Learning the fundamentals of Oracle Business Intelligence Foundation Suite 11g, the best practices, and the newest features is key for a successful exam pass. To prepare for the exam, candidates can take training courses and seek guidance from exam preparation resources such as Oracle's exam study guides, certification forums, and practice tests. With the right approach, candidates can pass the Oracle 1Z1-591 certification exam and become an expert in Oracle Business Intelligence Foundation Suite 11g.

Oracle 1z0-591 Certification Exam, also known as the Oracle Business Intelligence Foundation Suite 11g Essentials exam, is designed to test the proficiency of candidates in using Oracle BI tools for data analysis and decision-making. It aims to provide a comprehensive understanding of the Oracle BI platform, its components, and its capabilities, along with the ability to implement best practices for optimizing performance, security, and usability.

## Composite Test 1z0-591 Price, New 1z0-591 Test Braindumps

Because the Oracle Business Intelligence Foundation Suite 11g Essentials (1z0-591) test has a restricted time constraint, time management must be exercised to get success. Only with enough practice one can answer real Oracle 1z0-591 Exam Questions in a given amount of time. It has created three formats to aid Oracle 1z0-591 applicants in practicing and organizing their time for this aim.

### Oracle Business Intelligence Foundation Suite 11g Essentials Sample Questions (Q93-Q98):

#### NEW QUESTION # 93

Which component is responsible for determining the device that receives the alerts for a given user account?

- A. iBot
- B. Alerts
- C. Delivery Profiles
- D. Dashboard

**Answer: A**

Explanation:

Intelligent Bursting and Output Tool (iBot).

iBot is an utility available in OBIEE which is used for reports scheduling as well as Alerts sent to the required recipients on different web accessible / communication devices.

#### NEW QUESTION # 94

You do not have a physical time table in your database but would like to use the time series functions that OBIEE offers. What two options do you have?

- A. Create a time table that is joined through a intervening Table so there is no foreign key relationship.
- B. Create a physical time table in your database.
- C. Create an "Opaque View" in the physical layer that contains the time columns from the fact and map it into your physical model.
- D. Create a Logical Table that is sourced from the time key in the fact table.
- E. Create a Logical Table that is sourced from a time field in one of your dimension tables.

**Answer: B,E**

Explanation:

Modeling Time Series Function in OBIEE

Modeling Time Series Data

Time series functions provide the ability to compare business performance with previous time periods, allowing you to analyze data that spans multiple time periods. For example, time series functions enable comparisons between current sales and sales a year ago, a month ago, and so on.

Because SQL does not provide a direct way to make time comparisons, you must model time series data in the Oracle BI repository. First, set up time dimensions based on the period table in your data warehouse. Then, you can define measures that take advantage of this time dimension to use the AGO, TODATE, and PERIODROLLING functions.

#### NEW QUESTION # 95

How do System Session Variables obtain their values?

- A. They are obtained from the Presentation Layer
- B. They are entered by user input on a dashboard
- C. They are obtained from the Initialization Block
- D. They are obtained from data fields in the Physical Layer

**Answer: C**

Explanation:

Explanation

Initialization blocks are used to initialize dynamic repository variables, system session variables, and nonsystem session variables.

#### NEW QUESTION # 96

How will you model a Type II Slowly-Changing Dimension?

- A. Do Nothing
- B. Overwrite an existing dimension table record with the changed record
- C. Add an additional column to the dimension table to capture a version of change
- **D. Add a new row to the dimension table with a new key for the changed record**

**Answer: D**

Explanation:

Explanation/Reference:

Dimensional Modeling - Slowly Changing Dimensions

\* Type 1 - Overwrite Original Value

A change does not require tracking

\* Type 2 - Add a new record

With Type II SCD, a new version of the dimension record (row) is created, and the existing version is marked as history.

Each row does not correspond to a different instance of an entity but a different "state", a "snapshot" of the instance at a point in time.

Note: Tracking changes in dimension is referred in datawarehousing as slowly changing dimensions.

In the source system a lot of changes are daily made :

new customers are added,

addresses are modified,

new regional hierarchies are implemented,

or simply the product descriptions and packaging change.

These sorts of changes need to be reflected in the dimension tables and in several cases, the history of the changes also needs to be tracked.

By remembering history, we are then able to look at historical data and compare it to their current situation.

#### NEW QUESTION # 97

Which option describes how OBIEE natively integrates with HFM?

- A. OBIEE does not support HFM integration
- B. Through Essbase connectivity
- C. Direct relational database access
- **D. Through EPM Analytic Data Model (ADM) connectivity**

**Answer: D**

Explanation:

BI EE uses the ADM driver to extract the data from HFM.

Note: HFM (Hyperion Financial Management)

Example:

IEE connects to HFM through JavaHost. So, the setup for configuring the connectivity is to basically make the EPM environment variables available for access to BI EE. Before making the changes, there are a couple of things to be aware of

1.Ensure that DCOM is enabled on the BI Server machine. This is needed for HFM client to work/connect properly with HFM Server.

2.Ensure that HFM Client is installed.

The above assumes EPM 11.1.2.x version. If you are on Hyperion 9.3.3, then you need to have the ADM drivers installed manually. All of this is documented clearly. So, rather than re-iterating that i will just point to the link here. Ensure that you follow all the steps mentioned in the docs else you will have issues in the connectivity. Once all the pre-requisite steps are done, we start off with the metadata import process.

Import Type: Local Machine

Connection Type: Hyperion ADM

URL: adm:native:HsvADMDriver:172.16.100.136:APPLT
