

Valid PL-600 Exam Fee & PL-600 Customized Lab Simulation

P.S. Free 2025 Microsoft PL-600 dumps are available on Google Drive shared by TorrentValid: https://drive.google.com/open?id=1Lo1eWmlaYxYWMo_yYrU31s1GOEVB-xN1

TorrentValid IT experts specialize in training way which is the latest short-term effective. This training method is very helpful to you and you can achieve the expected result. In particular, it brings convenience to these candidates both working and studying. To the best of our knowledge the information contained in this publication is accurate. TorrentValid Microsoft PL-600 Test Questions and test answers have an advantage over other products with the accuracy of 100%. You may be worried that our PL-600 practice test is old version. Don't worry, Our TorrentValid Microsoft PL-600 exam dumps is the latest. Free update is for one year.

Microsoft Power Platform Solution Architect certification is highly sought-after in the industry. It is designed for individuals who have experience with Power Apps, Power Automate (previously known as Microsoft Flow), and Power BI. Microsoft Power Platform Solution Architect certification shows that the candidate has the technical skills and knowledge needed to design, develop, and implement solutions that enhance business outcomes using the Power Platform. Professionals with the PL-600 Certification have a unique skill set that differentiates them from other technology professionals in the market.

PL-600 Customized Lab Simulation, Reliable PL-600 Braindumps Free

The third and last format is the Microsoft Power Platform Solution Architect (PL-600) desktop practice test software that can be used on Windows laptops and PCs. Students with laptops or computers can access the software and prepare for it efficiently. The Microsoft Power Platform Solution Architect (PL-600) dumps of TorrentValid have many premium features, one of which is practice exams (desktop and web-based).

Microsoft PL-600 Exam is ideal for those candidates who want to become a certified Power Platform Solution Architect. Microsoft Power Platform Solution Architect certification is ideal for those who want to improve their skills and knowledge in designing and implementing complex business solutions using Microsoft Power Platform. Microsoft Power Platform Solution Architect certification is also ideal for those who want to enhance their career opportunities and increase their earning potential.

Microsoft Power Platform Solution Architect Sample Questions (Q32-Q37):

NEW QUESTION # 32

You are designing a Power Platform solution for a company.

You have the following requirements:

Users in the human resources department must be able to create tasks.

Users in the human resources department must be able to assign cases to other users.

You need to recommend security settings to the company.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Business requirement	Solution
Users in the human resources department must be able to create tasks.	▼ Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	▼ Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.

Answer:

Explanation:

Business requirement	Solution
Users in the human resources department must be able to create tasks.	▼ Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	▼ Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.

Explanation:

Box 1: Assign only Create rights to activities

You require the same set of Dataverse privileges and access rights to work with custom activities as those required to work with custom entities.

Task-based privileges, at the bottom of the form, give a user privileges to perform specific tasks, such as publish articles.

Box 2: Assign User-level assign rights to human resources case table.

Record-level privileges define which tasks a user with access to the record can do, such as Read, Create, Delete, Write, Assign, Share, Append, and Append To.

For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit

and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.

Incorrect Answers:

For security purposes, records that are organization owned, the only access level choices is either the user can do the operation or can't.

NEW QUESTION # 33

A company plans to simplify its environment by replacing its current applications with a Microsoft Power Platform solution. You need to guide the company through the activities required during each project phase.

When should you recommend the company perform each activity? To answer, move the appropriate phases to the correct activities. You may use each phase once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a Microsoft interface with two main panes. The left pane, titled 'Phases', contains three items: 'Presales', 'Initiation', and 'Analysis/design'. The right pane, titled 'Activities for project phases', contains three activities: 'Create a proof of concept.', 'Use a workshop to document current processes.', and 'Assist with project team creation.' To the right of the activities is a column titled 'Phase' with three empty input boxes for matching.

Answer:

Explanation:

This screenshot shows the same interface as the previous one, but with the correct matches. The 'Presales' phase is matched to 'Create a proof of concept.', 'Initiation' is matched to 'Use a workshop to document current processes.', and 'Analysis/design' is matched to 'Assist with project team creation.' The 'Phase' column on the right now contains the names of the matched phases.

Explanation:

This screenshot shows the same interface as the previous one, but with the correct matches. The 'Presales' phase is matched to 'Create a proof of concept.', 'Initiation' is matched to 'Use a workshop to document current processes.', and 'Analysis/design' is matched to 'Assist with project team creation.' The 'Phase' column on the right now contains the names of the matched phases.

NEW QUESTION # 34

You need to recommend a collaboration tool for each group.

Which tool should you use? To answer, select the appropriate tool in the answer area.

NOTE: Each correct selection is worth one point.

Group

Tool

Maintenance supervisors

Microsoft

Aircraft maintenance vendors

	▼
Microsoft Teams	
Notes	
Power Apps portal	
Posts	

	▼
Dynamics 365 Workspace	
Notes	
Power Apps portal	
Posts	

Answer:

Explanation:

Group

Tool

Microsoft

Maintenance supervisors

	▼
Microsoft Teams	
Notes	
Power Apps portal	
Posts	

Aircraft maintenance vendors

	▼
Dynamics 365 Workspace	
Notes	
Power Apps portal	
Posts	

Explanation:

Box 1: Microsoft Teams

Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.

Box 2: Dynamics 365 Workspace

Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.

