How is Integrated Capture different from Classic Capture?

- A. Integrated Capture is different because it automatically configures the Capture process of GoldenGate.
- B. Integrated Capture is different because it connects directly to the inbound server to apply transactions.
- C. Integrated Capture is different because it captures processes to integrate with an application server.
- **D. Integrated Capture is different because it receives Logical Change Records (LCRs) directly from a database logmining server.**

Answer: D

Explanation:

The main difference between Integrated and Classic Capture in Oracle GoldenGate lies in how changes are captured from the database. Integrated Capture uses a database logmining server to receive Logical Change Records (LCRs) directly, while Classic Capture directly reads redo log files.

NEW QUESTION # 69

You have an issue where all threads are waiting for a specific transaction to be executed first. What is this issue related to?

- A. It is caused by the use of the MAXTRANSOPS parameter.
- B. It is caused by the thread with the highest thread ID applying barrier transactions.
- **C. It is caused by barrier transactions in a Coordinated Replicat.**
- D. It is caused by THREAD and THREADRANGE being used with wildcard MAP statements.
