Salesforce Certified Platform App Builder Sample Questions (Q118-Q123):

NEW QUESTION # 118

What is true regarding compact layouts? Choose 2 answers.

- A. If a user doesn't have access to a field it won't be displayed
- B. Compact layouts must be configured for fields to be displayed in the record header
- C. Compact layouts can be assigned to different record types
- D. Compact layouts support all field types

Answer: A,C

NEW QUESTION # 119

An app builder has created a custom Lightning App and wants to make it available to the internal users at Universal Containers.

Which two steps are necessary to accomplish this task?

Choose 2 answers

- A. Upload the app to Static Resources.
- B. Build a Custom Tab for the app.
- C. Add the app to a Visualforce page.
- D. Create a subdomain using My Domain.

Answer: B,D

Explanation:

The app builder needs to do two steps to make the custom Lightning App available to the internal users at Universal Containers:

* Create a subdomain using My Domain: My Domain is a feature that allows an organization to set up a custom domain name for their Salesforce instance. This is required to use custom Lightning components

* and apps in Salesforce1.

* Build a Custom Tab for the app: A custom tab is a tab that displays any custom object or web page in Salesforce. This is required to make the custom Lightning App accessible from the navigation menu or app launcher. Option A and B are not necessary steps to make the custom Lightning App available to the internal users.

NEW QUESTION # 120

Universal Containers (UC) has large data volumes and is nearing data storage limits. The planned solution is to archive historical data to reduce data storage in Salesforce; however, UC would still like to use reports, queries, and lookups on the archived information.

Which two options could meet this requirement?

Choose 2 answers

- A. Custom objects
- B. External objects
- C. Big objects
- D. Related objects

Answer: B,C

NEW QUESTION # 121

Which two places can an app builder go to see a list of available Custom Lightning components in their org?
Choose 2 answers

- A. Visualforce components in Setup
- B. Lightning component Generator
- C. Lightning components in Setup
- D. Lightning App Builder

Answer: C,D

Explanation:

An app builder can go to two places to see a list of available custom Lightning components in their org:

Lightning App Builder: This is a tool that allows an app builder to create and customize Lightning pages using drag-and-drop components. The app builder can see the list of custom Lightning components in the Custom section of the Lightning Components panel.

Lightning Components in Setup: This is a setup menu that allows an app builder to view, create, edit, and delete custom Lightning components in their org. The app builder can see the list of custom Lightning components in the Lightning Components section of the Setup menu². Option A and B are not places where an app builder can see a list of custom Lightning components.

NEW QUESTION # 122

A sales manager at Cloud Kicks wants the team to spend more time in the field and less time manually entering the information found on the business cards they collect.

What should an app builder do to help achieve this goal without sacrificing data quality?

- A. Post daily to the Chatter feed any relevant fields that need to be populated.
- B. Use a combination of workflow rules and formula fields to populate key fields for the sales user.
- C. Research and evaluate data enrichment products on the AppExchange to automate data entry.
- D. Use Flow to create a data entry wizard to automate data entry.

Answer: C

NEW QUESTION # 123