The Expense management mobile workspace lets users capture and upload a receipt, so that they can attach it to an expense report later.

Topic 1, Relecloud

Case study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Background

Relecloud provides regional air service in North America. The company uses a variety of systems, apps, and services to manage the business. You are hired to design a new solution to manage passenger information, reservations, and maintenance.

Current environment

- * The company uses Microsoft Office 365.
- * The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.
- * For flights longer than four hours, passengers receive a meal. Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.
- * The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.
- * The company uses paper-based reservation checklists to help ensure that all the steps for a reservation are complete.
- * The company uses vendors to service aircraft.

Environment

- * Ensure that employees can sign in to all Microsoft apps by using one set of credentials per employee.
- * Minimize the use of third-party products and custom development.
- * Reduce customer support call volumes by having the system automatically resolve common issues.
- * The security rule for agents must contain the privileges in the default Customer Service Representative security role.
- * Log issues as cases. The case form must show variable sections based on the case type. Include a custom entity named Seats and grant agents access to the entity.
- * Application use layout should be role specific.

Agents

- * You must standardize the format used by agents to enter customer phone numbers.
- * Agents need a solution to replace paper reservation checklists.
- * Agents need dashboards to show a current count of all reservations on the entity.
- * Agents need a way to track reservation issues.
- * Agents need a visual indicator in the interface to determine the reservation step to provide a seamless customer experience.
- * Agents need different versions of cancellation policies to send customers. One version must be controllable within the system.
- * Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

IT

- * IT staff needs a mobile solution to see IT cases at the top of the menu since this is their primary focus.
- * IT staff needs a system that is easy to navigate to active cases.
- * IT specialists want to design Power BI reports. They need to understand the underlying table relationships of the system.
- * IT specialists need a solution that is visual rather than text-based so they can quickly complete their tasks.

Management

- * Management requires paginated reports for stakeholders.
- * Management wants to provide frequent flyers with better service when the flyers call.
- * Managers need to see all customer dashboards at the top of their menu on their mobile device.

Maintenance

- * Maintenance supervisors must not have access to Dynamics 365 Customer Service. The supervisors must be able to communicate with the contracts team about contracts.
- * Aircraft maintenance vendors must have only view and upload privileges to their invoices and receipts.
- * Contracts with maintenance companies must be stored in Dynamics 365 Customer Service.

NEW QUESTION # 35

A company plans to implement a model-driven app. The company has the following requirements:

- * Short Message Service (SMS) data must be visible on the model-driven app timeline.
- * Store location data must be referenced from a SQL server database.
- * Customer data must be audited and only edited by specific users.

You need to recommend the table type for each requirement.

Which table types should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions

- Virtual - organization owned
- Custom - user or team owned
- Custom - organization owned
- Activity - user or team owned

Answer Area

Requirement

- SMS data
- Store location data
- Customer data

Solution

Answer:

Explanation:

Solutions

- Virtual - organization owned
- Custom - user or team owned
- Custom - organization owned
- Activity - user or team owned

Explanation:

Solutions

- Virtual - organization owned
- Custom - user or team owned
- Custom - organization owned
- Activity - user or team owned

Answer Area

Requirement

- SMS data
- Store location data
- Customer data

Solution

NEW QUESTION # 36

You need to recommend solutions for the organization's technical challenges.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	Power Automate QnA Maker Azure Cognitive Services
Authenticate workers who use the self-service option for updating skills information.	Azure Active Directory B2B Azure Active Directory B2C Dynamics 365 owner team
Plan routes for audit teams.	Azure traffic routing Address input component Dynamics 365 Field Service

Answer:

Explanation:

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	Power Automate QnA Maker Azure Cognitive Services
Authenticate workers who use the self-service option for updating skills information.	Azure Active Directory B2B Azure Active Directory B2C Dynamics 365 owner team
Plan routes for audit teams.	Azure traffic routing Address input component Dynamics 365 Field Service

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Requirement

Provide workers a self-service option for viewing personal and skills information.

Authenticate workers who use the self-service option for updating skills information.

Plan routes for audit teams.

Solution

Power Automate
QnA Maker
Azure Cognitive Services

Azure Active Directory B2B
Azure Active Directory B2C
Dynamics 365 owner team

Azure traffic routing
Address input component
Dynamics 365 Field Service

Box 1: Power Automate

Self-service purchase is available for Power Platform (Power BI, Power Apps, and Power Automate), Project, and Visio.

Box 2: Azure Active Directory B2B

Scenario: First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies.

Azure Active Directory (Azure AD) business-to-business (B2B) collaboration is a feature within External Identities that lets you invite guest users to collaborate with your organization. With B2B collaboration, you can securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources.

Note, Scenario:

Workers must be able to sign into a portal by using their own email address. Workers must be required to use a secure method of authentication to be able to view their data.

User security roles must be customized to ensure that users are able to interact only with the specific data in which they need access.

Box 3: Dynamics 365 Field Service

Dynamics 365 Field Service functionality include:

An interactive schedule board helps dispatchers assign work orders to the best resources based on location, availability, skill set, priority, and more. This is done via a manual drag-and-drop method, a semi-automated scheduling assistant, or fully automated with Resource Scheduling Optimization.

The schedule board displays each resource--whether an employee, contractor, or equipment--and their scheduled work orders.

Resources and their assigned jobs are also displayed on a map along with routes and traffic patterns in real time.
